

Day	Event/Activity
20	Nuclear Regulatory Commission (NRC) staff informs the requestor of the staff's determination whether the request for access provides a reasonable basis to believe standing can be established and shows need for SUNSI. (NRC staff also informs any party to the proceeding whose interest independent of the proceeding would be harmed by the release of the information.) If NRC staff makes the finding of need for SUNSI and likelihood of standing, NRC staff begins document processing (preparation of redactions or review of redacted documents).
25	If NRC staff finds no "need" or no likelihood of standing, the deadline for requestor/petitioner to file a motion seeking a ruling to reverse the NRC staff's denial of access; NRC staff files copy of access determination with the presiding officer (or Chief Administrative Judge or other designated officer, as appropriate). If NRC staff finds "need" for SUNSI, the deadline for any party to the proceeding whose interest independent of the proceeding would be harmed by the release of the information to file a motion seeking a ruling to reverse the NRC staff's grant of access.
30	Deadline for NRC staff reply to motions to reverse NRC staff determination(s).
40	(Receipt +30) If NRC staff finds standing and need for SUNSI, deadline for NRC staff to complete information processing and file motion for Protective Order and draft Non-Disclosure Affidavit. Deadline for applicant/licensee to file Non-Disclosure Agreement for SUNSI.
A	If access granted: Issuance of presiding officer or other designated officer decision on motion for protective order for access to sensitive information (including schedule for providing access and submission of contentions) or decision reversing a final adverse determination by the NRC staff.
A + 3	Deadline for filing executed Non-Disclosure Affidavits. Access provided to SUNSI consistent with decision issuing the protective order.
A + 28	Deadline for submission of contentions whose development depends upon access to SUNSI. However, if more than 25 days remain between the petitioner's receipt of (or access to) the information and the deadline for filing all other contentions (as established in the notice of hearing or opportunity for hearing), the petitioner may file its SUNSI contentions by that later deadline.
A + 53	(Contention receipt +25) Answers to contentions whose development depends upon access to SUNSI.
A + 60	(Answer receipt +7) Petitioner/Intervenor reply to answers.
>A + 60	Decision on contention admission.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 040-08502, 040-09073, 030-38260; NRC-2010-0300]

Notice of the Nuclear Regulatory Commission Consent to Indirect Change of Control and Issuance of License Amendment to Materials License SUA-1341, SUA-1596, and 49-29384-01

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of approval of indirect change of control and issuance of license amendment.

FOR FURTHER INFORMATION CONTACT: Ron C. Linton, Project Manager, Uranium Recovery Licensing Branch, Decommissioning and Uranium Recovery Licensing Directorate, Division of Waste Management and Environmental Protection, Office of Federal and State Materials and Environmental Management Programs, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Telephone: (301) 415-7777; fax number: (301) 415-5369; e-mail: ron.linton@nrc.gov.

SUPPLEMENTARY INFORMATION: Pursuant to 10 CFR 2.106, the Nuclear Regulatory Commission (NRC) is providing notice of NRC consent to the indirect change of control and issuance of license

amendments to Materials License Numbers SUA-1341, SUA-1569, and 49-29384-01. Materials License SUA-1341 authorizes Uranium One USA, Inc., to possess uranium and byproduct material at its Irigaray and Christensen Ranch in situ recovery (ISR) project in Johnson and Campbell Counties, Wyoming. The project is currently in operating status, but is not producing uranium at this time. Materials License SUA-1569 authorizes Uranium One Americas, Inc., to possess uranium and byproduct material at its Moore Ranch ISR Project in Campbell County, Wyoming. The project was licensed on September 30, 2010, and is not producing uranium at this time. Materials License 49-29384-01 authorizes Uranium One Americas, Inc. to possess byproduct material—specifically, sealed source of hydrogen-3—in an amount not to exceed three (3) Curies (Ci) per source and 12 Ci in total for well logging.

By letter dated July 20, 2010, Uranium One, Inc., Uranium One USA, Inc. and Uranium One Americas, Inc. (collectively, "Uranium One") submitted an application and license amendment request for approval of an indirect change of control of Uranium One USA, Inc.'s Materials License SUA-1341 for its Irigaray and Christensen Ranch Project (Agencywide Documents Access and Management System (ADAMS) accession number ML102090404). The July 20, 2010 submittal also referenced Uranium One's materials license applications for Moore Ranch Project

(Docket No. 40-9073), Jab & Antelope Project (Docket No. 40-9079), and the Ludeman Project (Docket No. 40-9095) as being affected by the change of control. Subsequently, Materials License SUA-1596 was issued to Uranium One Americas, Inc. for its Moore Ranch Project on September 30, 2010. In a separate submittal dated June 23, 2010 (ML102100530), Uranium One submitted notification of an indirect change of control regarding its Materials License 49-29384-01. NRC has determined that the application constitutes a request for a license transfer and is collectively treating the July 20, 2010, and June 23, 2010, submittals as an application for the change of control of NRC licenses SUA-1341, SUA-1596 and 49-29384-01.

The indirect change of control is a result of a share purchase transaction, wherein JSC Atomredmetzoloto (ARMZ) (a Russian corporation) and its wholly owned subsidiaries Effective Energy N.V. (a Dutch limited liability company) and Uranium Mining Company (a Russian corporation), will acquire no less than 51 percent of Uranium One, Inc.'s (a Canadian Corporation) common shares. Uranium One, Inc. is the parent company of Uranium One USA, Inc. (a Delaware corporation) and Uranium One Americas, Inc. (a Nevada corporation), both NRC licensees. ARMZ is owned by JSC Atomenergoprom and JSC Atomenergoprom's wholly owned subsidiary JSC TVEL. JSC Atomenergoprom is a wholly owned

subsidiary of the Russian State Atomic Energy Corporation JSC ROSATOM (Rosatom). Approval of the proposed transaction will result in an indirect change of control of the licenses from Uranium One to Rosatom.¹

Notice of the application, and opportunity to request a hearing and submit comments for Materials License SUA-1341 and SUA-1596 was published in the **Federal Register** on September 20, 2010 (75 FR 57300) with a deadline for submitting a request for hearing of October 12, 2010, and a deadline for submitting comments of October 20, 2010. No requests for hearing were received; however, four comments were received. Notice of the application and opportunity to request a hearing for Materials License 49-29384-

01 was published on the NRC's public webpage on October 1, 2010, with a deadline for submitting a request for hearing of November 30, 2010. While the deadline for requesting a hearing for Materials License 49-29384-01 has not expired, 10 CFR 2.1316 directs the staff to promptly issue approval or denial of transfer requests consistent with staff's finding in the Safety Evaluation Report (SER).

By Order dated November 23, 2010, NRC approved the indirect transfer of control of NRC Materials Licenses SUA-1341, SUA-1596, and 49-29384-01. The Order was accompanied by a Safety Evaluation Report (SER) documenting the basis for the NRC staff's approval and a license amendment for each of the affected licenses. These actions comply

with the standards and requirements of the Atomic Energy Act of 1954, as amended, and NRC's rules and regulations.

FOR FURTHER INFORMATION CONTACT: In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," the details with respect to this action, including the SER and accompanying documentation, and license amendment, are available electronically at the NRC's Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html>. From this site, you can access the NRC's Agencywide Document Access and Management System (ADAMS), which provides text and image files of NRC's public documents. BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-282 and 50-306; NRC-2010-0324]

Northern States Power Company—Minnesota, Prairie Island Nuclear Generating Plant, Units 1 and 2; Exemption

1.0 Background

Northern States Power Company, a Minnesota corporation (NSPM, the licensee) is the holder of Facility Operating License Nos. DPR-42 and DPR-60, which authorize operation of the Prairie Island Nuclear Generating Plant, Units 1 and 2 (PINGP). The licenses provide, among other things, that the facility is subject to all rules, regulations, and orders of the Nuclear Regulatory Commission (NRC, the Commission) now or hereafter in effect.

The facility consists of two pressurized-water reactors located in Goodhue County in Minnesota.

2.0 Request/Action

Pursuant to Title 10 of the Code of Federal Regulations (10 CFR), § 50.12, "Specific exemptions," NSPM has, by

letter dated November 24, 2009, as supplemented by letter dated May 26, 2010 (Agencywide Documents Access and Management System Accession Nos. ML093280883 and ML101480083, respectively), requested an exemption from 10 CFR 50.46, "Acceptance criteria for emergency core cooling systems for light-water nuclear power reactors," and appendix K to 10 CFR part 50, "ECCS Evaluation Models," (appendix K). The regulations in 10 CFR 50.46 contain acceptance criteria for the emergency core cooling system (ECCS) for reactors fueled with zircaloy or ZIRLO™ cladding. In addition, appendix K to 10 CFR part 50 requires that the Baker-Just equation be used to predict the rates of energy release, hydrogen concentration, and cladding oxidation from the metal/water reaction. The Baker-Just equation assumed the use of a zirconium alloy different than Optimized ZIRLO™. The exemption request relates solely to the specific types of cladding material specified in these regulations. As written, the regulations presume the use of zircaloy or ZIRLO™ fuel rod cladding. Thus, an exemption from the requirements of 10 CFR 50.46 and Appendix K is needed to support the

¹ With respect to the remaining two pending license applications, Jab & Antelope Project (Docket No. 40-9079) and Ludeman Project (Docket No. 40-

9095), as a license has yet to be issued, the July 20, 2010, submittal will be treated as a revision to the information regarding the corporate identity of the

applicant that is contained in the respective license applications.
