FOR FURTHER INFORMATION CONTACT:

Laura Morse or Carrie Hubard, (301) 713-2289.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222-226), and the Fur Seal Act of 1966, as amended (16 U.S.C. 1151 *et seq.*).

Dr. Baird proposes to conduct research on forty species of cetaceans and unidentified mesoplodon and baleen species in all U.S. and international waters in the Pacific Ocean, including Alaska, Washington, Oregon, California, Hawaii, and other U.S. territories. Eight of the forty species to be targeted for research are listed as endangered or have a stock listed as endangered: blue whale (*Balaenoptera*

musculus), fin whale (*B. physalus*), humpback whale (*Megaptera novaeangliae*), right whale (*Eubalaena japonica*), sei whale (*B. borealis*), beluga whale (*Delphinapterus leucas*) Cook Inlet stock, killer whale (*Orcinus orca*) southern resident stock, and sperm whale (*Physeter macrocephalus*). The false killer whale (*Pseudorca crassidens*) Hawaiian insular stock is proposed for listing under the ESA. Seven species of pinnipeds may be incidentally harassed from research activities, including three species listed as endangered: Steller sea lions (*Eumetopias jubatus*), Guadalupe fur seals (*Arctocephalus townsendi*), and Hawaiian monk seals (*Monachus schauinslandi*). The purposes of the proposed research are to study: (1) Population size and structure, (2) range and movement patterns, (3) diving and night-time behavior, (4) social organization, (5) feeding ecology, and (6) disease monitoring. Harassment of all species of cetaceans may occur through vessel approach for sighting surveys, photographic identification, behavioral research, opportunistic sampling (breath, sloughed skin, fecal material, and prey remains), and aerial over-flights for the purpose of locating animals and conducting aerial validation studies. All cetaceans species (except harbor porpoise, right whales, and Cook Inlet beluga whales) and unidentified mesoplodon and baleen species would be dart and/or suction-cup tagged. Import and export of marine mammal prey specimens, sloughed skin, fecal and breath samples obtained is requested for research purposes. Research would occur over a five-year period.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), a draft environmental assessment (EA) has been prepared to examine whether significant environmental impacts could result from issuance of the proposed scientific research permit. The draft EA is available for review and comment simultaneous with the scientific research permit application.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.
