*Proposed Project:* Evaluation of the IT Professionals in Health Care Workforce Program: University-Based Training—OMB No. 0090-NEW—Office of the National Coordinator for Health Information Technology (ONC).

*Abstract:* Currently, the Office of the National Coordinator for Health Information Technology's (ONC) Office of the Chief Scientist is soliciting comments on a series of data collection efforts for the Evaluation of the IT Professionals in Health Care Workforce Program: University-Based Training. The Workforce Program, created under

Section 3016 of the HITECH Act, was intended to provide "assistance to institutions of higher education (or consortia thereof) to establish or expand health informatics education programs, including certification, undergraduate, and masters degree programs, for both health care and information technology students." The evaluation of the Workforce Program is a new information collection activity which will explore program challenges, provide critical formative feedback to the Workforce grantee institutions on their activities, and determine whether the Workforce Program overall was successful in helping to build a skilled workforce equipped to meet the heightened demands of the current environment. The data collection efforts include a web-based baseline survey and a web-based follow-up survey of university students.

This study will use surveys and other forms of data collection, such as focus groups and interviews, to assess the outcomes associated with participation in the program and to provide useful feedback to the Workforce grantee institutions for continuous improvement. The data collection efforts include a web-based baseline survey and a web-based follow-up survey of university students enrolled in ONC funded programs.
