Title: Electric System Emergency Restoration Plan.

OMB Control Number: 0572-0140.

Type of Request: Extension of a currently approved collection.

Abstract: The term "critical infrastructure" is defined in section 1016(e) of the USA Patriot Act of 2001 (42 U.S.C. 5195c(e)) as "systems and assets, whether physical or virtual, so vital to the United States that the incapacity or destruction of such systems and assets would have a debilitating impact on security, national economic security, national public health or safety, or any combination of those matters." Electric power systems have been identified in Presidential Decision Directive 63 (PDD-63) as one of the critical infrastructures of the United States.

A substantial portion of the electric infrastructure of the United States resides in, and is maintained by, rural America. RUS is uniquely coupled with the electric infrastructure of rural America and its electric borrowers serving rural America. To ensure that the electric infrastructure in rural America is adequately protected, RUS requires that all electric borrowers conduct a Vulnerability and Risk Assessment (VRA) of their respective systems and utilize the results of this assessment to enhance an existing Emergency Restoration Plan (ERP) or create an ERP.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average .5 hours per response.

Respondents: Not-for-profit institutions.

Estimated Number of Respondents: 676.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 338 hours.

Copies of this information collection can be obtained from MaryPat Daskal, Program Development and Regulatory Analysis, at (202) 720-7853, FAX: (202) 720-8435.
