this collection of information is estimated to average 40 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Manufacturers and importers of consumer products.

Estimated Number of Respondents: 732.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 29,613.

Estimated Total Annual Cost: $1,364,069 in labor costs; there are no capital/startup costs or O&M costs associated with this ICR.

Changes in the Estimates: There is no change in the labor hours or capital and O&M costs to the respondents in this ICR compared to the previous ICR because the regulations have not changed over the past three years and are not anticipated to change over the next three years. However, the change in labor costs for industry and EPA is due to the use of more current labor rates.

Dated: February 16, 2011.

ACTION: Notice of document availability and request for comments.

SUMMARY: The Draft Inventory of U.S. Greenhouse Gas Emissions and Sinks: 1990–2009 is available for public review. Annual U.S. emissions for the period of time from 1990 through 2009 are summarized and presented by source category and sector. The inventory contains estimates of carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O), hydrofluorocarbons (HFC), perfluorocarbons (PFC), and sulfur hexafluoride (SF₆) emissions. The inventory also includes estimates of carbon fluxes in U.S. agricultural and forest lands. The technical approach used in this report to estimate emissions and sinks for greenhouse gases is consistent with the methodologies recommended by the Intergovernmental Panel on Climate Change (IPCC), and reported in a format consistent with the United Nations Framework Convention on Climate Change (UNFCCC) reporting guidelines. The Inventory of U.S. Greenhouse Gas Emissions and Sinks: 1990–2009 is the latest in a series of annual U.S. submissions to the Secretariat of the UNFCCC.
