

agencies. This regulation provides detailed guidance for contractors doing business with acquisition offices within the Department of Homeland Security (DHS) to implement the FAR. FAR Part 33.103, Protests, Disputes, and Appeals prescribe policies and procedures for filing protests and for processing contract disputes and appeals. DHS will not be asking for anything outside of what is already required in the FAR. Should anything outside the FAR arise, DHS will submit a request for Office of Management and Budget (OMB) approval. The information being collected will be obtained from contractors as part of their submissions whenever they file a bid protest with the Department's Components. The information will be used by DHS officials in deciding how the protest should be resolved. Failure to collect this information would result in delayed resolution of agency protests.

According to FPDS, the number of protest has increased each year over the past two years in annual respondent and burden hours. This increase in current protest activity is not the result of a deliberate program change, but from a new estimate of actions that are not controllable by the Federal government. Although, the number of protest has increased, there has not been any change in the information being collected.

The Office of Management and Budget is particularly interested in comments which:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the Department of Homeland Security (DHS) Office of Operations Coordination and Planning (OPS), including the National Operations Center (NOC), proposes to establish a new DHS system of records titled, "DHS/OPS—003 Operations Collection, Planning, Coordination,

Reporting, Analysis, and Fusion System of Records.”

This system of records will allow DHS/OPS, including the NOC, to collect, plan, coordinate, report, analyze, and fuse information related to all-threats and all-hazards, law enforcement activities, intelligence activities, man-made disasters and acts of terrorism, natural disasters, and other information collected or received from federal, state, local, tribal, and territorial agencies and organizations; foreign governments and international organizations; domestic security and emergency management officials; and private sector entities or individuals into the Department.

OPS serves as a joint operations coordination and planning capability at the strategic level to support internal DHS operational decision making, DHS leadership, and participation in interagency operations. OPS integrates DHS and interagency planning and operations coordination in order to prevent, protect, and respond to and recover from all-threats and all-hazards, man-made disasters and acts of terrorism, and natural disasters.

The NOC serves as the nation’s homeland security center for information sharing and domestic incident management, dramatically increasing coordination between federal, state, local, tribal, and territorial agencies and organizations; foreign governments and international organizations; domestic security and emergency management officials; and private sector entities or individuals. The NOC collects and fuses information from a variety of sources everyday to help deter, detect, and prevent terrorist acts as well as to prepare for, respond to, and recover from all-threats and all-hazards, man-made disasters and acts of terrorism, and natural disasters. Operating 24 hours a day, seven days a week, 365 days a year, the NOC provides real-time situational awareness and monitoring of the homeland, coordinates incidents and response activities, and, in conjunction with other DHS components, issues advisories and bulletins concerning threats to homeland security, including natural disasters, as well as specific protective measures. Information on domestic incident management is shared with state Fusion Centers and Emergency Operations Centers (EOC) at all levels through Watch Officer Desks located in the NOC.

The purpose of this system is to:

1. *Collect, plan, coordinate, and analyze* all-threats and all-hazards, law enforcement activities, intelligence activities, man-made disasters and acts

of terrorism, natural disasters, and other information collected or received from Federal, State, local, tribal, and territorial agencies and organizations; foreign governments and international organizations; domestic security and emergency management officials; and private sector entities or individuals; and

2. *Report, integrate, and fuse* such information throughout DHS in order to share information, increase coordination, identify and assess the nature and scope of information and understand risks in light of potential or actual vulnerabilities to the homeland; and help deter, detect, and prevent terrorist acts as well as to prepare for, respond to, and recover from all-threats and all-hazards, man-made disasters and acts of terrorism, and natural disasters.

DHS is authorized to implement this program primarily through 5 U.S.C. 301, 552, 552a; 44 U.S.C. 3101; 6 U.S.C. 121; §§ 201 and 514 of the Homeland Security Act of 2002, as amended; § 520 of the Post Katrina Emergency Management Reform Act; 44 U.S.C. 3101; Executive Order (E.O.) 12958; E.O. 9397; E.O. 12333; E.O. 13356; E.O. 13388; and Homeland Security Presidential Directive 5. This system has an effect on individual privacy that is balanced by the need to collect, plan, coordinate, report, analyze, and fuse homeland security information coming into and going out of OPS, including the NOC. Routine uses contained in this notice include sharing with the Department of Justice (DOJ) for legal advice and representation; to a congressional office at the request of an individual; to the National Archives and Records Administration (NARA) for records management; to contractors in support of their contract assignment to DHS; to appropriate Federal, State, tribal, local, international, foreign agency, or other appropriate entity including the privacy sector in their role aiding OPS in their mission; to agencies, organizations or individuals for the purpose of audit; to agencies, entities, or persons during a security or information compromise or breach; to an agency, organization, or individual when there could potentially be a risk of harm to an individual; and to the news media in the interest of the public. A review of this system is being conducted to determine if the system of records collects information under the Paperwork Reduction Act (PRA).

Consistent with DHS’s information sharing mission, information contained in the DHS/OPS—003 Collection, Planning, Coordination, Reporting, Analysis, and Fusion System of Records

may be shared with other DHS components, as well as appropriate Federal, State, local, tribal, territorial, foreign, or international government agencies. This sharing will only take place after DHS determines that the receiving component or agency has a verifiable need to know the information to carry out national security, law enforcement, immigration, intelligence, or other functions consistent with the routine uses set forth in this system of records notice.

The information within this system that meets the functional standard of the National Suspicious Activity Reporting Initiative will be placed into the DHS/ALL—031 Information Sharing Environment Suspicious Activity Reporting Initiative (September 10, 2010, 75 FR 55335).

DHS is issuing a Notice of Proposed Rulemaking concurrent with this system of records elsewhere in the **Federal Register**. This newly established system will be included in DHS’ inventory of record systems.

II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates individuals’ records. The Privacy Act applies to information that is maintained in a “system of records.” A “system of records” is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the Federal Register a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency record keeping practices transparent, to notify individuals regarding the uses to their records are put, and to assist individuals to more easily find such files within the

agency. Below is the description of the DHS/OPS—003 Collection, Planning, Coordination, Reporting, Analysis, and Fusion System of Records.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this system of records to the Office of Management and Budget and to Congress.
