This fee is only proposed and will be determined upon further analysis and public comment.

DATES: Send any comments about these fee proposals by June 15, 2011 so comments can be compiled and analyzed. Fitton Guard Station and Off Cow Camp Cabin will become available for recreation rental summer of 2011.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau conducts the SIPP, which is a household-based survey designed as a continuous series of national panels. New panels are introduced every few years with each panel having durations of one to six years. Respondents are interviewed at 4-month intervals or "waves" over the life of the panel. The survey is molded around a central "core" of labor force and income questions that remain fixed throughout the life of the panel. The core is supplemented with questions designed to address specific needs, such as obtaining information on household members' participation in government programs as well as prior labor force patterns of household members. These supplemental questions are included with the core and are referred to as "topical modules."

The SIPP represents a source of information for a wide variety of topics and allows information for separate topics to be integrated to form a single, unified database so that the interaction between tax, transfer, and other government and private policies can be examined. Government domestic-policy formulators depend heavily upon the SIPP information concerning the distribution of income received directly as money or indirectly as in-kind benefits and the effect of tax and transfer programs on this distribution. They also need improved and expanded data on the income and general economic and financial situation of the U.S. population. The SIPP has provided these kinds of data on a continuing basis since 1983 permitting levels of economic well-being and changes in these levels to be measured over time.

The 2008 panel is currently scheduled for approximately 6 years and will include 17 waves of interviewing beginning in September 2008.

Approximately 65,300 households were selected for the 2008 panel, of which 42,032 households were interviewed. We estimate that each household contains 2.1 people, yielding 88,267 person-level interviews in Wave 1 and subsequent waves. Interviews take 30 minutes on average. Three waves will occur in the 2008 SIPP Panel during FY 2011. The total annual burden for 2008 Panel SIPP interviews would be 132,400 hours in FY 2011.

The topical modules for the 2008 Panel Wave 10 collect information about:
