SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request for a new information collection.

In 2009, Atlantic salmon populations from the Androscoggin River in South Central Maine to the Dennys River in Eastern Maine were listed as Endangered under the Federal Endangered Species Act (ESA) (74 FR 29344, June 19, 2009). Dams were identified in the listing as a significant threat to the species survival and recovery. In order for recovery to occur, Atlantic salmon must have access to sufficient adult spawning habitat and juvenile rearing habitat to support the continued existence of a recovered salmon population. In furtherance of recovery, the National Marine Fisheries Service (NMFS) proposes to conduct a survey of dam owners.

This survey will allow NMFS to identify owners of non-Federal Energy Regulatory Commission (FERC) regulated dams and present to them opportunities to participate in programs that will aid them in complying with
