Notice of Vitamin D Standardization Program

SUMMARY: The Office of Dietary Supplements (ODS) of the National Institutes of Health (NIH) is collaborating with the Centers for Disease Control and Prevention (CDC), the National Institute of Standards and Technology (NIST) and with national health surveys around the world to lead an international effort to study the differences and similarities in serum 25-hydroxyvitamin D [25(OH)D] distributions around the world. A key first step in that process is the standardization of the measurement results of serum 25(OH)D from the different health surveys to a higher-order method developed by NIST.

This program includes but is not limited to the creation of serum materials with values assigned by a reference method that can be used for calibration and trueness control by laboratories measuring 25(OH)D. These materials will be made available through the newly created CDC Vitamin D Standardization Coordinating Center (VDSCC). While the main focus of the Vitamin D Standardization Program is on standardizing measurements done in national health surveys, it also allows for participation of clinical, public health, research and commercial laboratories and commercial trade organizations in the standardization effort.

SUPPLEMENTARY INFORMATION:

Public Participation and Request for Comments

This Notice relies on the authority of the Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended. An ICR is an application to OIRA seeking the approval, extension, or renewal of a Coast Guard collection of information (Collection). The ICR contains information describing the Collection's purpose, the Collection's likely burden on the affected public, an explanation of the necessity of the Collection, and other important information describing the Collections. There is one ICR for each Collection.

The Coast Guard invites comments on whether these ICRs should be granted based on the Collections being necessary for the proper performance of Departmental functions. In particular, the Coast Guard would appreciate comments addressing: (1) The practical utility of the Collections; (2) the accuracy of the estimated burden of the Collections; (3) ways to enhance the quality, utility, and clarity of information subject to the Collections; and (4) ways to minimize the burden of the Collections on respondents, including the use of automated collection techniques or other forms of information technology. In response to your comments, we may revise these ICRs or decide not to seek an extension of approval for the Collections. We will consider all comments and material received during the comment period.

We encourage you to respond to this request by submitting comments and
