December 7, 1971 (36 FR 23939), and promulgated on April 6, 1973 (38 FR 8826). This standard applies to all extraction plants, ceramic plants, foundries, incinerators, and propellant plants which process beryllium ore, beryllium, beryllium oxide, beryllium alloys, or beryllium-containing waste. The standard also applies to machine shops which process beryllium, beryllium oxides, or any alloy when such alloy contains more than five percent beryllium by weight. All sources known to have caused, or have the potential to cause, dangerous levels of beryllium in the ambient air are covered by the Beryllium NESHAP. This information is being collected to ensure compliance with 40 CFR part 61, subpart C.

There are approximately 236 existing sources subject to this rule. Of the total number of existing sources, we have assumed that approximately 10 sources (i.e., respondents) have elected to comply with an alternative ambient air quality limit by operating a continuous monitor in the vicinity of the affected facility. The monitoring requirements for these facilities provide information on ambient air quality and ensure that locally, the airborne beryllium concentration does not exceed 0.01 micrograms/m³. The sources that are meeting the rule requirements by means of ambient monitoring are required to submit a monthly report of all measured concentrations to the administrator. The remaining 226 sources have elected to comply with the rule by conducting a one-time-only stack test to determine beryllium emissions levels. We have assumed that 10 percent of the 226 sources (or 23 respondents) complying with the emission limit standard will engage in an operational change at their facilities that could potentially increase beryllium emissions, and would be required to repeat the stack test to determine the beryllium emission limits. Consequently, these sources will have recordkeeping and reporting requirements associated with the stack test. We have assumed that no additional sources are expected to become subject to the standard in the next three years. Therefore, there are 33 respondents for the purpose of determining the recordkeeping and reporting burden associated with this rule.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least five years following the date of such measurements, maintain annual reports, and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to ensure compliance with 40 CFR part 61, subpart C, as authorized in section 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined to be private.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Number for EPA’s regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 16 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information. All existing ways will have to adjust to comply with any previously applicable instructions and requirements that have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Beryllium.

Estimated Number of Respondents: 33.

Frequency of Response: Monthly, and on occasion.

Estimated Total Annual Hour Burden: 2,627.

Estimated Total Annual Cost: $281,442, which includes $246,442 in labor costs, zero capital/startup costs, and $35,000 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is no increase in the number of affected facilities, labor hours, or the number of responses compared to the previous ICR. There is, however, an increase in the estimated labor burden cost as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program change. The change in the labor burden cost estimates has occurred because we updated the labor rates, which resulted in an increase in labor costs.

Dated: December 6, 2010.

John Moses, Director, Collection Strategies Division.

Environmental Impact Statements; Notice of Availability

Pursuant to 40 CFR 1506.9.

Notice: In accordance with Section 309(a) of the Clean Air Act, EPA is required to make its comments on EISs issued by other Federal agencies public.

Historically, EPA has met this mandate by publishing weekly notices of availability of EPA comments, which includes a brief summary of EPA’s comment letters, in the Federal Register. Since February 2008, EPA has been including its comment letters on EISs on its Web site at: http://www.epa.gov/compliance/nepa/eisdata.html. Including the entire EIS comment letters on the Web site satisfies the Section 309(a) requirement to make EPA’s comments on EISs available to the public. Accordingly, on March 31, 2010, EPA discontinued the publication of the notice of availability of EPA comments in the Federal Register.

EIS No. 20100458, Draft EIS, FHWA, CA, Phase II—CA–11 and Otay Mesa East Port of Entry Project, Construction of a new State Route and Port of Entry in the East Otay Mesa Area of the City and County of San Diego, CA from the State Route 905/ State Route 125 Interchange to the U.S.–Mexico Border, Comment Period Ends: 02/01/2011, Contact: Cesar Perez 916–498–5065.

EIS No. 20100453, Draft EIS, BPA, 00, Big Eddy-Knight Transmission Project, Proposal to Construct, Operate, and Maintain a 27–28 mile long 500-Kilovolt Transmission Line using a Combination of Existing BPA and New 150-Foot wide Right-of-Way, Wasco County, OR and Klickitat County, WA, Comment Period Ends:

ENVIRONMENTAL PROTECTION AGENCY

Integrated Risk Information System (IRIS): Announcement of Availability of Literature Searches for IRIS Assessments

AGENCY: Environmental Protection Agency.

ACTION: Announcement of availability of literature searches for IRIS assessments; request for information.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is announcing the availability of literature searches for four IRIS assessments, acetaldehyde (CAS No. 75–07–0), hexachlorobutadiene (CAS No. 87–68–3), hexahydro-1, 3,5-trinitro-1,3,5- triazine (RDX) (CAS No. 121–82–4), and naphthalene (CAS No. 91–20–3) and requesting scientific information on health effects that may result from exposure to these chemical substances.

EPA’s IRIS is a human health assessment program that evaluates quantitative and qualitative risk information on effects that may result from exposure to specific chemical substances found in the environment.

DATES: EPA will accept information related to the specific substances included herein as well as any other compounds being assessed by the IRIS Program. Please submit any information in accordance with the instructions provided below.

ADDRESSES: Please submit relevant scientific information identified by docket ID number EPA–HQ–ORD–2007–0664, online at http://www.regulations.gov (EPA’s preferred method); by e-mail to ord.docket@epa.gov; mailed to Office of Environmental Information (OEI) Docket (Mail Code: 2822T), U.S. Environmental Protection Agency, 1200 Pennsylvania Ave, NW., Washington, DC 20460–0001; or by hand delivery or courier to EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave., NW., Washington, DC, between 8:30 am and 4:30 pm. Monday through Friday, excluding legal holidays. Information on a disk or CD–ROM should be formatted in Word or as an ASCII file, avoiding the use of special characters and any form of encryption, and may be mailed to the mailing address above.

FOR FURTHER INFORMATION CONTACT: For information on the IRIS program, contact Karen Hanneman, IRIS Program Deputy Director, National Center for Environmental Assessment,
