

changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Owners or operators of stationary spark ignition internal combustion engines.

Estimated Number of Respondents: 17,052.

Frequency of Response: Initially and on-occasion.

Estimated Total Annual Hour Burden: 22,634.

Estimated Total Annual Cost: \$4,426,590, which includes \$2,123,623 in labor costs, no capital/startup costs, and \$2,302,967 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is a decrease in the total estimated labor hour burden as currently identified in the OMB Inventory of Approved ICR Burdens because the rule is now fully implemented. The previous ICR covered the initial phase of standard implementation which occurred over a three-year period. This ICR shows the labor hour and cost burden after full implementation. This decrease is not due to any program changes.

The change in cost to Respondents and the Agency is due to both labor rate adjustments to reflect the most recent available estimates and an overall decrease in burden.

Dated: February 3, 2011.

Director, Collection Strategies Division.

Title: NESHAP for Benzene Emissions from Benzene Storage Vessels and Coke By-Product Recovery Plants (Renewal)

ICR Numbers: EPA ICR Number 1080.13, OMB Control Number 2060-0185.

ICR Status: This ICR is scheduled to expire on February 28, 2011. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR Part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR Part 9.

Abstract: The affected entities are subject to the General Provisions of the National Emission Standards for Hazardous Air Pollutants (NESHAP) at 40 CFR part 61, subpart A, and to the provisions at 40 CFR part 61, subpart L. Owners or operators of the affected facilities must submit a one-time-only report of any physical or operational changes, initial performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 92 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or

for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Owners or operators of benzene storage vessels and coke by product recovery plants.

Estimated Number of Respondents: 17.

Frequency of Response: Semiannually and on occasion.

Estimated Total Annual Hour Burden: 3,137.

Estimated Total Annual Cost: \$294,347 in labor costs; there are neither capital/startup costs nor operation and maintenance (O&M) costs.

Changes in the Estimates: There is no change in the labor hours, or capital/startup and operation and maintenance costs in this ICR compared to the previous ICR. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for the industry is very low, negative, or non-existent.

It should be noted that the wage rates in this ICR have been updated resulting in an overall increase in the labor cost.

Dated: February 3, 2011.

Director, Collection Strategies Division.
