

steelhead annually. Permit 14685 expires on December 31, 2015.

Permit 14688 was issued to Natural Resource Scientists, Incorporated on September 21, 2010, authorizing the capture (by fyke net), handling (identification and enumeration of species, taking of length measurements), tissue sampling, release of moribund fish or fish carcasses back into irrigation diversion canals, and release of live fish on the riverside of the canals of ESA-listed juvenile salmonids and sturgeon. Permit 14688 authorizes non-lethal take during the collection of physical, hydraulic, and habitat data at five irrigation diversion canals; the research of fish entrainment in relation to diverted river flows; and the development of prioritization criteria for fish screening projects. Permit 14688 expires on December 31, 2011.

NMFS has determined that take levels authorized in the described permits will not jeopardize listed Chinook salmon, steelhead, and green sturgeon nor result in the destruction or adverse modification of critical habitat where described. NMFS' conditions in the permits will ensure that the take of ESA-listed anadromous fish will not jeopardize the continued existence of the listed species. Issuance of each permit, as required by the ESA, was based on a finding that such permit (1) was applied for in good faith; (2) will not operate to the disadvantage of any endangered or threatened species, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: January 10, 2011.

Therese Conant,

Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Correction notice.

SUMMARY: On June 3, 2009, NMFS published a 30-day public comment period notice in the **Federal Register** for the receipt of applications for scientific

research permits 13791 (applicant: Fishery Foundation of California) and 14092 (applicant: California Department of Fish and Game). In that notice, the permit application numbers were misidentified. This document corrects the June 3, 2009, document by providing the correct permit numbers.

FOR FURTHER INFORMATION CONTACT:

Shirley Witalis at phone number (916) 930-3606, or e-mail shirley.witalis@noaa.gov.

SUPPLEMENTARY INFORMATION: In the **Federal Register** document of June 3, 2009 (74 FR 26651; Fr Doc. E9-12946) under the heading Applications Received (page 26651, column 3), permit 13675 was misidentified as permit 13791, and permit 14240 was misidentified as permit 14092. The first paragraph under the heading Applications Received (page 26651, column 3, sentence 1) should read as follows: "FFC requests a 5-year permit (13675) for take of juvenile Sacramento River winter-run Chinook salmon, Central Valley spring-run Chinook salmon, Central Valley steelhead, and juvenile North American green sturgeon associated with conducting surveys measuring fish response to initial and successional habitat conditions at a restored conservation bank site on the Sacramento River in the Central Valley, California."

The second paragraph under the heading Applications Received (page 26651, column 3, sentence 1) should read as follows: "CDFG requests a 5-year permit (14240) for take of threatened Central Valley spring-run Chinook salmon, threatened Central Valley steelhead, and threatened Southern DPS of North American green sturgeon in the lower Feather River, associated with monitoring and research activities conducted in the Feather River basin, Central Valley, California."

There are no changes to the remainder of the document.

Dated: January 10, 2011.

National Oceanic and Atmospheric Administration

RIN 0648-XA132

Fisheries in the Western Pacific; American Samoa Pelagic Longline Limited Entry Program

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; availability of permits.

SUMMARY: NMFS is soliciting applications for American Samoa pelagic longline limited entry permits. At least seven permits of various class sizes will be available for 2011. This notice announces the availability of permits and solicits applications for the permits.

DATES: Completed permit applications must be received by NMFS by May 16, 2011.

ADDRESSES: Request blank application forms from NMFS Pacific Islands Region (PIR), 1601 Kapiolani Blvd., Suite 1110, Honolulu, HI 96814-4733, or the PIR Web site <http://www.fpir.noaa.gov>.

Mail completed applications and payment to NMFS PIR, ATTN: ASLE Permits, 1601 Kapiolani Blvd., Suite 1110, Honolulu, HI 96814-4733.

FOR FURTHER INFORMATION CONTACT: Walter Ikehara, Sustainable Fisheries, NMFS PIR, tel 808-944-2275, fax 808-973-2940, or e-mail PIRO-permits@noaa.gov.

SUPPLEMENTARY INFORMATION: Federal regulations at 50 CFR 665.816 allow NMFS to issue new permits for the American Samoa pelagic longline limited entry program if the number of permits in a size class falls below the maximum allowed. At least seven permits are available for issuance (note that the number of available permits may change before the application period closes): four in Class A (vessels less than or equal to 40 ft (12.2 m)), and three in Class B (over 40 ft (12.2 m) through 50 ft (15.2 m)).

Persons with the earliest documented participation in the fishery on a Class A sized vessel will receive the highest priority for obtaining permits in any size class, followed by persons with the earliest documented participation in Classes B, C, and D, in that order. If there is a tie in priority, the person with the second earliest documented participation will be ranked higher in priority.

Complete applications must include the completed and signed application
