SUPPLEMENTARY INFORMATION:

I. Abstract

Contractors performing research and development are required by statutes, NASA implementing regulations, and OMB policy to submit reports of inventions, patents, data, and copyrights, including the utilization and disposition of same. The NASA New Technology Summary Report reporting form is being used for this purpose.

II. Method of Collection

NASA FAR Supplement clauses for patent rights and new technology encourage the contractor to use an electronic form and provide a hyperlink to the electronic New Technology Reporting Web (eNTRe) site <http://invention.nasa.gov>. This Web site has been set up to help NASA employees and parties under NASA funding agreements (*i.e.*, contracts, grants, cooperative agreements, and subcontracts) to report new technology information directly, via a secure Internet connection, to NASA.

SUPPLEMENTARY INFORMATION:

I. Abstract

The new NASA Explorer Schools (NES) project is a national education project, which works with K-12 teachers to provide content and curricular support selected as the best from among the resources NASA has developed. This data collection will help to assess the NES project implementation and to provide data that can inform decisions made by NASA leadership and project staff about project modifications and implementation.

II. Method of Collection

The current paper-based system is used to collect the information. It is deemed not cost effective to collect the

information using a Web site form since the reports submitted vary significantly in format and volume.
