Controls.” Specifically, the changes included:

(1) Replacement of the use of plant specific titles to generic titles consistent with TS Task Force (TSTF) Traveler TSTF–65, Revision 1, “Use of Generic Titles for Utility Positions.”

(2) Changes made to more closely align selected TSs with the Improved Standard TSs, and

(3) Administrative changes to specified TSs.

Date of issuance: November 22, 2010. Effective date: As of the date of issuance to be implemented within 60 days.

Amendment Nos.: 296 for Unit 1 and 272 for Unit 2.

Renewed Facility Operating License Nos. DPR–53 and DPR–69: Amendments revised the License and Technical Specifications.

Date of initial notice in Federal Register: June 1, 2010 (75 FR 30443).

The Commission’s related evaluation of these amendments is contained in a Safety Evaluation dated November 22, 2010.

No significant hazards consideration comments received: No.

Dated at Rockville, Maryland, this 2nd day of December 2010.

For the Nuclear Regulatory Commission.

Joseph G. Gitter,
Director, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

The Need for the Proposed Action

The proposed exemption is needed to provide the licensee with additional time, beyond the date granted by the NRC letter dated February 24, 2010, to implement one remaining item of the three requirements in the previous exemption that involves important physical modifications to the HNP, Unit 1 security system. There are several issues which have delayed the work to this point, and/or impacted the projected schedule, such as the existence of safety-related conduit and dedicated safe shut down (SSD) equipment of HNP, Unit 1 within the room in which some important security modifications are planned. A direct outside access route to the physical construction area has not been available due to design basis tornado and missile considerations for the safety related conduits and SSD equipment. These issues were revealed as the design evolved from the conceptual state to a detailed design state. Presently, the licensee is pursuing a design solution that will allow both temporary and permanent direct outside access to the area. Additional time, beyond that previously approved, is needed to: provide the extensive redesign and review effort that was unforeseen at the conceptual design stage.

Environmental Impacts of the Proposed Action

The NRC staff has completed its environmental assessment of the proposed exemption. The NRC staff has concluded that the proposed action to further extend the implementation deadline for one item would not significantly affect plant safety and would not have a significant adverse effect on the probability of an accident occurring.

The proposed action would not result in an increased radiological hazard beyond those hazards previously analyzed in the environmental assessment and final finding of no significant impact made by the Commission in promulgating its revisions to 10 CFR part 73 as discussed in a Federal Register notice dated March 27, 2009 (74 FR 13926). There will be no change to radioactive effluents that affect radiation exposures to plant workers and members of the public. Therefore, no changes or different types of radiological impacts are expected as a result of the proposed exemption.

The proposed action does not result in changes to land use or water use, or result in changes to the quality or quantity of non-radiological effluents. No changes to the National Pollution Discharge Elimination System permit are needed. No effects on the aquatic or terrestrial habitat in the vicinity of the plant, or to threatened, endangered, or protected species under the Endangered Species Act, or impacts to essential fish habitat covered by the Magnuson-Stevens Act are expected. There are no impacts to the air or ambient air quality.

There are no impacts to historical and cultural resources. There would be no impact to socioeconomic resources. Therefore, no changes to or different types of non-radiological environmental impacts are expected as a result of the proposed exemption.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

With its request to extend the implementation deadline, the licensee currently maintains a security system acceptable to the NRC and that will continue to provide acceptable physical protection of HNP, Unit 1 in lieu of the new requirements in 10 CFR part 73. Therefore, the extension of the implementation date for one element of the new requirements of 10 CFR part 73 to November 30, 2011, would not have any significant environmental impacts.

The NRC staff’s safety evaluation will be provided in the exemption that will
be issued as part of the letter to the licensee approving the exemption to the regulation, if granted.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed actions, the NRC staff considered denial of the proposed action (i.e., the “no-action” alternative). Denial of the exemption request would result in no change in current environmental impacts. If the proposed action was denied, the licensee would have to comply with the existing implementation deadline of December 15, 2010, for one remaining item of the three requirements, as granted on February 24, 2010. The environmental impacts of the proposed exemption and the “no-action” alternative are similar.

Alternative Use of Resources

The action does not involve the use of any different resources than those considered in the Final Environmental Statement for HNP, Unit 1, NUREG–0972, dated October 31, 1983, as supplemented through the “Generic Environmental Impact Statement for License Renewal of Nuclear Plants: Regarding Shearon Harris Nuclear Power Plant, Unit 1—Final Report (NUREG–1437, Supplement 33)."

Agencies and Persons Consulted

In accordance with its stated policy, on December 2, 2010, the NRC staff consulted with the North Carolina State official, lee.cox@ncdenr.gov of the North Carolina Department of Environment and Natural Resources, regarding the environmental impact of the proposed action. The State official had no comments.

Finding of No Significant Impact

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee’s letter dated September 20, 2010. Portions of the September 20, 2010, submittal contain security-related information and, accordingly, a redacted version of this letter is available for public review in the Agencywide Documents Access and Management System (ADAMS), Accession No. ML102630191. This document may be examined, and/or copied for a fee, at the NRC’s Public Document Room (PDR), located at One White Flint North, Public File Area O–1F21, 11555 Rockville Pike (first floor), Rockville, Maryland 20852. Publicly available records will be accessible electronically from the ADAMS Public Electronic Reading Room on the Internet at the NRC Web site: http://www.nrc.gov/reading-rm/adams.html.

Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC PDR Reference staff by telephone at 1–800–397–4209 or 301–415–4737, or send an e-mail to pdr.resource@nrc.gov.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–247 and 50–286; NRC–2008–0672]

Entergy Nuclear Operations, Inc.; Indian Point Nuclear Generating Unit Nos. 2 and 3; Notice of Availability of the Final Supplement 38 to the Generic Environmental Impact Statement for License Renewal of Nuclear Plants

Notice is hereby given that the U.S. Nuclear Regulatory Commission (NRC) has published a final plant-specific supplement to the Generic Environmental Impact Statement for License Renewal of Nuclear Plants (GEIS), NUREG–1437, regarding the renewal of Operating Licenses DPR–26 and DPR–64 for an additional 20 years of operation for Indian Point Nuclear Generating Unit Nos. 2 and 3 (IP2 and IP3). The IP2 and IP3 site is located approximately 24 miles north of New York, NY. Possible alternatives to the proposed action (license renewal) include no action and reasonable alternative energy sources.

As discussed in Section 9.3 of the final supplement, the staff determined that the adverse environmental impacts of license renewal for IP2 and IP3 are not so great that preserving the option of license renewal for energy-planning decision makers would be unreasonable. This recommendation is based on: (1) the analysis and findings in the GEIS; (2) information provided in the environmental report and other documents submitted by Entergy Nuclear Operations, Inc.; (3) consultation with Federal, State, local, and tribal agencies; (4) the staff’s own independent review; and (5) consideration of public comments received during the scoping process and on the draft Supplemental Environmental Impact Statement.

The final Supplement 38 to the GEIS is publicly available at the NRC Public Document Room (PDR), located at One White Flint North, Public File Area O–1F21, 11555 Rockville Pike, Rockville, Maryland 20852, or from the NRC’s Agencywide Documents Access and Management System (ADAMS). The ADAMS Public Electronic Reading Room is accessible at http://www.nrc.gov/reading-rm/adams.html.

The accession numbers for the final Supplement 38 to the GEIS are ML103350405 (Volume 1), ML103350438, ML103360209, ML103360212 (Volume 2), and ML103350442 (Volume 3). Persons who do not have access to ADAMS or who encounter problems while accessing the documents located in ADAMS, should contact the NRC’s PDR reference staff by telephone at (800) 397–4209 or (301) 415–4737, or by e-mail at pdr.resource@nrc.gov.

In addition, the White Plains Public Library (White Plains, NY), Hendrick Hudson Free Library (Montrose, NY), and the Field Library (Poughkeepsie, NY), have all agreed to make the final supplement available for public inspection.

For Further Information, Contact: Mr. Andrew Stuyvenberg, Projects Branch 2, Division of License Renewal, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Mail Stop O–11F1, Washington, DC 20555–0001. Mr. Stuyvenberg may be contacted by telephone at (800) 368–5642, extension 4006, or by e-mail at andrew.stuyvenberg@nrc.gov.

Dated at Rockville, Maryland, this 3rd day of December, 2010.
