

the Executive Order to include regulations that have “substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.”

This action does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132. This rule simply extends the date for EPA to take action on a petition and does not impose any new obligations or enforceable duties on any State, local or Tribal governments or the private sector. Thus, Executive Order 13132 does not apply to this rule.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have Tribal implications as specified in Executive Order 13175 (65 FR 67249, November 9, 2000). It will not have substantial direct effects on Tribal governments, on the relationship between the Federal government and Indian Tribes, or on the distribution of power and responsibilities between the Federal government and Indian Tribes, as specified in Executive Order 13175. This action does not significantly or uniquely affect the communities of Indian Tribal governments. As discussed above, this action imposes no new requirements that would impose compliance burdens. Accordingly, the requirements of Executive Order 13175 do not apply to this rule.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

This action is not subject to EO 13045 (62 FR 19885, April 23, 1997) because the Agency does not believe the environmental health risks or safety risks addressed by this action present a disproportionate risk to children. This action is not subject to executive Order 13045 because it does not establish an environmental standard intended to mitigate health or safety risks. This rule simply extends the deadline for EPA to take action on a petition and does not impose any regulatory requirements.

H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This action is not a “significant energy action” as defined in Executive Order

13211 (66 FR 28355 (May 22, 2001)), because it is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Further, we have concluded that this rule is not likely to have any adverse effects because this action simply extends the deadline for EPA to take action on a petition.

I. National Technology Transfer and Advancement Act

Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (“NTTAA”), Public Law 104–113, 12(d) (15 U.S.C. 272 note) directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (*e.g.*, materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. NTTAA directs EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards.

This action does not involve technical standards. Therefore, EPA did not consider the use of any voluntary consensus standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

Executive Order 12898 (59 FR 7629 (Feb. 16, 1994)) establishes Federal executive policy on environmental justice. Its main provision directs Federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of its programs, policies, and activities on minorities and low-income populations in the United States.

The EPA has determined that this final rule will not have disproportionately high and adverse human health or environmental effects on minority or low-income populations because it simply extends the deadline for EPA to take action on a petition and does not impose any regulatory requirements.

K. Congressional Review Act

The Congressional Review Act (CRA), 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides

that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. Section 808 of the CRA provides an exception to this requirement. For any rule for which an agency for good cause finds that notice and comment are impracticable, unnecessary, or contrary to the public interest, the rule may take effect on the date set by the Agency. The EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

L. Judicial Review

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 18, 2011. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (*See* section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Administrative practice and procedure, Air pollution control, Electric utilities, Incorporation by reference, Intergovernmental relations, Reporting and recordkeeping requirements, Sulfur dioxide.

Dated: November 10, 2010.

Lisa P. Jackson,
Administrator.

BILLING CODE 6560–50–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 67

[Docket ID FEMA–2010–0003]

Final Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Final rule.

SUMMARY: Base (1% annual-chance) Flood Elevations (BFEs) and modified BFEs are made final for the communities listed below. The BFEs and modified BFEs are the basis for the floodplain management measures that each community is required either to adopt or to show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The date of issuance of the Flood Insurance Rate Map (FIRM) showing BFEs and modified BFEs for each community. This date may be obtained by contacting the office where the maps are available for inspection as indicated in the table below.

ADDRESSES: The final BFEs for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the table below.

FOR FURTHER INFORMATION CONTACT: Roy E. Wright, Deputy Director, Risk Analysis Division, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646-3461, or (e-mail) roy.e.wright@dhs.gov.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final determinations listed below for the modified BFEs for each community listed. These modified elevations have been published in newspapers of local circulation and ninety (90) days have elapsed since that publication. The Deputy Federal Insurance and Mitigation Administrator has resolved any appeals resulting from this notification.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR part 67. FEMA has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR part 60.

Interested lessees and owners of real property are encouraged to review the proof Flood Insurance Study and FIRM available at the address cited below for each community. The BFEs and modified BFEs are made final in the communities listed below. Elevations at selected locations in each community are shown.

National Environmental Policy Act. This final rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Consideration. An environmental impact assessment has not been prepared.

Regulatory Flexibility Act. As flood elevation determinations are not within the scope of the Regulatory Flexibility

Act, 5 U.S.C. 601-612, a regulatory flexibility analysis is not required.

Regulatory Classification. This final rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 13132, Federalism. This final rule involves no policies that have federalism implications under Executive Order 13132.

Executive Order 12988, Civil Justice Reform. This final rule meets the applicable standards of Executive Order 12988.

List of Subjects in 44 CFR Part 67

Administrative practice and procedure, Flood insurance, Reporting and recordkeeping requirements.

■ Accordingly, 44 CFR part 67 is amended as follows:

PART 67—[AMENDED]

■ 1. The authority citation for part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.*; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 67.11 [Amended]

■ 2. The tables published under the authority of § 67.11 are amended as follows:

State	City/town/county	Source of flooding	Location	* Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground ^ Elevation in meters (MSL) Modified

BILLING CODE 9110-12-P

DEPARTMENT OF COMMERCE**National Oceanic and Atmospheric Administration****50 CFR Part 648****[Docket No. 0907301205–0289–02]****RIN 0648–XA039****Fisheries of the Northeastern United States; Atlantic Herring Fishery; Temporary Removal of 2,000-lb (907.2 kg) Herring Trip Limit in Atlantic Herring Management Area 1A****AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.**ACTION:** Temporary rule.

SUMMARY: NMFS announces a temporary removal of the 2,000-lb (907.2 kg) trip limit for the Atlantic herring fishery in Management Area 1A (Area 1A). The trip limit removal is because catch data indicate that 95 percent of the total allowable catch (TAC) threshold in Area 1A has not been fully attained. Vessels issued a Federal permit to harvest Atlantic herring may resume fishing for and landing herring, in amounts greater than 2,000 lb (907.2 kg), consistent with their respective Atlantic herring permit categories, effective 0001 hrs, November 15, 2010, through 0001 hrs, November 17, 2010. At 0001 hrs, November 17, 2010, vessels will again be prohibited from fishing for, catching, possessing, transferring, or landing more than 2,000 lb (907.2 kg) of Atlantic herring per trip or calendar day.

DATES: Effective 0001 hours, November 15, 2010, through 0001 hours, November 17, 2010.

FOR FURTHER INFORMATION CONTACT: Lindsey Feldman, Fishery Management Specialist, 978–675–2179.

SUPPLEMENTARY INFORMATION:

Regulations governing the Atlantic herring fishery are found at 50 CFR part 648. The regulations require annual specification of optimum yield, domestic and foreign fishing, domestic and joint venture processing, and management area TACs. Final herring specifications for 2010–2012 published on August 12, 2010 (75 FR 48874). The 2010 total TAC is 91,200 mt, allocated to the herring management areas as follows: 26,546 mt to Area 1A, 4,362 mt to Area 1B; 22,146 mt to Area 2; and 38,146 mt to Area 3.

Regulations at § 648.201(a) require NMFS to monitor catch from the herring fishery in each of the herring management areas, using dealer reports, state data, and other available information, to determine when the catch of herring is projected to reach 95 percent of the TAC allocated. When such a determination is made, NMFS is required to prohibit, through publication in the **Federal Register**, herring vessel permit holders from fishing for, catching, possessing, transferring, or landing more than 2,000 lb (907.2 kg) of herring, per trip or calendar day, in or from the specified management area for the remainder of the closure period, with the exception of transiting as described below.

NMFS filed a temporary rule, effective November 8, 2010, in the **Federal Register**, projecting that 95 percent of the Area 1A TAC had been harvested. Based upon information indicating that 95 percent of the TAC would be reached by November 8, 2010, the temporary rule reduced the herring trip limit for all federally permitted herring vessels to 2,000 lb (907.2 kg) per trip in Area 1A; the trip limit reduction was effective through December 31, 2010.

The NMFS Northeast Regional Administrator has since determined, based upon the latest dealer reports and other available information, that the herring fleet has not yet taken 95 percent of the TAC as of November 8, 2010, and that there is approximately 5,000 mt of Atlantic herring quota still available in Area 1A. Therefore, to ensure that the herring fleet is able to take up to 95 percent of the TAC, consistent with applicable regulations and trip limits, this action temporarily removes the 2,000-lb (907.2 kg) trip limit implemented on November 8, 2010, and restores the trip limits, if any, in effect before November 8, 2010, until 0001 hrs November 17, 2010. This means that effective 0001 hrs, November 15, 2010, through 0001 hrs, November 17, 2010, vessels issued an All Areas Limited Access Herring Permit are authorized to fish for, possess, or land Atlantic herring with no possession restrictions; vessels issued an Areas 2 and 3 Limited Access Herring Permit are authorized to fish for, possess, or land Atlantic herring only if issued an open access herring permit or a Limited Access Incidental Catch Permit; vessels issued a Limited Access Incidental Catch Herring Permit are authorized to fish for, possess, or land up to 55,000 lb (25 mt); and vessels issued an open

access herring permit may not fish for, possess, or land more than 6,600 lb (3 mt) or Atlantic herring in Area 1A.

At 0001 hrs November 17, 2010, all federally permitted herring vessels will again be prohibited from fishing for, catching, possessing, transferring, or landing more than 2,000 lb (907.2 kg) of herring, per trip or calendar day, in or from Area 1A, through December 31, 2010. Vessels transiting Area 1A with more than 2,000 lb (907.2 kg) of herring on board may do so, provided such herring was not caught in Area 1A and that all fishing gear is stowed and not available for immediate use, as required by § 648.23(b).

Effective 0001 hrs, November 15, 2010, federally permitted dealers are advised that they may purchase more than 2,000 lb (907.2 kg) of Atlantic herring caught in Area 1A by federally permitted vessels until 0001 hrs November 17, 2010. At 0001 hrs November 17, 2010, federally permitted dealers will again be prohibited from purchasing herring from federally permitted herring vessels that harvest more than 2,000 lb (907.2 kg) of herring from Area 1A, through 2400 hrs local time, December 31, 2010.

Classification

This action is taken under 50 CFR part 648 and is exempt from review under E.O. 12866.

The Assistant Administrator for Fisheries, NOAA (AA), finds good cause pursuant to 5 U.S.C. 553(b)(B) to waive prior notice and the opportunity for public comment because it would be contrary to the public interest. This action temporarily removes the 2,000-lb (907.2 kg) herring trip limit in Area 1A from November 15 until November 17, 2010. As of 0001 hrs November 17, 2010, the Area 1A trip limit will again be reduced to 2,000 lb (907.2 kg) per trip or calendar day, until December 31, 2010. The Atlantic herring fishery opened for the 2010 fishing year at 0001 hrs on January 1, 2010. The Atlantic herring fleet was prohibited from fishing for, catching, possessing, transferring, or landing more than 2,000 lb (907.2 mt) per trip or calendar day on November 8, 2010, based on projections that 95 percent of the available Area 1A herring quota had been harvested. Catch data indicating the Atlantic herring fleet did not harvest the full amount of available quota have only very recently become available. If implementation of this temporary removal of the 2,000-lb (907.2 kg) trip limit is delayed to solicit
