**SUPPLEMENTARY INFORMATION:**

**I. Background**

The Energy Employees Occupational Illness Compensation Program Act of 2000, as amended (42 U.S.C. 7384 *et seq.*), was originally enacted on October 30, 2000, and primary responsibility for administration of EEOICPA was assigned to the Department of Labor (DOL) by Executive Order 13179 (65 FR 77487). In section 2(c)(vii) of that Executive Order, DOE was directed to "publish in the **Federal Register** a list of atomic weapons employer facilities within the meaning of section [7384l(5)] of the Act, Department of Energy employer facilities within the meaning of section [7384l(12)] of the Act, and a list of facilities owned and operated by a beryllium vendor, within the meaning of section [7384l(6)] of the Act." Pursuant to this direction, DOE published a list of all three types of facilities covered under EEOICPA on January 17, 2001 (66 FR 4003), and subsequently revised and republished

the entire list on June 11, 2001 (66 FR 31218), December 27, 2002 (67 FR 79068), July 21, 2003 (68 FR 43095) and August 23, 2004 (69 FR 51825). In subsequent notices published on November 30, 2005 (70 FR 71815), June 28, 2007 (72 FR 35448), April 9, 2009 (74 FR 16191) and August 3, 2010 (75 FR 45608), DOE further revised the August 23, 2004 list of all three types of covered facilities by formally removing a total of twelve Atomic Weapons Employer (AWE) facilities without republishing the list in its entirety.

Following the amendments to EEOICPA that were enacted as subtitle E of Title XXXI of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005, Public Law 108-375, 118 Stat. 1811, 2178 (October 28, 2004), DOL promulgated final regulations governing its expanded responsibilities under EEOICPA on December 29, 2006 (71 FR 78520). One of those regulations, 20 CFR 30.5(x)(2), indicates that DOL has adopted the list of DOE facilities that was published by DOE on August 23, 2004, and notes that "DOL will periodically update this list as it deems appropriate in its sole discretion by publishing a revised list of covered [DOE] facilities in the **Federal Register**." In making these updates, § 30.5(x)(1) specifies that the Director of OWCP is solely responsible for determining if a particular work site under consideration meets the definition of a *Department of Energy facility*. This sole responsibility is derived from the grant of primary authority to DOL to administer the EEOICPA claims process contained in section 2(a)(i) of Executive Order 13179.

**II. Purpose**

Since OWCP last published a notice listing all DOE facilities covered under EEOICPA in the **Federal Register** on June 23, 2009, the Director of OWCP has determined, in connection with claims filed under EEOICPA, that three additional work sites meet the statutory definition of a *Department of Energy facility*. These determinations are briefly described in this **SUPPLEMENTARY INFORMATION** and are memorialized in the two updated lists of DOE facilities published today. The new work sites determined by the Director to be DOE facilities are the High Energy Rate Forging Facility in Oxnard, California, the St. Louis Airport Storage Site in St. Louis, Missouri, and the B & T Metals facility in Columbus, Ohio. In addition, the names of two facilities that appeared on OWCP's prior notice have been clarified in this publication. The facility listed as the Iowa Ordnance Plant (Iowa Army Ammunition Plant) on the prior notice now appears as the Iowa

Ordnance Plant (Line 1 and Associated Activities) in this notice, and the Metallurgical Laboratory, University of Chicago (Eckert Hall, Jones Laboratory, Kent Laboratory and Ryerson Hall) now appears as the Metallurgical Laboratory, University of Chicago (Eckhart Hall, Jones Laboratory and Ryerson Hall only). These clarifications do not have any effect on the status of this work sites, and are only intended to more precisely identify the facilities in question.

By updating the two lists found below, OWCP is presenting the public with the most current listing of DOE facilities in order to assist potential claimants and their families. OWCP is continuing its efforts in this area as it adjudicates claims filed under EEOICPA, and further revisions of these lists should be expected. Although DOE maintains a Web site (<http://www.hss.energy.gov/healthsafety/fwsp/advocacy/faclist/findfacility.cfm>) that provides information on AWE facilities, Beryllium Vendor facilities and DOE facilities to the public, the information on that Web site regarding DOE facilities should not be relied upon as it may not be up to date, nor is it binding on OWCP in its adjudication of claims filed under EEOICPA. Instead, OWCP is solely authorized to give the public notice of the Director's determinations regarding DOE facilities.

**III. Introduction to the Lists**

The five complete lists previously published by DOE included all three types of work sites described in Executive Order 13179, *i.e.*, AWE facilities, Beryllium Vendor facilities, and DOE facilities. However, the lists published on June 23, 2009 and again today by OWCP only include work sites that meet the definition of a *Department of Energy facility* found at section 7384l(12) of EEOICPA, because the authority to designate AWE facilities and Beryllium Vendor facilities has been granted to DOE, not DOL, pursuant to section 7384l(4)(B) of EEOICPA and section 2(c)(iv) of Executive Order 13179. However, since some work sites can meet the definition of more than just one type of covered work site during either consecutive or concurrent time periods, simply presenting one list of DOE facilities (without also differentiating among them in some easily understood fashion) could lead the reader to wrongly conclude that a listed work site has always been a DOE facility when, in fact, it only had that status during a brief period. To lessen the potential for this type of misunderstanding, OWCP has decided

to continue its practice of presenting two separate lists of DOE facilities.

The first list consists exclusively of work sites that have only been DOE facilities for purposes of coverage under EEOICPA, and the second list consists of work sites that have also been at least one other type of covered work site in addition to a DOE facility. To see what other types of covered work sites the DOE facilities appearing in the second list are or have been, readers can refer to the **Federal Register** notices published by DOE on August 23, 2004 (69 FR 51825), November 30, 2005 (70 FR 71815), June 28, 2007 (72 FR 35448), April 9, 2009 (74 FR 16191) and August 3, 2010 (75 FR 45608). Since coverage

under EEOICPA for DOE facilities is limited to periods during which “operations” were performed by or on behalf of DOE (or its predecessor agencies), and when DOE (or its predecessor agencies) either had a proprietary interest in the site or had entered into a particular type of contract with an entity at the site, the lists below include date ranges during which covered employment at each site could have been performed. These date ranges, however, are not considered binding on OWCP in its adjudication of individual claims under EEOICPA and are presented in this notice for the sole purpose of informing the public of the

current results of OWCP’s research into the operational histories of these work sites, some of which extend back to the establishment of the Manhattan Engineer District of the U.S. Army Corps of Engineers on August 13, 1942. OWCP’s efforts in this area are continuing, and it expects that the date ranges included in this notice will change with the publication of future notices. DOE facilities appearing on the lists that have undergone environmental remediation at the direction of or directly by DOE are identified by the following symbol—†—after the date range during which such environmental remediation occurred.
