SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC (the Commission) is
considering issuance of an amendment
to Early Site Permit (ESP) number ESP-
003, issued to Virginia Electric and
Power Company doing business as
Dominion Virginia Power, and Old
Dominion Electric Cooperative for the
North Anna site located near Louisa,
Virginia.

The proposed amendment would
delete ESP permit condition 3.G, which
prescribes the notification conditions
associated with the implementation of

certain activities authorized by the
permit. Specifically, permit condition
3.G requires the permit holder to notify
the NRC Regional Administrator for
Region II and the operator of North
Anna Power Station at least 120 days
before the commencement of certain
activities described in Appendix E of
the permit, the Site Redress Plan.
Condition 3.G also states that the permit
holder will certify in the notification
that it has obtained all other permits,
licenses, and certifications required for
those activities. The proposed
amendment eliminates the notifications
by deleting the condition in its entirety.

Before issuance of the proposed
license amendment, the Commission
will have made findings required by the
Atomic Energy Act of 1954, as amended
(the Act) and the Commission's
regulations.

The Commission has made a
proposed determination that the
amendment request involves no
significant hazards consideration. Under
the Commission's regulations in Title 10
of the Code of Federal Regulations,
Section 50.92, this means that
performance of site preparation and
preliminary construction activities
described in site redress plan at the
North Anna ESP site in accordance with
the proposed amendment would not
(1) Involve a significant increase in the
probability or consequences of an
accident previously evaluated; (2) create
the possibility of a new or different kind
of accident from any accident
previously evaluated; or (3) involve a
significant reduction in a margin of
safety.

As required by 10 CFR 50.91(a), the
applicant has provided its analysis of
the issue of no significant hazards
consideration, which is presented
below:

1. Does the proposed amendment involve
a significant increase in the probability or
consequences of an accident previously
evaluated?

Response: No.

The proposed amendment deletes ESP
condition 3.G, which prescribes the
notification conditions associated with the
implementation of activities authorized by
the permit. This change is administrative in
nature and does not affect the fabrication,
construction, or operation of any plant
structure, system, or component.

Therefore, the proposed ESP change does
not involve a significant increase in the
probability or consequences of an accident
previously evaluated.

2. Does the proposed amendment create
the possibility of a new or different kind of
accident from any accident previously
evaluated?

Response: No.

The proposed amendment deletes ESP
condition 3.G, which prescribes the
