[Project No. 12807-001]

BPUS Generation Development, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

November 10, 2010.

On October 4, 2010, BPUS Generation Development, LLC filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Mulqueeney Ranch Pumped Storage Project to be located on property known as Mulqueeney Ranch, near the City of Tracy, in Alameda County, California.

The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The project would consist of the following: (1) A proposed upper impoundment having a surface area of about 52 acres and a normal water surface elevation of 1,640 feet mean sea level; (2) a proposed lower impoundment having a surface area of about 40 acres and a normal surface area of 940 feet mean sea level; (3) a proposed waterway connecting the upper impoundment to the lower impoundment; (4) a proposed powerhouse containing two generator units with a total installed capacity of 280 megawatts; (5) a proposed 1.75-mile-long, 230- or 500-kilovolt transmission line; and (6) appurtenant facilities. The proposed project would have an estimated annual generation of about 368 gigawatt-hours (GWh) and a pumping energy requirement of about 472 GWh. The applicant plans to sell the generated energy to a local utility.
