Title: Online Skills Training for PCPs on Substance Abuse.

Type of Information Collection

Request: New.

Need and Use of Information

Collection: This research will evaluate the effectiveness of the Online Skills Training for PCPs on Substance Abuse, via the Web site *SBIRTTraining.com*, to positively impact the knowledge, attitudes, intended behaviors and clinical skills of primary care physicians in the US who treat substance abuse patients. The Online Skills Training for PCPs on Substance Abuse is a new program developed with funding from the National Institute on Drug Abuse. The primary goal is to assess the impact

of the training program on knowledge, attitude, intended behavior, and clinical skills. A secondary goal is to assess learner satisfaction with the program. If the program is a success, there will be a new, proven resource available to primary care physicians to improve their ability to assess and treat substance use disorders. In order to evaluate the effectiveness of the program, information will be collected from primary care physicians before exposure to the Web based materials (pre-test), after exposure to the Web based materials (post-test), and 4–6 weeks after the program has been completed (follow-up).

Frequency of Response: On occasion.

Affected Public: Primary care physicians who treat patients who have substance abuse.
