Title: Underground Storage Tanks: Technical and Financial Requirements and State Program Approval Procedures (Renewal).

ICR numbers: EPA ICR No. 1360.12, OMB Control No. 2050-0068.

ICR Status: This ICR is scheduled to expire on March 31, 2011. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Subtitle I of the Resource Conservation and Recovery Act (RCRA), as amended, requires that EPA develop standards for UST systems, as may be necessary, to protect human health and the environment, and procedures for approving state programs in lieu of the federal program. EPA promulgated technical and financial requirements for owners and operators of USTs at 40 CFR part 280, and state program approval procedures at 40 CFR part 281. This ICR is a comprehensive presentation of all information collection requirements contained at 40 CFR parts 280 and 281.

The data collected for new and existing UST system operations and financial requirements are used by owners and operators and/or EPA or the implementing agency to monitor results of testing, inspections, and operation of UST systems, as well as to demonstrate compliance with regulations. EPA believes strongly that if the minimum requirements specified under the regulations are not met, neither the facilities nor EPA can ensure that UST systems are being managed in a manner protective of human health and the environment.

EPA uses state program applications to determine whether to approve a state program. Before granting approval, EPA must determine that programs will be no less stringent than the federal program and contain adequate enforcement mechanisms.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is

estimated to average 14 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: UST facilities and states.

Estimated Number of Respondents: 211,040.

Frequency of Response: Once, on occasion, monthly, and annually.

Estimated Total Annual Hour Burden: 6,751,058.

Estimated Total Annual Cost: \$479,490,266 (\$199,841,753 in labor costs; \$60,337,980 in annualized capital/startup costs; and \$219,310,531 in operation and maintenance costs).

Changes in the Estimates: There is an increase of 781,841 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This is due to updated respondent universe and burden estimates.

Dated: February 25, 2011.

Director, Collection Strategies Division.

Title: Regulatory Pilot Projects (Renewal).

ICR numbers: EPA ICR No. 1755.09, OMB Control No. 2010-0026.

ICR Status: This ICR is scheduled to expire on March 31, 2011. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This is an information collection request renewal that will allow for the continued solicitation of proposals for innovative pilot projects and to allow EPA to continue its commitments to monitor the results of ongoing pilot tests of regulatory innovation. The renewal of this ICR is important as it will allow the Agency to continue to measure performance outcomes of regulatory innovation piloting and to assess the broader applicability of those pilot projects. The ICR is also necessary to allow EPA to identify State and Tribal co-regulators as well as other stakeholders who are interested in partnering with EPA in innovative pilot projects, allowing the Agency to continue its commitment to innovation and regulatory flexibility with facilities, communities, and states in achieving environmental results. The renewal of this ICR will allow the Office of Policy to continue to work with potential stakeholders on innovative

approaches to achieve improved environmental results.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 5 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Respondents/Affected Entities: States and regulated entities participating in EPA regulatory pilot projects.

Estimated Number of Respondents: 832.

Frequency of Response: Quarterly, annually, on occasion.

Estimated Total Annual Hour Burden: 4,680 hours.

Estimated Total Annual Cost: \$258,694. This is exclusively for labor as there are no capital investment or maintenance and operational costs.

Changes in the Estimates: There is a decrease of 3,068 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This reflects the reduced number of Project XL and State Innovation Grant projects reporting as those programs come to a close.

Dated: February 25, 2011.
