

determine which lands to identify for leasing, and what additional stipulations, if any would apply to those lands. Finally, the FNF LRMP has not yet been revised; therefore an amendment is needed to update direction for protecting surface resources relative to minerals management, specifically oil and gas exploration and development.

The purpose of this leasing analysis is to identify which lands would be available and approved for oil and gas leasing, to determine what standard or special lease stipulations would apply to which pieces of land for resource protection, to project the type and amount of post-leasing activity that would be reasonably foreseeable, and to analyze the potential impacts of reasonably foreseeable post-leasing activity.

Proposed Action

The proposed action is to make all lands administered by the FNF available for lease. The following areas would be leased with the No Surface Occupancy (NSO) stipulation: All Research Natural Areas; Quitcupah Canyon Cultural Area; Areas with slopes greater than 35 percent; North Horn sediment areas greater than 25 percent slope; Habitat within one mile of known threatened, endangered, or proposed (TEP) plants; Habitat of TEP species covered under a conservation agreement or recovery plan; Areas within 300 feet of riparian areas, wetlands, lakes, reservoirs, perennial streams, and springs; Municipal water source protection areas; Bald eagle winter concentration areas; Sage grouse leks and nesting habitat; Known colonies of pygmy rabbits; Key habitats for boreal toad; Developed recreation sites; Areas with a Primitive Recreation Opportunity Spectrum; Forest Service administrative sites and facilities; National Recreation Trails; Inventoried Roadless Areas as identified in the 2001 Roadless Area Conservation Rule.

The following areas would be leased with a Timing Limitation (TL) stipulation: Sage grouse brood-rearing areas (May 1 to July 5); Goshawk nesting and nest replacement areas (March 1 to September 30); Big game wintering areas (January 1 to April 15); Big game calving and fawning areas (May 1 to July 5).

The following areas would be leased with the Controlled Surface Use (CSU) stipulation:

Unstable lands; Sensitive plant habitat within one mile of known sites; Campground water systems; Goshawk post-fledging areas; Raptor nest areas; High scenic integrity areas (including areas seen from Capital Reef National

Park and Fremont Indian State Park); Areas with a Semi-Primitive Non-motorized Recreation Opportunity Spectrum; Air quality non-attainment areas; Cultural resource areas.

All other areas would be leased with standard lease terms and conditions. Lease notices (LN) would be included in leases to inform prospective bidders of restrictions required by law or regulation.

Possible Alternatives

In addition to the Proposed Action, the No Action alternative will be analyzed in detail. Under this alternative oil and gas leasing would occur under current management direction. Other alternatives could include a range of more restrictive lease stipulations placed on more acreage, and/or fewer acres approved for lease availability.

Lead and Cooperating Agencies

The USDA Forest Service is the lead agency. The USDI Bureau of Land Management, and the State of Utah are cooperating agencies.

Responsible Official

The responsible official is the Forest Supervisor of the Fishlake National Forest.

Nature of Decision To Be Made

The Forest Supervisor of the Fishlake National Forest will decide which lands administered by the FNF will be administratively available for oil and gas leasing, and what stipulations would be applied to future leases. The Forest Supervisor will also decide whether to approve a non-significant Forest Plan amendment to update management direction for leasable minerals. This decision will not result in ground-disturbing activities such as exploration, drilling, or field development. Any ground disturbing activity that may be proposed subsequent to leasing would require further site-specific review and environmental analysis prior to approval as outlined in current Federal regulations (36 CFR 228.107).

Scoping Process

The initial scoping period started when the NOI was published in 2006. There is an opportunity to submit additional comments not already submitted, for 30 days after publication of this Corrected NOI.

A series of public meetings were held in July and August, 2006. No additional public meetings are planned at this time. The proposal has been listed on

the FNF Schedule of Proposed Actions since 2006.
