

in the Russian River mainstem between the Dry Creek confluence and the estuary. Backpack and boat electrofishing, hook and line sampling and otter trawling (in the estuary) will be utilized to capture native and non-native species inhabiting the river to understand the relative abundance of predatory species. Timing and gear will minimize capture of salmonids, if ESA-listed salmonids are captured they will be held in a live well with oxygenated water, measured and released. All adult piscivorous fish captured will be measured, scale sampled and will have their stomach contents removed and analyzed.

This notice is provided pursuant to section 10(c) of the ESA. NMFS will evaluate the application, associated documents, and comments submitted to determine whether the application meets the requirements of section 10(a) of the ESA and Federal regulations. The final permit decision will not be made until after the end of the 30-day comment period. NMFS will publish notice of its final action in the **Federal Register**.

## DEPARTMENT OF DEFENSE

### Office of the Secretary

**[Docket ID: DOD-2011-HA-0019]**

### Proposed Collection; Comment Request

**AGENCY:** Office of the Assistant Secretary of Defense for Health Affairs, DoD.

**ACTION:** Notice.

**SUMMARY:** In compliance with Section 3506(c)(2)(A) of the *Paperwork Reduction Act of 1995*, the Office of the Assistant Secretary of Defense for Health Affairs announces a proposed new public information collection and seeks public comment on the provisions thereof. Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed information collection; (c) ways to

enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

**DATES:** Consideration will be given to all comments received by April 18, 2011.

**ADDRESSES:** You may submit comments, identified by docket number and title, by any of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.
- *Mail:* Federal Docket Management System Office, Mailroom 3C843, 1160 Defense Pentagon, Washington, DC 20301-1160.

*Instructions:* All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at <http://www.regulations.gov> as they are received without change, including any personal identifiers or contact information.

**FOR FURTHER INFORMATION CONTACT:** To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to the Office of Strategy Management (OSM)/OASD/HA TMA, ATTN: Dr. Michael Dinneen, 5111 Leesburg Pike, Suite 601, Falls Church, VA 22041-3206, or call OSM, Office of Strategy Management, at 703-681-1703. *Title; Associated Form; and OMB Number:* Electronic Health Record (EHR) Usability Survey; OMB Control Number 0720-TBD.

*Needs and Uses:* The intended use of the information collection is to develop a longitudinal measure of how end-users perceive the usability of the Department of Defense (DoD) suite of Electronic Health Record (EHR) applications.

Until recently, understanding the performance of EHR systems focused on functionality and user satisfaction. Now the focus has shifted towards understanding the usability of a system. This usability attribute describes the ease with which people can use the system to achieve a goal, and consists of three measurable components: efficiency, effectiveness, and satisfaction.

As the Military Health Systems (MHS) moves towards developing the next generation of EHR applications, it is important to obtain baseline usability
