agency may not conduct or sponsor, and
that a person is not required to respond
to, a collection of information unless it

10. *Abstract:* NRC regulations in 10
CFR part 26 prescribe requirements to
establish, implement, and maintain
fitness-for-duty programs at affected
licensees and other entities. The
objectives of these requirements are to
provide reasonable assurance that
persons subject to the rule are
trustworthy, reliable, and not under the
influence of any substance, legal or
illegal, or mentally or physically
impaired from any cause, which in any
way could adversely affect their ability
to safely and competently perform their
duties. These requirements also provide
reasonable assurance that the effects of
fatigue and degraded alertness on
individuals' abilities to safely and
competently perform their duties are
managed commensurate with
maintaining public health and safety.
The information collections required by
part 26 are necessary to properly
manage FFD programs and to enable
effective and efficient regulatory
oversight of affected licensees other
entities. These licensees and other
entities must perform certain tasks,
maintain records, and submit reports to
comply with part 26 drug and alcohol
provisions and fatigue management
requirements. These records and reports
are necessary to enable regulatory
inspection and evaluation of a licensee's
or entity's compliance with NRC
regulations, its FFD performance, and of
any significant FFD-related event to
help maintain public health and safety,

promote the common defense and
security, and protect the environment.

Arnold Energy Center (DAEC). Renewed
facility operating license No. DPR-49
authorizes operation of DAEC by the
licensee at reactor core power levels not
in excess of 1912 megawatts thermal in
accordance with the provisions of the
DAEC renewed license and its technical
specifications.

The notice also serves as the record of

The factors considered in the record of decision can be found in the supplemental environmental impact statement (SEIS) for DAEC.

DAEC is a boiling-water reactor located in Palo, Iowa. The application for the renewed license complied with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. As required by the Act and the Commission's regulations in 10 CFR chapter 1, the Commission has made appropriate findings, which are set forth in the license. Prior public notice of the action involving the proposed issuance of the renewed license and of an opportunity for a hearing regarding the proposed issuance of the renewed license was published in the **Federal Register** on February 17, 2009 (73 FR 67895).
