

west side of the refuge; expanding the deer hunt; developing new hiking trails; and developing and designing a new headquarters/visitor contact station.

Alternative C features additional management that aims to restore (or mimic) natural ecosystem processes or functions to achieve refuge purposes. Alternative C focuses on using management techniques that would encourage forest growth and includes an increased focus toward the previously proposed wilderness areas. Strategies proposed include creating conditions that allow us to shift more resources from intensive management of the refuge impoundment system to the restoration of Back Bay-Currituck Sound. In addition, we propose to develop and design a new headquarters/visitor contact station that provides more office space than proposed for Alternative B; and we also plan to work with partners to provide a shuttle service (for a fee) from the new headquarters site to the barrier spit.

Comments

We solicited comments on the draft CCP/EA for Back Bay NWR from March 30 to May 1, 2010 (75 FR 15721). We received comments from 162 individuals, organizations, and State and Federal agencies on our draft plan via electronic mail, phone, and letters. All comments we received were evaluated. A summary of those comments and our responses to them is included as Appendix K in the CCP.

Selected Alternative

After considering the comments we received on our draft CCP/EA, we have selected Alternative B for implementation. Alternative B comprises the mix of actions that, in our professional judgment, works best towards achieving refuge purposes, our vision and goals, and the goals of other State and regional conservation plans. We also believe it most effectively addresses the key issues raised during the planning process. The basis of our decision is detailed in Appendix L of the CCP.
