Risk-Based Capital Standards: Advanced Capital Adequacy Framework—Basel II; Establishment of a Risk-Based Capital Floor

AGENCY: Office of the Comptroller of the Currency, Treasury; Board of Governors of the Federal Reserve System; and the Federal Deposit Insurance Corporation.

ACTION: Joint notice of proposed rulemaking.

SUMMARY: The Office of the Comptroller of the Currency (OCC), Board of Governors of the Federal Reserve System (Board), and the Federal Deposit Insurance Corporation (FDIC) (collectively, the agencies) propose to: Amend the advanced risk-based capital adequacy standards (advanced approaches rules) 1 to be consistent with certain provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Act) 2 and amend the general risk-based capital rules 3 to provide limited flexibility consistent with section 171(b) of the Act for recognizing the relative risk of certain assets generally not held by depository institutions.

DATES: Comments on this notice of proposed rulemaking must be received by February 28, 2011.

ADDRESSES: Comments should be directed to:
OCC: Because paper mail in the Washington, DC area and at the Agencies is subject to delay, commenters are encouraged to submit comments by the Federal eRulemaking Portal or e-mail, if possible. Please use the title “Advanced Capital Adequacy Framework—Basel II; Establishment of a Risk-Based Capital Floor” to facilitate the organization and distribution of the comments. You may submit comments by any of the following methods:
• Federal eRulemaking Portal—“regulations.gov”: Go to http://www.regulations.gov. Select “Document Type” of “Proposed Rules,” and in “Enter Keyword or ID Box,” enter Docket ID “OCC–2010–0009,” and click “Search.” On “View By Relevance” tab at bottom of screen, in the “Agency” column, locate the proposed rule for OCC, in the “Action” column, click on “Submit a Comment” or “Open Docket Folder” to submit or view public comments and to view supporting and related materials for this rulemaking action.
• Click on the “Help” tab on the Regulations.gov home page to get information on using Regulations.gov, including instructions for submitting or viewing public comments, viewing other supporting and related materials, and viewing the docket after the close of the comment period.
• E-mail: regs.comments@occ.treas.gov.
• Mail: Office of the Comptroller of the Currency, 250 E Street, SW., Mail Stop 2–3, Washington, DC 20219.
• Fax: (202) 874–5274.
• Hand Delivery/Courier: 250 E Street, SW., Mail Stop 2–3, Washington, DC 20219.

Instructions: You must include “OCC” as the agency name and “Docket ID OCC–2010–0009” in your comment. In general, OCC will enter all comments received into the docket and publish them on the Regulations.gov Web site without change, including any business or personal information that you provide such as name and address information, e-mail addresses, or phone numbers. Comments received, including attachments and other supporting materials, are part of the public record and subject to public disclosure. Do not enclose any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure.

You may review comments and other related materials that pertain to this proposed rule by any of the following methods:
• Viewing Comments Electronically: Go to http://www.regulations.gov. Select “Document Type” of “Public Submissions,” in “Enter Keyword or ID Box,” enter Docket ID “OCC–2010–0009,” and click “Search.” Comments will be listed under “View By Relevance” tab at bottom of screen. If comments from more than one agency are listed, the “Agency” column will indicate which comments were received by the OCC.
• Viewing Comments Personally: You may personally inspect and photocopy comments at the OCC, 250 E Street, SW., Washington, DC. For security reasons, the OCC requires that visitors make an appointment to inspect comments. You may do so by calling (202) 874–4700. Upon arrival, visitors will be required to present valid government-issued photo identification and to submit to security screening in order to inspect and photocopy comments.
• Docket: You may also view or request available background documents and project summaries using the methods described above.

Board: You may submit comments, identified by Docket No. R–1402 and RIN No. 7100–AD62, by any of the following methods:
• Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.
• E-mail: regs.comments@federalreserve.gov. Include docket number in the subject line of the message.

1 12 CFR part 3, Appendix C (OCC); 12 CFR part 208, Appendix F and 12 CFR part 225, Appendix G (Board); and 12 CFR part 325 Appendix D (FDIC).

A. The Dodd-Frank Wall Street Reform and Consumer Protection Act

Section 171(b)(2) of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Act) states that the agencies shall establish minimum risk-based capital requirements applicable to insured depository institutions, depository institution holding companies, and nonbank financial companies supervised by the Federal Reserve (covered institutions). In particular, and as described in more detail below, sections 171(b)(1) and (2) specify that the minimum leverage and risk-based capital requirements established under section 171 shall not be less than “generally applicable” capital requirements, which serve as a floor for any capital requirements the agencies may require. Moreover, sections 171(b)(1) and (2) specify that the Federal banking agencies may not establish leverage or risk-based capital requirements for covered institutions that are quantitatively lower than the generally applicable leverage or risk-based capital requirements in effect for insured depository institutions as of the date of enactment of the Act.

B. Advanced Approaches Rules

On December 7, 2007, the agencies implemented the advanced approaches rules, which are mandatory for U.S. depository institutions and bank holding companies (collectively, banking organizations) meeting certain thresholds for total consolidated assets or foreign exposure. The advanced approaches rules incorporate a series of proposals released by the Basel Committee on Banking Supervision (Basel Committee or BCBS), including the Basel Committee’s comprehensive June 2006 release entitled “International Convergence of Capital Measurement and Capital Standards: A Revised Framework” (New Accord). The advanced approaches rules establish a series of transitional floors to provide a smooth transition to the advanced approaches rules and to limit temporarily the amount by which a banking organization’s risk-based capital requirements could decline relative to the general risk-based capital rules over a period of at least three years following completion of a satisfactory parallel run. The advanced approaches rules place limits on the amount by which a banking organization’s risk-based capital requirements may decline. Under the advanced approaches rules, the banking organization must take the risk-based capital ratios equal to the lesser of (i) the organization’s ratios calculated under the advanced approaches rules and (ii) its ratios calculated under the general risk-based capital rules, with risk-weighted assets multiplied by 95 percent, 90 percent, and 85 percent during the first, second, and third transitional floor periods, respectively and compare these ratios to its minimum risk-based capital ratio requirements under section 3 of the advanced approaches rules. Under this approach, banking organizations that use the advanced approaches rule could operate with lower minimum risk-based capital requirements during a transitional floor period, and potentially thereafter, than would be required under the general risk-based capital rules.

C. Requirements of Section 171 of the Act

Section 171(a)(2) of the Act defines the term “generally applicable risk-based capital requirements” to mean:

- The BCBS is a committee of banking supervisory authorities established by the central banking governors of the G-10 countries in 1975. The BCBS issued the New Accord to modernize its first capital Accord, which was endorsed by the BCBS members in 1988 and implemented by the agencies in 1989. The New Accord, the 1988 Accord, and other documents issued by the BCBS are available through the Bank for International Settlements’ Web site at http://www.bis.org.
- 7 The BCBS is a committee of banking supervisory authorities established by the central banking governors of the G-10 countries in 1975. The BCBS issued the New Accord to modernize its first capital Accord, which was endorsed by the BCBS members in 1988 and implemented by the agencies in 1989. The New Accord, the 1988 Accord, and other documents issued by the BCBS are available through the Bank for International Settlements’ Web site at http://www.bis.org.
- 8 Under the advanced approaches rules, the minimum tier 1 risk-based capital requirement is 4 percent and the total risk-based capital requirement is 8 percent. See 12 CFR part 3, Appendix A (OCC); 12 CFR part 208 and 225, Appendix A (Board); and 12 CFR part 325, appendix A (FDIC).
- 9 The BCBS is a committee of banking supervisory authorities established by the central banking governors of the G-10 countries in 1975. The BCBS issued the New Accord to modernize its first capital Accord, which was endorsed by the BCBS members in 1988 and implemented by the agencies in 1989. The New Accord, the 1988 Accord, and other documents issued by the BCBS are available through the Bank for International Settlements’ Web site at http://www.bis.org.
- 10 Even though the Office of Thrift Supervision (OTS) is not issuing this notice of proposed rulemaking (NPR), OTS plans to issue an NPR that parallels the substance of this notice to amend its capital regulations at 12 CFR part 567. OTS’s parallel notice is subject to review by the Office of Management and Budget pursuant to Executive Order 12866.
- 11 The BCBS is a committee of banking supervisory authorities established by the central banking governors of the G-10 countries in 1975. The BCBS issued the New Accord to modernize its first capital Accord, which was endorsed by the BCBS members in 1988 and implemented by the agencies in 1989. The New Accord, the 1988 Accord, and other documents issued by the BCBS are available through the Bank for International Settlements’ Web site at http://www.bis.org.
- 12 Even though the Office of Thrift Supervision (OTS) is not issuing this notice of proposed rulemaking (NPR), OTS plans to issue an NPR that parallels the substance of this notice to amend its capital regulations at 12 CFR part 567. OTS’s parallel notice is subject to review by the Office of Management and Budget pursuant to Executive Order 12866.

“(A) the risk-based capital requirements, as established by the appropriate Federal banking agencies to apply to insured depository institutions under the prompt corrective action regulations implementing section 38 of the Federal Deposit Insurance Act, regardless of total consolidated asset size or foreign financial exposure; and (B) includes the regulatory capital components in the numerator of those capital requirements, the risk-weighted assets in the denominator of those capital requirements, and the required ratio of the numerator to the denominator.” Section 171(b)(2) of the Act further provides that “[t]he appropriate Federal banking agencies shall establish minimum risk-based capital requirements on a consolidated basis for insured depository institutions, depository institution holding companies, and nonbank financial companies supervised by the Board of Governors. The minimum risk-based capital requirements established under this paragraph shall not be less than the generally applicable risk-based capital requirements, which shall serve as a floor for any capital requirements that the agency may require, nor quantitatively lower than the generally applicable risk-based capital requirements that were in effect for insured depository institutions as of the date of enactment of this Act.”

In accordance with section 38 of the Federal Deposit Insurance Act, the Federal banking agencies established minimum leverage and risk-based capital requirements for insured depository institutions for prompt corrective action (PCA rules). All insured institutions, regardless of their total consolidated assets or foreign exposure, must compute their minimum risk-based capital requirements for PCA purposes using the general risk-based capital rules, which currently are the “generally applicable risk-based capital requirements” defined by Section 171(a)(2) of the Act.

D. Effect on Applications by Foreign Banking Organizations

In approving an application by a foreign bank to establish a branch or agency in the United States or to make a bank or nonbank acquisition, the Board considers, among other factors, whether the capital of the foreign bank is equivalent to the capital that would be required of a U.S. banking organization. Similarly, in order to make effective a foreign bank’s declaration under the BHC Act to be treated as an FHC, the Board must apply comparable capital and management standards to the foreign bank “giving due regard to the principle of national treatment and equality of competitive opportunity.”

National treatment generally means treatment that is no less favorable than that provided to domestic institutions that are in like circumstances. The Board has broad discretion to take any relevant factors into account in determining standards that are both comparable and provide national treatment.

The Board has begun making capital equivalency findings for foreign banks under the International Banking Act and the Bank Holding Company Act since 1992 pursuant to guidelines developed as part of a joint study by the Board and Treasury on capital equivalency. The study acknowledged the Basel Committee on Banking Supervision’s 1988 capital accord (Basel I) as the prevailing capital standard for internationally active banks and found that implementation of Basel I was broadly equivalent across countries. Until 2007, the Board generally accepted as equivalent the capital of foreign banks from countries adhering to Basel I within the bounds of national discretion allowed under the Basel I framework. For foreign banks that have begun operating under the New Accord’s capital standards in making capital equivalency determinations, the Board has evaluated the capital of the foreign bank as reported in compliance with the New Accord, while also taking into account a range of factors including compliance with the New Accord’s capital requirement floors linked to Basel I, where applicable.

At this time, many foreign bank applicants are operating under Basel II advanced approaches that have been implemented by their home country authorities. In many cases, home country authorities have adopted floors based on Basel I standards using discretion and flexibility as provided in the Accord. However, in some cases, Basel II floors are no longer in effect, or are expected to be phased out in the near term.

Question 1. How should the proposed rule be applied to foreign banks in evaluating capital equivalency in the context of applications to establish branches or make bank or nonbank acquisitions in the United States, and in evaluating capital comparability in the context of foreign bank FHC declarations?

E. Effect of Section 171 of the Act on Certain Institutions and Their Assets

Certain covered institutions may not previously have been subject to consolidated risk-based capital requirements. Some of these companies are likely to be similar in nature to most depository institutions and bank holding companies subject to the general risk-based capital rules. Others, may be different, with exposure types and risks that were not contemplated when the general risk-based capital rules were developed. The Financial Stability Oversight Council has not yet designated any nonbank financial companies to be supervised by the Board; over time it is conceivable that it will designate one or more companies whose activities are quite different than those addressed in the general risk-based capital rules. The Board will be supervising these institutions for the first time and expects that there will be cases when it needs to evaluate the risk-based capital treatment of specific exposures not typically held by depository institutions, and that do not have a specific risk weight under the generally applicable risk-based capital requirements.

Under the general risk-based capital rules, exposures are generally assigned to five risk weight categories, that is, 0 percent, 20 percent, 50 percent, 100 percent, and 200 percent, according to their relative riskiness. Assets not explicitly included in a lower risk weight category are assigned to the 100 percent risk weight category. Going forward, there may be situations where exposures of a depository institution holding company or a nonbank financial company supervised by the Board not only do not wholly fit within the terms of a risk weight category, but also impose risks that are not commensurate with the risk weight otherwise specified in the generally applicable risk-based capital requirements.
For example, there are some material exposures of insurance companies that, while not riskless, would be assigned to a 100 percent risk weight category because they are not explicitly assigned to a lower risk weight category. An automatic assignment to the 100 percent risk weight category without consideration of an exposure's economic substance could overstate the risk of the exposure and produce uneconomic capital requirements for a covered institution.

II. Proposed Rule

A. Generally Applicable Risk-Based Capital Requirement Floor

The OCC, Board, and FDIC are proposing to modify their respective advanced approaches rules consistent with section 171(b)(2). In particular, the agencies are proposing to revise the advanced approaches rules by replacing the transitional floors in section 21(e) of the advanced approaches rule with a permanent floor equal to the tier 1 and total risk-based capital requirements under the current generally applicable risk-based capital rules. Thus, the agencies are proposing to require each banking organization subject to the advanced approaches rules to maintain the systems and records necessary to calculate its required minimum risk-based capital requirements under both the general risk-based capital rules and the advanced approaches rules. Each quarter, each banking organization subject to the advanced approaches rules must calculate and compare its minimum tier 1 and total risk-based capital ratios as calculated under the general risk-based capital rules and the advanced approaches rules. The banking organization would then compare the lower of the two tier 1 risk-based capital ratios and the lower of the two total risk-based capital ratios to the minimum tier 1 ratio requirement of 4 percent and total risk-based capital ratio requirement of 8 percent in section 3 of the advanced approaches rules to determine if it met its minimum capital requirements. For bank holding companies, the proposal also incorporates the phase-in of restrictions on the regulatory capital treatment of debt or equity instruments issued before May 19, 2010 as described in section 171(b)(4)(B) of the Act.

The agencies are also proposing to eliminate the paragraphs of the advanced approaches rules dealing with the transitional floor periods, and the

12 CFR part 3, Appendix C, § 3 (OCC); 12 CFR part 208, Appendix F, § 3 and 12 CFR part 225, Appendix G, § 3 (Board); and 12 CFR part 325, § 3

interagency study. These parts of the advanced approaches rules no longer serve a purpose.

Question 2: The agencies seek comment generally on the impact of a permanent floor on the minimum risk-based capital requirements for banking organizations subject to the advanced approaches rules, and on the manner in which the agencies are proposing to implement the provisions of section 171(b) of the Act.

B. Change to Generally Applicable Risk-Based Capital Requirements

The proposed floor, consistent with the requirements of section 171(b)(2), is based on the generally applicable risk-based capital requirements for depository institutions. To address the appropriate capital requirement for low risk assets that non-depository institutions may hold and for which there is no explicit capital treatment in the general risk-based capital rules, the agencies propose that such exposures receive the capital treatment applicable under the capital guidelines for bank holding companies under limited circumstances. The circumstances are intended to allow for an appropriate capital requirement for low risk nonbanking exposures without creating unintended new opportunities for depository institutions to engage in capital arbitrage. The agencies therefore propose to limit this treatment to cases in which a depository institution is not authorized to hold the asset under applicable law other than under debt previously contracted or similar authority, and the risks associated with the asset are substantially similar to the risks of assets that receive a lower risk weight. The agencies therefore propose a change to the general risk-based capital rules for depository institutions to permit this limited flexibility to appropriately address exposures of depository institution holding companies and nonbank financial companies supervised by the Board. The agencies request comment on this change to the general risk-based capital rules.

Question 3. For what specific types of exposures do commenters believe this treatment is appropriate? Does the proposal provide sufficient flexibility to address the exposures of depository institution holding companies and nonbank financial companies supervised by the Federal Reserve? If not, how should the proposal be changed to recognize the considerations outlined in this section?

Consistent with the joint efforts of the U.S. banking agencies and the Basel Committee to enhance the regulatory capital rules, the agencies anticipate that the generally applicable risk-based capital requirements and advanced approaches rule will be amended from time to time. These amendments would reflect advances in risk sensitivity and other potentially substantive changes to the New Accord such as the definition of capital, treatment of counterparty credit risk, and new regulatory capital elements such as an international leverage ratio and prudential capital buffers. The agencies will consider each proposed change to the risk-based capital rules and determine whether it is appropriate to implement the change by rulemaking based on the implications of each proposal for the capital adequacy of banking organizations, the implementation costs of such proposals, and the nature of any unintended consequences or competitive issues. The generally applicable risk-based capital requirements and generally applicable leverage capital requirements that the agencies may establish in the future would, as required under the Act, become the minimum leverage and risk-based capital requirements for all banking organizations. Furthermore, as provided under the Act, any future amendments to the leverage requirements or risk-based capital requirements established by the agencies may not result in capital requirements that are “quantitatively lower” than the generally applicable capital requirements that became effective as of the date of enactment of the Act.

To comply with this provision of the Act, the agencies propose to perform a quantitative analysis of the likely effect on capital requirements as part of developing future amendments to the capital rules to ensure that any new capital framework is not quantitatively lower than the requirements in effect as of the date of enactment of the Act. The agencies therefore would not anticipate proposing to require banking organizations to compute two sets of generally applicable capital requirements from current and historic frameworks as the generally applicable requirements are amended over time. The agencies have not yet determined the quantitative method for measuring the equivalence of current, historic, and proposed future capital frameworks.

Question 4: The agencies request comment on the most appropriate method of conducting the aforementioned analysis. What are potential quantitative methods for comparing future capital requirements to ensure that any new capital
framework is not quantitatively lower than the requirements in effect as of the date of the enactment of the Act?

The agencies anticipate addressing aspects of Section 171 not addressed in this proposed rule in a subsequent rulemaking.

Question 5: The agencies seek comment on all other aspects of this proposed rule, including the costs and benefits. What, if any, changes should the agencies make to the proposed rule or the risk-based capital framework to better balance costs and benefits?

Regulatory Flexibility Act Analysis

Pursuant to section 605(b) of the Regulatory Flexibility Act,\(^\text{10}\) (RFA), the regulatory flexibility analysis otherwise required under section 604 of the RFA is not required if an agency certifies that the rule will not have a significant economic impact on a substantial number of small entities (defined for purposes of the RFA to include banks with assets less than or equal to $175 million) and publishes its certification and a short, explanatory statement in the Federal Register along with its rule.

This proposal would affect bank holding companies, national banks, State member banks, and State nonmember banks, that use the advanced approaches rules to calculate their risk-based capital requirements according to certain internal rating-based and internal model approaches. A bank holding company or bank must use the advanced approaches rules only if: (i) It has consolidated total assets (as reported on its most recent year-end regulatory report) equal to $250 billion or more; (ii) it has consolidated total on-balance sheet foreign exposures at the most recent year-end equal to $10 billion or more; or (iii) it is a subsidiary of a bank holding company or bank that would be required to use the advanced approaches rules to calculate its risk-based capital requirements.

With respect to the proposed changes to the general risk-based capital rules, the proposal has the potential to affect the risk weights applicable only to assets that generally are impermissible for banks to hold. These proposed changes are accordingly unlikely to have a significant impact on banking organizations. The agencies also note that the changes to the general risk-based capital rules would not impose any additional obligations, restrictions, burdens, or reporting, recordkeeping or compliance requirements on banks including small banking organizations, nor do they duplicate, overlap or conflict with other Federal rules.

The agencies estimate that zero small bank holding companies (out of a total of approximately 2,561 small bank holding companies), one small national bank (out of a total of approximately 678 small national banks), one small State member bank (out of a total of approximately 400 small State member banks), and one small State nonmember bank (out of a total of approximately 2,708 small State nonmember banks) are required to use the advanced approaches rules.\(^\text{17}\) In addition, each of the small banks that is required to use the advanced approaches rules is a subsidiary of a bank holding company with over $250 billion in consolidated total assets or over $10 billion in consolidated total on-balance sheet foreign exposures. Therefore, the agencies believe that the proposed rule will not result in a significant economic impact on a substantial number of small entities.

OCC Unfunded Mandates Reform Act of 1995 Determinations

Section 202 of the Unfunded Mandates Reform Act of 1995, Public Law 104–4 (UMRA) requires that an agency prepare a budgetary impact statement before promulgating a rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector of $100 million or more (adjusted annually for inflation) in any one year. If a budgetary impact statement is required, section 205 of the UMRA also requires an agency to identify and consider a reasonable number of regulatory alternatives before promulgating a rule. The OCC has determined that its proposed rule will not result in expenditures by State, local, and Tribal governments, or by the private sector, of $100 million or more. Accordingly, the OCC has not prepared a budgetary impact statement or specifically addressed the regulatory alternatives considered.

Paperwork Reduction Act

In accordance with the requirements of the Paperwork Reduction Act of 1995,\(^\text{18}\) the agencies may not conduct or sponsor, and the respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. Each of the agencies has an established information collection for the paperwork burden imposed by the advanced approaches rule.\(^\text{19}\) This notice of proposed rulemaking would replace the transitional floors in section 21(e) of the advanced approaches rule with a permanent floor equal to the tier 1 and total risk-based capital requirements under the current generally applicable risk-based capital rules. The proposed change to transitional floors would change the basis for calculating a data element that must be reported to the agencies under an existing requirement. However, it would have no impact on the frequency or response time for the reporting requirement and, therefore, does not constitute a substantive or material change subject to OMB review.

Plain Language

Section 722 of the Gramm-Leach-Bliley Act requires the agencies to use plain language in all proposed and final rules published after January 1, 2000. In light of this requirement, the agencies have sought to present the proposed rule in a simple and straightforward manner. The agencies invite comment on whether the agencies could take additional steps to make the proposed rule easier to understand.

(i) Total risk-based capital ratio of 8.0 percent; and

(ii) Total qualifying capital to total risk-weighted assets, and

(iii) Tier 1 capital to total risk-weighted assets, and

(iv) Tier 1 risk-based capital ratio of 4.0 percent.

(c) When a bank subject to appendix C of this part calculates its risk-based capital requirements under this appendix, the bank must also refer to appendix C of this part for supplemental rules to calculate risk-based capital requirements adjusted for market risk.

10. Amend Appendix A to part 325 as follows:

a. In section II.C, revise the first sentence of the introductory text;

b. In sections II.D, and II.E, redesignate footnotes 45 through 50 as footnotes 46 through 51.

c. In section II.C, Category 4, add new paragraph (d) and a new footnote 45.

Appendix A to Part 325—Statement of Policy on Risk-Based Capital

II. Procedures for Computing Risk-Weighted Assets

C. Risk Weights for Balance Sheet Assets (see Table II)

The risk based capital framework contains five risk weight categories—0 percent, 20 percent, 50 percent, 100 percent, and 200 percent.

Category 4—100 Percent Risk Weight.

(d) Subject to the requirements below, a bank may assign an asset not included in the categories above to the risk weight category applicable under the capital guidelines for bank holding companies, provided that all of the following conditions apply:

(1) The bank is not authorized to hold the asset under applicable law other than debt previously contracted or similar authority;

(2) The risks associated with the asset are substantially similar to the risks of assets that are otherwise assigned to a risk weight category less than 100 percent under this appendix.

11. In Appendix D to part 325:

a. Revise section 3 to read as set forth below; and

b. Remove section 21(e).

Appendix D to Part 325—Capital Adequacy Guidelines for Banks: Internal Ratings-Based and Advanced Measurement Approaches

Part I. General Provisions

Section 3. Minimum Risk-Based Capital Requirements

(a)(1) Except as modified by paragraph (c) of this section, each bank must meet a minimum:

(i) Total risk-based capital ratio of 8.0 percent; and

(ii) Tier 1 risk-based capital ratio of 4.0 percent.

10. Amend Appendix A to part 325 as follows:

a. In section II.C, revise the first sentence of the introductory text;

b. In sections II.D, and II.E, redesignate footnotes 45 through 50 as footnotes 46 through 51.

c. In section II.C, Category 4, add new paragraph (d) and a new footnote 45.

Appendix A to Part 325—Statement of Policy on Risk-Based Capital

II. Procedures for Computing Risk-Weighted Assets

C. Risk Weights for Balance Sheet Assets (see Table II)

The risk based capital framework contains five risk weight categories—0 percent, 20 percent, 50 percent, 100 percent, and 200 percent.

Category 4—100 Percent Risk Weight.

(d) Subject to the requirements below, a bank may assign an asset not included in the categories above to the risk weight category applicable under the capital guidelines for bank holding companies, provided that all of the following conditions apply:

(1) The bank is not authorized to hold the asset under applicable law other than debt previously contracted or similar authority;

(2) The risks associated with the asset are substantially similar to the risks of assets that are otherwise assigned to a risk weight category less than 100 percent under this appendix.
