SUPPLEMENTARY INFORMATION: Exports of electricity from the United States to a foreign country are regulated by the Department of Energy (DOE) pursuant to sections 301(b) and 402(f) of the Department of Energy Organization Act (42 U.S.C. 7151(b), 7172(f)) and require authorization under section 202(e) of the FPA (16 U.S.C. 824a(e)).

On August 31, 1999 the Department of Energy (DOE) issued Order No. EA-216, which authorized TEMUS to transmit electric energy from the United States to Canada as a power marketer for a two-year term using existing international transmission facilities. DOE renewed the TEMUS export authorization two additional times: On August 16, 2001 in Order No. EA-216-A and again on May 17, 2006 in Order No. EA-216-B. Order No. EA-216-B will expire on May 17, 2011. On December 22, 2010, TEMUS filed an application with DOE for renewal of the export authority contained in Order No. EA-216-B for a five-year term.

The electric energy that TEMUS proposes to export to Canada would be surplus energy purchased from electric utilities, Federal power marketing agencies, and other entities within the United States. The existing international transmission facilities to be utilized by TEMUS have previously been authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.

Procedural Matters: Any person desiring to become a party to these proceedings or to be heard by filing comments or protests to this application should file a petition to intervene, comment, or protest at the address provided above in accordance with §§ 385.211 or 385.214 of the Federal Energy Regulatory Commission's Rules of Practice and Procedures (18 CFR 385.211, 385.214). Fifteen copies of each petition and protest should be filed with DOE and must be received on or before the date listed above.

Comments on the TEMUS application to export electric energy to Canada should be clearly marked with Docket No. 216-C. Additional copies (one each) are to be filed directly with Sterling Koch, TransAlta Corporation, 110-12th Avenue, SW., Calgary Alberta, Canada

T2P 2M1 and Stephen Angle, Vinson & Elkins L.L.P., The Willard Office Building, 1455 Pennsylvania Avenue, NW., Washington, DC 20004. A final decision will be made on this application after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR Part 1021) and after a determination is made by DOE that the proposed action will not have an adverse impact on the reliability of the U.S. electric power supply system.

Copies of this application will be made available, upon request, for public inspection and copying at the address provided above, by accessing the program Web site at http://www.oe.energy.gov/permits_pending.htm, or by e-mailing Odessa Hopkins at Odessa.Hopkins@hq.doe.gov.

Title: Willingness to Pay Survey for Section 316(b) Existing Facilities Cooling Water Intake Structures: Instrument, Pre-test, and Implementation.

ICR numbers: EPA ICR No. 2402.01, OMB Control No. 2040-NEW.

ICR status: This ICR is for a new information collection activity. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Section 316(b) of the Clean Water Act (CWA) requires EPA to ensure that the location, design, construction, and capacity of cooling water intake structures (CWIS) reflect the best technology available (BTA) to protect aquatic organisms from being killed or injured by impingement or entrainment. At question here is the regulation of the existing steam electric and manufacturing facilities.

Under Executive Order 12866, EPA is required to estimate the potential benefits and costs to society of proposed rule options of significant rules. To assess the importance of the ecological gains from the section 316(b) regulation, EPA requests approval from the OMB to conduct a stated preference survey. Data from the associated stated preference survey will be used to estimate values (willingness to pay, or WTP) derived by households for changes related to the reduction of fish losses at CWIS, and to provide information to assist in the interpretation and validation of survey responses. EPA has designed the survey to provide data to support the following specific objectives: [a] The estimation of the total values that individuals place on preventing losses of fish and other aquatic organisms caused by 316(b) facilities; [b] to understand how much individuals value preventing fish losses,
