

the following conditions: (i) It must be classified in the Retail Trade or Accommodation and Food Services sector; (ii) it must be an active operating establishment of a multi-establishment firm (*i.e.*, a firm that operates at more than one physical location), or it must be a single-establishment firm with payroll (*i.e.*, a firm operating at only one physical location); and (iii) it must be located in one of the 50 States or the District of Columbia. Mail selection procedures will distinguish the following groups of establishments:

#### 1. Establishments of Multi-Establishment Firms

All active operating establishments of multi-establishment firms will be included in the mail component of the potential respondent universe. We estimate that the 2012 Economic Census mail canvasses for the Retail Trade and Accommodation and Food Services sectors will include approximately 710,000 establishments of multi-establishment firms.

#### 2. Single-Establishment Firms With Payroll

As an initial step in the selection process, we will conduct a study of the potential respondent universe. This study will produce a set of industry-specific payroll cutoffs that we will use to distinguish large versus small single-establishment firms within each industry or kind of business. This payroll size distinction will affect selection as follows:

##### a. Large Single-Establishment Firms

All single-establishment firms having annualized payroll (from Federal administrative records) that equals or exceeds the cutoff for their industry will be included in the mail component of the potential respondent universe. We estimate that the 2012 Economic Census mail canvasses for the Retail Trade and Accommodation and Food Services sectors will include approximately 274,000 large single-establishment firms.

##### b. Small Single-Establishment Firms

A sample of single-establishment firms having annualized payroll below the cutoff for their industry will be included in the mail component of the potential respondent universe. Sampling strata and corresponding probabilities of selection will be determined by a study of the potential respondent universe conducted shortly before the mail selection operations begin. We estimate that the 2012 Economic Census mail canvasses for the Retail Trade and Accommodation and

Food Services sectors will include approximately 217,000 small single-establishment firms selected in this sample.

All remaining single-establishment firms with payroll will be represented in the census by data from Federal administrative records. Generally, we will not include these small employers in the census mail canvasses. However, administrative records sometimes have fundamental industry classification deficiencies that make them unsuitable for use in producing detailed industry statistics by geographic area. When we find such a deficiency, we will mail the firm a census classification form. We estimate that the 2012 Economic Census mail canvasses for the Retail Trade and Accommodation and Food Services sectors will include approximately 133,000 small single-establishment firms that receive these forms.

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

The economic census, conducted under authority of Title 13, United States Code (U.S.C.), is the primary source of facts about the structure and functioning of the Nation's economy. Economic statistics serve as part of the framework for the national accounts and provide essential information for

government, business, and the general public. Economic data are the Census Bureau's primary program commitment during nondecennial census years. The 2012 Economic Census covering the Wholesale Trade sector (as defined by the North American Industry Classification System (NAICS)) will measure the economic activity of more than 450,000 establishments. The information collected will produce basic statistics by kind of business on the number of establishments, sales, payroll, and employment. It will also yield a variety of subject statistics, including sales by product line, sales by class of customer, and other industry-specific measures. Primary strategies for reducing burden in Census Bureau economic data collections are to increase reporting through standardized questionnaires and broader electronic data collection methods.

## II. Method of Collection

### Mail Selection Procedures

Establishments in the Wholesale Trade sector of the economic census will be selected from the Census Bureau's Business Register for a mail canvass. To be eligible for selection, an establishment will be required to satisfy the following conditions: (i) It must be classified in the Wholesale Trade sector; (ii) it must be an active operating establishment of a multi-establishment firm (*i.e.*, a firm that operates at more than one physical location), or it must be a single-establishment firm with payroll (*i.e.*, a firm operating at only one physical location); and (iii) it must be located in one of the 50 States or the District of Columbia. Mail selection procedures will distinguish the following groups of establishments:

#### 1. Establishments of Multi-Establishment Firms

All active operating establishments of multi-establishment firms will be included in the mail component of the potential respondent universe. We estimate that the 2012 Economic Census mail canvass for the Wholesale Trade sector will include approximately 134,000 establishments of multi-establishment firms.

#### 2. Single-Establishment Firms With Payroll

All single-establishment firms having annualized payroll (from Federal administrative records) will be included in the mail component of the potential respondent universe. We estimate that the 2012 Economic Census mail canvass for the Wholesale Trade sector will include approximately 316,000

establishments of single-establishment firms.

#### Certain Welded Carbon Steel Pipe and Tube From Turkey: Extension of Time Limit for Preliminary Results of Antidumping Duty Administrative Review

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**FOR FURTHER INFORMATION CONTACT:** Victoria Cho or Dennis McClure, AD/CVD Operations, Office 3, Import Administration, International Trade Administration, U.S. Department of Commerce, Room 4014, 14th Street and Constitution Ave., NW., Washington, DC 20230, telephone: (202) 482-5075 or (202) 482-5973, respectively.

#### SUPPLEMENTARY INFORMATION:

##### Background

On June 30, 2010, the U.S. Department of Commerce ("the Department") published a notice of initiation of the administrative review of the antidumping duty order on certain welded carbon steel pipe and tube from Turkey covering the period May 1, 2009, through April 30, 2010. *See Initiation of Antidumping and Countervailing Duty Administrative Reviews and Requests for Revocation in Part*, 75 FR 37759 (June 30, 2010). The preliminary results are currently due no later than January 30, 2011.

##### Extension of Time Limit for Preliminary Results

Section 751(a)(3)(A) of the Tariff Act of 1930, as amended ("the Act"), requires the Department to make a preliminary determination within 245 days after the last day of the anniversary month of an order for which a review is requested. Section 751(a)(3)(A) of the Act further states that if it is not practicable to complete the review within the time period specified, the administering authority may extend the 245-day period to issue its preliminary results to up to 120 days.

We determine that completion of the preliminary results of this review within the 245-day period is not practicable because we have complex technical issues relating to quarterly cost and affiliated parties, which require additional information and analysis for this administrative review. Due to these reasons and in accordance with section 751(a)(3)(A) of the Act, we are extending the time period for issuing the preliminary results of the review by 120 days. The preliminary results are now
