

This could fragment the market and dilute the liquidity of economically identical products. The Exchange has represented, however, that it will not list more than one Credit Default Option contract with a cash settlement value that has been arrived at in multiple ways.⁹ The Commission's approval of this aspect of the proposal incorporates that representation.¹⁰

Finally, the Commission believes that the proposal to use an MPV of as little as \$0.01 for all Credit Options is consistent with the Act. With exercise settlement values as low as \$1, the ability to set the MPV at \$0.01 would make available 100 price points for quoting bids and offers in the range of \$0 to \$1, as opposed to only 20 price points under the current MPV of \$0.05. The CBOE has represented that it has analyzed its capacity and believes that it and the Options Price Reporting Authority have the necessary systems capacity to handle the additional traffic associated with the ability to designate \$0.01 as the MPV for Credit Options; and that the Exchange believes that the change will not lead to a proliferation of quotes and thus do not have multiple series with different strike prices, because Credit Options do not have strike prices.¹¹

IV. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,¹² that the proposed rule change (SR-CBOE-2010-046), be, and it hereby is, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹³

Elizabeth M. Murphy,
Secretary.
