

complete a second 24-hour dietary recall in rounds 2 and 3); an additional sample of 66 SNAP recipients who will participate in focus groups (90% response rate); 207 retailers (80% percent will complete survey); 19 State and local SNAP officials (89% will complete the interview); 6 State and local partners (83% will complete the interview); and 9 EBT vendors/third party processors/integrated retailers (89% will complete the interview).

Estimated Number of Responses per Respondent: Data from SNAP recipients

will be collected three times, through telephone interviews, in-person interviews, and focus groups. A 10 percent subsample of the SNAP recipients will complete a second 24-hour dietary recall on a nonconsecutive day. Stakeholder data will be gathered through retailer surveys and observations; in-person interviews will also be conducted with State and local officials, State and local partners, EBT vendors, third party processors, and integrated retailers.

Estimated Total Annual Responses: 8,221.

Estimated Time per Response: About 35 minutes (0.58 hours). The estimated time of response varies from 3 to 90 minutes depending on respondent group, as shown in the table below.

Estimated Total Annual Burden on Respondents: 286,154 minutes (4769.24 hours). See the table below for estimated total annual burden for each type of respondent.

SUPPLEMENTARY INFORMATION:

Title: Generic Clearance to Conduct Survey Research Studies.

OMB Control Number: 0535–0248.

Type of Request: To revise and extend a currently approved information collection for a period of three years.

Abstract: The National Agricultural Statistics Service (NASS) of the United States Department of Agriculture (USDA) will request approval from the Office of Management and Budget (OMB) for generic clearance that will allow NASS to rigorously develop, test, and evaluate its survey instruments and methodologies. The primary objectives of the National Agricultural Statistics Service are to prepare and issue State and national estimates of crop production, livestock production, economic statistics, and environmental statistics related to agriculture and to conduct the Census of Agriculture. This request is part of an on-going initiative to improve NASS surveys, as recommended by both its own guidelines and those of OMB.

In the last decade, state-of-the-art techniques have been increasingly instituted by NASS and other Federal agencies and are now routinely used to improve the quality and timeliness of survey data and analyses, while simultaneously reducing respondents' cognitive workload and burden. The purpose of this generic clearance is to allow NASS to continue to adopt and use these state-of-the-art techniques to improve its current data collections on agriculture. They will also be used to aid in the development of new surveys.

NASS envisions using a variety of survey improvement techniques, as

appropriate to the individual project under investigation. These include focus groups, cognitive and usability laboratory and field techniques, exploratory interviews, behavior coding, respondent debriefing, pilot surveys, and split-panel tests.

Following standard OMB requirements NASS will submit a change request to OMB individually for each survey improvement project it undertakes under this generic clearance and provide OMB with a copy of the questionnaire (if one is used), and all other materials describing the project.

These data will be collected under the authority of 7 U.S.C. 2204(a).

Individually identifiable data collected under this authority are governed by Section 1770 of the Food Security Act of 1985, 7 U.S.C. 2276, which requires USDA to afford strict confidentiality to non-aggregated data provided by respondents. This Notice is submitted in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–113) and Office of Management and Budget regulations at 5 CFR part 1320 (60 FR 44978, August 29, 1995). NASS also complies with OMB Implementation Guidance, "Implementation Guidance for Title V of the E-Government Act, Confidential Information Protection and Statistical Efficiency Act of 2002 (CIPSEA)," *Federal Register*, Vol. 72, No. 115, June 15, 2007, p. 33362.

Estimate of Burden: Public reporting burden for these collections of information is estimated to average from 30 minutes to 2 hours per respondent, dependant upon the survey and the technique used to test for that particular survey.

Respondents: Farmers, ranchers, farm managers, farm contractors, agri-businesses, and households.

Estimated Number of Respondents: 3,300.

Frequency of Responses: On occasion.

Estimated Total Annual Burden: 4,950 hours.

Copies of this information collection and related instructions can be obtained without charge from David Hancock, NASS Clearance Officer, at (202) 690–2388.

Comments: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the

burden of the collection of information on those who are to respond, through the use of appropriate automated, electronic, mechanical, technological or other forms of information technology collection methods.

All responses to this notice will become a matter of public record and be summarized in the request for OMB approval.

Signed at Washington, DC, January 20, 2011.

Joseph T. Reilly,

Associate Administrator.
