

occupational training and workforce services for workers aged 55 and older. The evaluation will examine implementation of the grants, document the types of interventions, assess attributes of these treatments, estimate their success in helping aging workers become or remain employed, and discuss the potential for implementation of various methods in the broader workforce system.

Office of Management and Budget (OMB) clearance of the information collection is needed since it will involve (1) two rounds of site visits with the ten grantees, (2) phone reconnaissance with the ten grantees, and (3) additional participant-level data, beyond what is needed for the OMB-approved quarterly and Common Measures reporting requirements for High Growth Job Training Grants (as required for the AWI grants). The additional data is needed to understand in greater detail the characteristics of participants, the services provided to them, and the linkages among different programs in providing services. Each grantee will also need to provide the participant data to the evaluation contractor on two

occasions, using a secure FTP site or by CD, at the grantee's discretion.

II. Review Focus

The U.S. Department of Labor is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
