SUPPLEMENTARY INFORMATION:**I. Abstract**

The Automated Export System (AES), is the instrument used for collecting export trade information. The data collected from this source is compiled by the U.S. Census Bureau and functions as the basis for the official U.S. export trade statistics. These statistics are used to determine the balance of international trade, and are also designated for use as a principal economic indicator. The Census Bureau plans to publish a Notice of Proposed Rule (NPR) addressing these changes and giving the
