BILLING CODE 7536–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 52–037; NRC–2008–0556]

Ameren Missouri; Combined License Application for Callaway Plant Unit 2; Exemption

1.0 Background

Union Electric Company, doing business as Ameren UE, submitted to the U.S. Nuclear Regulatory Commission (NRC) a Combined License (COL) Application for a single unit of AREVA NP’s U.S. EPR in accordance with the requirements of Title 10 of the Code of Federal Regulations (10 CFR), subpart C of part 52, “Licenses, Certifications, and Approvals for Nuclear Power Plants.” This reactor is to be identified as Callaway Plant (Callaway), Unit 2, and located at the current Callaway County, Missouri site of the Callaway Power Plant. The Callaway, Unit 2, COL application is based upon and linked to the U.S. EPR reference COL (RCOL) application for UniStar’s Calvert Cliffs Nuclear Power Plant, Unit 3 (CCNPP3). The NRC docketed the Callaway, Unit 2, COL application on December 12, 2008. In its letter to the NRC dated April 28, 2009, Ameren informed that it was suspending its efforts to build a nuclear power plant in Missouri. Subsequently, by letter dated June 23, 2009, Ameren requested the NRC to suspend all review activities relating to the Callaway, Unit 2, COL application. The NRC informed Ameren by letter dated June 29, 2009, that it had suspended all review activities relating to the Callaway, Unit 2, COL application. The NRC is currently performing a detailed review of the CCNPP3 RCOL application, as well as AREVA NP’s application for design certification of the U.S. EPR.

2.0 Request/Action

The regulations specified in 10 CFR 50.71(o)(3)(iii) require that an applicant for a combined license under 10 CFR part 52 shall, during the period from docketing of a COL application until the Commission makes a finding under 10 CFR 52.103(g) pertaining to facility operation, submit an annual update to the application’s Final Safety Analysis Report (FSAR), which is a part of the application.

On February 25, 2009, Ameren submitted Revision 1 to the COL application, including updates to the FSAR. Pursuant to 10 CFR 50.71(o)(3)(iii), the next annual update would be due in December 2010. Union Electric Company, doing business as Ameren Missouri (Ameren) as of October 1, 2010, as noted in its letter to the NRC dated October 26, 2010, has requested a one-time exemption from the 10 CFR 50.71(o)(3)(iii) requirements to submit the scheduled 2010 and 2011 COL application FSAR updates, and proposed for approval of a new submittal deadline of December 31, 2012, for the next FSAR update.

In summary, the requested exemption is a one-time schedule change from the requirements of 10 CFR 50.71(o)(3)(iii). The exemption would allow Ameren to submit the next FSAR update at a later date, but still in advance of NRC’s reinspecting its review of the application and in any event, by December 31, 2012. The current FSAR update schedule could not be changed, absent the exemption. Ameren requested the exemption by letter dated October 26, 2010 (Agencywide Documents Access and Management System (ADAMS) Accession Number ML103090556).

3.0 Discussion

Pursuant to 10 CFR 50.12, the NRC may, upon application by any interested person or upon its own initiative, grant exemptions from the requirements of 10 CFR Part 50, including Section 50.71(o)(3)(iii) when: (1) the exemptions are authorized by law, will not present an undue risk to public health or safety, and are consistent with the common defense and security; and (2) special circumstances are present. As relevant to the requested exemption, special circumstances exist if: (1) “Application of the regulation in the particular circumstances would not serve the underlying purpose of the rule or is not necessary to achieve the underlying purpose of the rule” (10 CFR 50.12(a)(2)(ii)); (2) “Compliance would result in undue hardship or other costs that are significantly in excess of those contemplated when the regulation was
