Drawbridge Operation Regulation; Upper Mississippi River, Dubuque, IA

AGENCY: Coast Guard, DHS.

ACTION: Notice of temporary deviation from regulations.

SUMMARY: The Commander, Eighth Coast Guard District, has issued a temporary deviation from the regulation governing the operation of the Illinois Central Railroad Drawbridge across the Upper Mississippi River, mile 579.9, at Dubuque, Iowa. The deviation is necessary to allow the bridge owner time for preventive maintenance. The Illinois Central Railroad Drawbridge currently operates in accordance with 33 CFR 117.5, which states the general requirement that drawbridges shall open promptly and fully for the passage of vessels when a request to open is given in accordance with the subpart.

There are no alternate routes for vessels transiting this section of the Upper Mississippi River.

Winter conditions on the Upper Mississippi River coupled with the closure of Army Corps of Engineer’s Lock No. 20 (Mile 343.2 UMR), Lock No. 21 (Mile 324.9 UMR) and Lock No. 22 (Mile 301.2 UMR) until 4:30 p.m., March 4, 2011 will preclude any significant navigation demands for the drawspan opening.

The Illinois Central Railroad Drawbridge, in the closed-to-navigation position, provides a vertical clearance of 19.9 feet above normal pool. Navigation on the waterway consists primarily of commercial tows and recreational watercraft. The drawbridge will open if at least 24 hours advance notice is given. This temporary deviation has been coordinated with waterway users. No objections were received.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular...

Traffic Separation Schemes: In the Strait of Juan de Fuca and Its Approaches; in Puget Sound and Its Approaches; and in Haro Strait, Boundary Pass, and the Strait of Georgia

AGENCY: Coast Guard, DHS.

ACTION: Interim rule with request for comments.

SUMMARY: In this interim rule with request for comments, the Coast Guard codifies traffic separation schemes in the Strait of Juan de Fuca and its approaches, in Puget Sound and its approaches, and in Haro Strait, Boundary Pass, and the Strait of Georgia. These traffic separation schemes (TSSs) were validated by a Port Access Route Study (PARS) conducted under the Ports and Waterways Safety Act (PWSA), 33 U.S.C. 1221–1232 and were adopted by the International Maritime Organization (IMO). They have been shown on National Oceanic and Atmospheric Administration (NOAA) charts since 2006, and are currently documented in the IMO publication “Ships’ Rerouting,” Ninth Edition, 2008.

Codifying these internationally recognized traffic separation schemes provides better routing order and predictability, increases maritime safety, and reduces the potential for collisions, groundings, and hazardous cargo spills.

The Coast Guard is issuing this interim rule with a request for comments to permit the public to comment on changes made to some geographic positions located in Haro Strait, Boundary Pass, and the Strait of Georgia that were made after the notice of proposed rulemaking (NPRM).
