Background

Section 3(1)(A) of the Marine Mammal Protection Act (MMPA) (16 U.S.C. 1362(1)(A)) defined the term, "depletion" or "depleted", to include any case in which " * * * the Secretary, after consultation with the Marine Mammal Commission and the Committee of Scientific Advisors on Marine Mammals * * * determines that a species or a population stock is below its optimum sustainable population." Section 3(9) of the MMPA (16 U.S.C. 1362(9)) defines "optimum sustainable population [(OSP)] * * * with respect to any population stock, [as] the number of animals which will result in the maximum productivity of the population or the species, keeping in mind the carrying capacity [(K)] of the habitat and the health of the ecosystem of which they form a constituent element." NMFS' regulations at 50 CFR 216.3 clarify the definition of OSP as a population size that falls within a range from the population level of a given species or stock that is the largest supportable within the ecosystem (*i.e.*, K) to its maximum net productivity level (MNPL). MNPL is the population abundance that results in the greatest net annual increment in population numbers resulting from additions to the population from reproduction, less losses due to natural mortality.

The MMPA provides for interested parties to submit a petition to designate a population stock of marine mammals as depleted. Section 115(a)(3) of the MMPA (16 U.S.C. 1383b(a)(3)) requires NMFS to publish a notice in the **Federal Register** that such a petition has been received and is available for public review. Within 60 days of receiving a petition, NMFS must publish a finding in the **Federal Register** as to whether the petition presents substantial information indicating that the petitioned action may be warranted.

If NMFS makes a positive 60-day finding, NMFS must promptly initiate a review of the status of the affected population stock of marine mammals. No later than 210 days after receipt of the petition, NMFS must publish a proposed rule as to the status of the species or stock, along with the reasons underlying the proposed status determination. Following a 60-day minimum comment period on the proposed rule, NMFS must publish a final rule within 90 days of the close of the comment period on the proposed rule.

Petition on Eastern North Pacific Gray Whales

On October 21, 2010, NMFS received a petition from the California Gray Whale Coalition to designate the Eastern North Pacific population of gray whales as depleted under the MMPA. The petition alleges that the causes of the decline include the following:

- (1) Over-harvesting;
- (2) Collapse of cow/calf numbers;
- (3) Predation by transient orcas;
- (4) Major changes in primary prey and habitat as a result of climate change; and
- (5) Reduction in available prey species resulting in starvation.

In accordance with the MMPA, NMFS announces the receipt of this petition, and its availability for public review (see **ADDRESSES** and Electronic Access). NMFS also solicits comments and information related to the statements in the petition and additional background on the status of the Eastern North Pacific population of gray whales.

Dated: November 4, 2010.

Thomas C. Eagle,

Acting Chief, Marine Mammal and Sea Turtle Conservation Division, Office of Protected Resources, National Marine Fisheries Service.
