Title: Standard Numbering System for Undocumented Vessels.

OMB Control Number: 1625-0108.

Summary: The Standard Numbering System (SNS) collects information on undocumented vessels and vessel owners operating on waters subject to the jurisdiction of the United States. Federal, State, and local law enforcement agencies use information daily or as warranted from the system for enforcement of boating laws or theft and fraud investigations. Since the September 11, 2001 terrorist attacks on the United States, the need has increased for identification of undocumented vessels to meet port security and other missions to safeguard the homeland.

Need: Subsection 12301(a) of Title 46, United States Code, requires undocumented vessels equipped with propulsion machinery of any kind to be numbered in the State where the vessel is principally operated. Title 46 U.S.C. 12302(a) authorized the Secretary to prescribe, by regulation, a SNS that may be implemented by the States to perform this function on behalf of the Federal Government. The Secretary shall approve a State numbering system that is consistent with the SNS. The Secretary has delegated his authority under 46 U.S.C. 12301 and 12302 to the Coast Guard (DHS Delegation No. 0170.1). Regulations requiring the numbering of undocumented vessels are in 33 CFR part 173; those establishing the SNS for States to voluntarily carry out this function are contained in part 174. For States that do not have an approved system, the Coast Guard

administers vessel numbering. Currently, all 56 States and Territories have approved numbering systems. The approximate number of undocumented vessels registered by the States in 2009 was nearly 13 million. States submit reports annually to the Coast Guard on the number, size, construction, etc., of vessels they have numbered. This information is used by the Coast Guard in (1) publication of an annual "Boating Statistics" report required by 46 U.S.C. 6102(b), and (2) for allocation of Federal funds to assist States in carrying out the Recreational Boating Safety (RBS) Program established by 46 U.S.C. chapter 131. When encountering a vessel suspected of illegal activity, information from the SNS increases safety by assisting boarding officers in determining how best to approach a vessel. Since, the September 11, 2001 terrorist attacks on the United States, the need has increased for identification of undocumented vessels and their owners for port security and other missions to safeguard the homeland; this statutory requirement dates back to 1918.

Forms: None.

Respondents: Owners of all undocumented vessels propelled by machinery. "Owners" may include individuals or households, non-profit organizations, and small businesses (e.g., liveries that offer recreational vessels for rental by the public) or other for-profit organizations.

Frequency: On occasion.

Burden Estimate: The estimated burden remains the same at 286,458 hours a year.

Dated: November 10, 2010.

R.E. Day,

Rear Admiral, U.S. Coast Guard, Assistant Commandant for Command, Control, Communications, Computers and Information Technology.
