Scoping: Preliminary Issues, Concerns, and Opportunities

We have identified preliminary issues, concerns, and opportunities that we may address in the CCP. We have briefly summarized these issues below. During public scoping, we may identify additional issues.

Ecoregional Issues

- Potential impacts of climate change

Habitat Issues

- Bottomland Hardwood habitat maintenance and restoration
- Timber harvesting
- Using fire on the landscape for habitat restoration and maintenance
- Property transfer from the Department of the Army and subsequent contaminant issues

Wildlife Issues

- Migratory waterfowl and neotropical migrants using the Refuge as a stopover and/or nesting site
- Refuge hunts for population management of White-tailed Deer
- Construction/maintenance of bat, wood duck, and bluebird boxes for nesting purposes

Public Use Opportunities and Access

- Identification, construction, and maintenance of wildlife observation trail(s) and auto-tour loop(s)
- Develop/Increase participation of Caddo Lake NWR friends group

Facilities

- Remodel or replace current Refuge headquarters (currently an old U.S. Army office building)
- Identify location and construct Refuge Fire Station Facilities (currently co-located in the Refuge shop and bunkhouse)
- Identify location and construct Refuge Visitor Center and Classroom Building (currently located in an old FEMA Trailer)

Public Meetings

We will give the public an opportunity to provide input at a public meeting (or meetings). You can obtain the schedule from the planning team leader or project leader (see **ADDRESSES**). You may also send comments anytime during the planning process by U.S. mail, e-mail, or fax (see **ADDRESSES**). There will be additional opportunities to provide public input once we have prepared a draft CCP.

Public Availability of Comments

Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: September 30, 2010.

Endangered and Threatened Wildlife and Plants; Assisting States, Federal Agencies, and Tribes in Managing White-Nose Syndrome in Bats; Draft National Plan; Extension of Public Comment Period

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; extension of comment period.

SUMMARY: We, the U.S. Fish and Wildlife Service (FWS), are extending the public comment period for the draft national plan to assist States, Federal agencies, and Tribes in managing white-nose syndrome (WNS) in bats. See **SUPPLEMENTARY INFORMATION** for details. If you have already submitted comments, please do not resubmit them; we have already incorporated them in the public record and will fully consider them in our final decision.

DATES: Submit comments on this document on or before December 26, 2010.

ADDRESSES: Send your written comments on the draft plan, by U.S. mail to Dr. Jeremy Coleman, National WNS Coordinator, U.S. Fish and Wildlife Service, New York Field Office, 3817 Luker Road, Cortland, New York 13045; or by electronic mail to WhiteNoseBats@fws.gov.

FOR FURTHER INFORMATION CONTACT: Dr. Jeremy Coleman, National WNS Coordinator, at the New York Field Office (see **ADDRESSES**) or by phone at 607-753-9334.

SUPPLEMENTARY INFORMATION: On October 28, 2010, we published a **Federal Register** notice (75 FR 66387) announcing availability for public review of a draft national plan to assist States, Federal agencies, and Tribes in managing WNS in bats. That notice mistakenly announced a 33-day public comment period instead of a 60-day public comment period. We are extending the public comment period on the draft plan to the originally planned 60 days.

WNS is a fungal disease responsible for unprecedented mortality in hibernating bats in the northeastern United States. It has spread rapidly since its discovery in January 2007, and poses a potentially catastrophic threat to hibernating bats throughout North America, including several species listed as endangered or threatened under the Endangered Species Act (ESA). Listed bats include the Indiana bat (*Myotis sodalis*), Virginia big-eared bat (*Corynorhinus townsendii virginianus*), Ozark big-eared bat (*Corynorhinus townsendii ingens*), and gray bat (*Myotis grisescens*).

The draft plan was prepared by representatives of the U.S. Department of Agriculture's Animal and Plant Health Inspection Service and Forest Service; U.S. Department of Defense's Army Corps of Engineers; U.S. Department of the Interior's Bureau of Land Management, National Park Service, and FWS; St. Regis Mohawk Tribe; Kentucky Department of Fish and Wildlife Resources; Missouri Department of Conservation; New York State Department of Environmental Conservation; Pennsylvania Game Commission; Vermont Department of Fish and Wildlife; and Virginia Department of Game and Inland Fisheries.

Document Availability

An electronic copy of the draft plan is available online at <http://www.fws.gov/WhiteNoseSyndrome/>. The document is also available from the FWS's New York Field Office (see **ADDRESSES**).

Public Availability of Comments

Before including your address, phone number, electronic mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority

As a number of federally listed bat species are threatened by WNS, the FWS is issuing this notice primarily under the authority of the ESA of 1973 (16 U.S.C. 1531). This plan is intended to guide recovery of listed bats. It was developed so that it can be easily adopted or incorporated into existing or future recovery plans.
