This notice also serves as the only reminder to parties subject to
administrative protective order (“APO”) of their responsibility concerning the
return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely notification of the return or destruction of APO materials or conversion to judicial protective orders is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

We are issuing and publishing the final results and notice in accordance with sections 751(c), 752(c), and 777(f)(1) of the Act.

Dated: March 1, 2011.

Ronald K. Lorentzen,
Deputy Assistant Secretary for Import Administration.

DEPARTMENT OF COMMERCE
International Trade Administration
[A–570–929]
Small Diameter Graphite Electrodes From the People’s Republic of China: Preliminary Results of the First Administrative Review of the Antidumping Duty Order; Partial Rescission of Administrative Review; and Intent To Rescind Administrative Review, in Part

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: In response to requests from interested parties, the Department of Commerce, (“Department”) is conducting the first administrative review of the antidumping duty order on small diameter graphite electrodes (“SDGE”) from the People’s Republic of China (“PRC”), covering the period August 21, 2008, through January 31, 2010. The Department has preliminarily determined that during the period of review (“POR”) respondents in this proceeding have made sales of subject merchandise at less than normal value (“NV”). If these preliminary results are adopted in our final results of review, we will instruct U.S. Customs and Border Protection (“CBP”) to assess antidumping duties on all appropriate entries of subject merchandise during the POR. The Department is also rescinding this review for those exporters for which requests for review were timely withdrawn. For the companies for which this review is rescinded, antidumping duties shall be assessed at rates equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption. Furthermore, we determine that four companies for which a review was requested have not been responsive, and thus have not demonstrated entitlement to a separate rate. As a result, we have preliminarily determined that they are part of the PRC-wide entity, and continue to be subject to the PRC-wide entity rate. Further, the Department intends to rescind this administrative review with respect to UK Carbon & Graphite (“UKCG”) if the Department concludes that there were no entries, exports, or sales of the subject merchandise to the United States during the POR. Interested parties are invited to comment on these preliminary results. We will issue final results no later than 120 days from the date of publication of this notice, pursuant to section 751(a)(3)(A) of the Tariff Act of 1930, as amended (“the Act”).

DATES: Effective Date: March 7, 2011.

FOR FURTHER INFORMATION CONTACT: Lindsey Novom or Frances Veith, AD/VD Operations, Office 8, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington DC 20230; telephone: (202) 482–5256 or (202) 482–4295, respectively.

Background
On February 26, 2009, the Department published in the Federal Register the antidumping duty order on SDGE from the PRC. On February 1, 2010, the Department published a notice of opportunity to request an administrative review of the antidumping duty order on SDGE from the PRC. On February 23, 25 February, and February 26, 2010, the Department received timely requests for an administrative review of this antidumping duty order in accordance with 19 CFR 351.213(b) from Fushun Jinyi Petrochemical Carbon Co., Ltd (“Fushun Jinyi”), Xinghe County Muzi Carbon Co., Ltd (“Muzi Carbon”), and Beijing Fangda Carbon Tech Co., Ltd. (“Beijing Fangda”), Chengdu Rongguang

1 See “Partial Rescission of the Administrative Review” section below.
2 See “Separate Rates” section below.
3 See “Use of Adverse Facts Available” section below.
4 See “Intent To Rescind, in Part, the Administrative Review” section below.
5 See Antidumping Duty Order: Small Diameter Graphite Electrodes From the People’s Republic of China, 74 FR 8775 (February 26, 2009).
6 See Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity to Request Administrative Review, 75 FR 5037 (February 1, 2010).
Petitioners a timely request for rescission of review for 100 of the 112 companies for which the Department initiated a review. \textsuperscript{13} Between June 4, 2010, and December 30, 2010, the Fangda Group and Fushun Jinly responded to the Department’s original and supplemental questionnaires.

On October 19, 2010, the Department published a notice in the \textit{Federal Register} extending the time limit for the preliminary results of review by the full 120 days allowed under section 751(a)(3)(A) of the Act to February 28, 2011. \textsuperscript{14}

Between January 10 and January 21, 2011, the Department conducted verifications of two of the Fangda Group entities (Beijing Fangda and Fushun Carbon), as well as, Fushun Jinly and one of its tollers, Fushun Hexie Carbon Product Co., Ltd (“Hexie”). \textsuperscript{15}

\textbf{Period of Review}

The POR is August 21, 2008, through January 30, 2011.

\textbf{Scope of the Order}

The merchandise covered by this order includes all small diameter graphite electrodes of any length, whether or not finished, of a kind used in furnaces, with a nominal or actual diameter of 400 millimeters (16 inches) or less, and whether or not attached to a graphite pin joining system or any other type of joining system or hardware. The merchandise covered by this order also includes graphite pin joining systems for small diameter graphite electrodes, of any length, whether or not finished, of a kind used in furnaces, and whether or not the graphite pin joining system is attached to, sold with, or sold separately from, the small diameter graphite electrode. Small diameter graphite electrodes and graphite pin joining systems for small diameter graphite electrodes are most commonly used in primary melting, ladle metallurgy, and specialty furnace applications in industries including foundries, smelters, and steel refining operations. Small diameter graphite electrodes and graphite pin joining systems for small diameter graphite electrodes that are subject to this order are currently classified under the Harmonized Tariff Schedule of the United States (“HTSUS”) subheading 8545.11.0000. The HTSUS number is provided for convenience and customs purposes, but the written description of the scope is dispositive.

\textbf{Connecting Pins—Model Match Methodology}

On August 13, 2010, the Department determined that all connecting pins for SDGE, whether or not they are attached to, sold with, or sold separately from the SDGE are covered by the scope of this proceeding. We invited parties to submit comments regarding the appropriate methodology for reporting normal value for sales where connecting pins are sold with SDGEs at one price per metric ton. On August 19, 2010, both Petitioners and the Fangda Group submitted comments on reporting and model match methodology where connecting pins are sold with SDGEs as one finished product.

We have previously determined that graphite connecting pins produced by respondents are covered by the description in the “Scope of the Order” section, above, and are subject merchandise for purposes of determining appropriate fair value comparisons to U.S. sales. \textsuperscript{16} We compared respondent’s U.S. sales of SDGEs, including connecting pins, to its corresponding NV. In making the fair value comparisons, we compared NV to respondents’ individual export price (“EP”) based on the physical characteristics of the SDGE control number, or CONNUM, reported by respondents. For more information, see Fangda Carbon and Fushun Jinly’s respective analysis memoranda. \textsuperscript{17}

\textbf{Verification}

As provided in section 782(f) of the Act, we verified the information submitted by the Fangda Group for Beijing Fangda and Fushun Carbon, and information submitted by Fushun Jinly for itself and its toller Hexie for use in our preliminary results. See the

\textsuperscript{7} In the \textit{Initiation Notice}, the firm names for these named companies were listed as follows: (1) “Fushun Jinli Petrochemical Carbon Co., Ltd. (aka Fushun Jinli Petrochemical Carbon Co., Ltd.),” (2) “Xinghe County Muzi Carbon Co., Ltd. (aka Xinghe County Muzi Carbon Plant),” (3) “Beijing Fangda was listed as shown above, (4) “Chengdu Rongguang Carbon Co., Ltd. (subsidiary of Lianong Fangda Group Industrial Co., Ltd.),” (5) “Fangda Carbon New Material Co., Ltd. (subsidiary of Lianong Fangda Group Industrial Co., Ltd. (subsidiary of Lianong Fangda Group Industrial Co., Ltd.),” and (7) “Hefei Carbon Co., Ltd. (subsidiary of Lianong Fangda Group Industrial Co., Ltd.).” \textit{See Initiation of Antidumping and Countervailing Duty Administrative Reviews and Request for Revocation in Part, 75 FR 15679, 15681–15683 (March 30, 2010) (“Initiation Notice”).

\textsuperscript{8} See id.

\textsuperscript{9} See the Department’s March 30, 2010, Memorandum to “All Interested Parties,” in which we requested comments regarding respondent selection based on the released CBP data.

\textsuperscript{10} See \textit{Initiation Notice}.

\textsuperscript{11} See “Separate Rates,” “Partial Rescission of the Administrative Review,” and “Intent to Rescind, in Part, the Administrative Review” sections below.

\textsuperscript{13} See “Partial Rescission of the Administrative Review” section below.

Department’s verification reports on the record of this investigation, available in the Central Records Unit, Room 7046 of the main Department building, with respect to these entities. For all verified companies, we used standard verification procedures, including the examination of relevant accounting and production records, as well as original source documents provided by respondents.

### Partial Rescission of the Administrative Review

Pursuant to 19 CFR 351.213(d)(1), the Secretary will rescind an administrative review, in whole or in part, if a party that requested the review withdraws the request within 90 days of the date of publication of the initiation notice of the requested review. Further, pursuant to 19 CFR 351.213(d)(1), the Department is permitted to extend this time if it is reasonable to do so.

For all but seven of the 112 companies for which the Department initiated an administrative review, Petitioners were the only party that requested the review. On June 28, 2010, Petitioners timely withdrew their review requests for 100 of the 105 companies in which the Petitioners were the only party that had requested an administrative review. Therefore, in accordance with 19 CFR 351.213(d)(1), we are rescinding this administrative review with respect to the companies named as follows in the Initiation Notice:

Intent To Rescind, in Part, the Administrative Review

Petitioners’ timely request for administrative reviews included a request to conduct an administrative review of UKCG. After initiating an administrative review of UKCG,19 the Department on April 29, 2010, received a certification of no shipments from UKCG and a request to rescind the administrative review of UKCG. On May 18, 2010, the Department sent a supplemental questionnaire to UKCG requesting information pertaining to its input suppliers and its manufacturing operations in the United Kingdom. On June 1, 2010, UKCG responded to the Department’s supplemental questionnaire. On May 5, and May 21, 2010, Petitioners submitted to the Department requests to keep UKCG in this administrative review and to seek further information and clarification from the company to ascertain the merit of its claim for rescission. On July 19, 2010, UKCG submitted factual information, and on July 29, 2010, Petitioners submitted rebuttal comments on UKCG’s factual information. On August 9, 2010, UKCG submitted additional information and rebuttal comments on Petitioners’ July 29, 2010, submission.

We made inquiries with CBP as to whether there were any entries of subject merchandise from the PRC exported by UKCG during the POR. See message number 1039304, dated February 8, 2011. We received no responses to those inquiries indicating that any shipments of subject merchandise from UKCG from the PRC entered during the POR. Further, in our
respondent selection process, we released CBP data covering POR imports of SDGE from the PRC to interested parties. Upon examination of this data, we found no entries of subject merchandise from the PRC exported by UKCG during the POR. Based on the above, we preliminarily find that UKCG had no shipments of SDGE from the PRC during the POR, and we intend to rescind the review with respect to UKCG pursuant to 19 CFR 351.213(d)(3).

Interested parties may submit comments on the Department’s intent to rescind this review with respect to UKCG no later than 30 days after the date of publication of these preliminary results of review. The Department will issue the final rescission (if appropriate), which will include the results of its analysis of issues raised in any comments received, in the final results of review.

**Non-Market-Economy Country Status**

In every case conducted by the Department involving the PRC, the PRC has been treated as a non-market economy (“NME”) country. In accordance with section 771(11)(C)(i) of the Act, any determination that a country is an NME country shall remain in effect until revoked by the administering authority. None of the parties to this proceeding has contested such treatment. Accordingly, the Department calculated NV in accordance with section 773(c) of the Act, which applies to NME countries.

**Surrogate Country**

When the Department conducts an antidumping duty administrative review of imports from NME countries, section 773(c)(1) of the Act directs the Department to base NV, in most cases, on the NME producer’s factors of production (“FOP”), valued in a surrogate market-economy (“ME”) country or countries considered appropriate by the Department. In accordance with section 773(c)(4) of the Act, the Department will value FOPs using “to the extent possible, the prices or costs of the FOPs in one or more market-economy countries that are: (A) At a level of economic development comparable to that of the NME country,” and (B) significant producers of comparable merchandise.”

With respect to the Department’s selection of surrogate country, Petitioners argue that the Ukraine is the most appropriate surrogate country from which to derive surrogate factor values for the PRC because Ukraine’s per capita gross national income (“GNI”) is economically comparable to the PRC and is also a significant producer of SDGE. Petitioners also state that in the alternative, the Department should rely on India to derive surrogate factor values for the PRC, as it did in the investigation. Although Petitioners suggested we use Ukrainian financial statements as a source for valuing financial ratios and placed one such financial statement on the record, Petitioners additionally placed on the record financial ratio calculations of an Indian producer.

On November 8, 2010, respondents Fangda Group and Fushun Jinly submitted rebuttal comments to Petitioners’ surrogate country submission, in which respondents argue that India is both economically comparable to the PRC and a significant producer of identical merchandise (i.e., SDGE) and the administrative record establishes that India is a superior data source as compared to Ukraine. Respondents maintain that the record contains complete and audited Indian financial statements from two companies that produce identical merchandise to SDGE while the financial statement from the Ukraine is incomplete and not fully translated. Respondents also contend that Petitioners’ reliance on Ukraine’s GNI as the basis for replacing India because Ukraine’s GNI is closer to the PRC’s than that of India’s, is unavailing. Respondents argue that it is the Department’s practice to select surrogate values from a country that is at a level of economic development “comparable” to the NME country, not on the basis of the country that is most comparable in terms of GNI. Further, the Department’s August 30, 2010, memorandum which set forth a non-exhaustive list of six countries determined to be at a level of economic development comparable to the PRC (inclusive of both the India and Ukraine), specifically noted that all of the listed countries “are economically comparable to the PRC”, and “[t]he surrogate countries on the list are not ranked and should be considered equivalent in terms of economic comparability.” Additionally, respondents maintain that the availability of two companies in India from which to calculate surrogate financial ratios further establishes that India is a superior data source compared to the Ukraine. Thus, respondents argue that the Department should continue to use India as the primary surrogate country in this proceeding.

In the instant review, the Department has identified India, Indonesia, the Philippines, Ukraine, Malaysia, and Peru as a non-exhaustive list of countries that are at a level of economic development comparable to the PRC and for which good quality data are most likely available. The Department uses per capita GNI as the primary basis for determining economic comparability. Once the countries that are economically comparable to the PRC have been identified, the Department selects an appropriate surrogate country by determining whether an economically comparable country is a significant producer of comparable merchandise and whether data for valuing FOPs are both available and reliable. Like the PRC, India has a broad and diverse production base, and the Department has reliable data from India that it can use to value the FOPs, while for Ukraine there are not reliable Ukrainian surrogate financial statements on the record with which to calculate the financial ratios. Therefore, the Department has determined that it is appropriate to use India as a surrogate country for the purposes of this administrative review, pursuant to section 773(c)(4) of the Act, based on the following: (1) It is at a similar level of economic development to the PRC; (2) it is a significant producer of comparable merchandise, and (3) the Department has reliable data from India that it can use to value the FOPs. Accordingly, we have calculated NV using Indian prices when available and

---

20 See the Department’s March 30, 2010 Memorandum to “All Interested Parties.”
22 See Petitioners’ submission regarding the appropriate surrogate country to be used for purposes of valuing FOPs in this administrative review, dated October 14, 2010.
23 See the Department’s letter to all interested parties regarding the “Administrative Review of the Antidumping Duty Order on Small Diameter Graphite Electrodes (‘SDGE’) from the People’s Republic of China (‘PRC’),” dated September 29, 2010 (“Surrogate Countries Memorandum”), at 2.
24 See Attachment to the Surrogate Countries Memorandum.
26 See the Department’s memorandum to the file regarding the preliminary factor values used in this administrative review, dated concurrently with this notice (“Factor Valuation Memorandum”).
appropriate to value each respondent’s FOPs.27

In accordance with 19 CFR 351.301(c)(3)(ii), for the final results of an administrative review, interested parties may submit publicly available information to value the FOPs within 20 days after the date of publication of these preliminary results.28

Separate Rates

In proceedings involving NME countries, the Department has a rebuttable presumption that all companies within the country are subject to government control and thus should be assigned a single antidumping duty rate.29 It is the Department’s policy to assign all exporters of merchandise subject to review in an NME country this single rate unless an exporter can demonstrate that it is sufficiently independent so as to be entitled to a separate rate. Exporters can demonstrate this independence through the absence of both de jure and de facto government control over export activities. The Department analyzes each entity exporting the subject merchandise under a test arising from the Final Determination of Sales at Less Than Fair Value: Sparklers from the People’s Republic of China, 56 FR 20588 (May 6, 1991) (“Sparklers”), as further developed in the Final Determination of Sales at Less Than Fair Value: Silicon Carbide from the People’s Republic of China, 59 FR 22585 (May 2, 1994) (“Silicon Carbide”). However, if the Department determines that a company is wholly foreign-owned or located in a market economy, then a separate-rate analysis is not necessary to determine whether it is independent from government control.

In order to demonstrate separate-rate status eligibility, the Department normally requires entities, for whom a review was requested, and who were assigned a separate rate in a previous segment of this proceeding, to submit a separate-rate certification stating that they continue to meet the criteria for obtaining a separate rate.30 For entities that were not assigned a separate rate in the previous segment of a proceeding, to demonstrate eligibility for such, the Department requires a separate-rate application.31 On April 29, 2010, Shanghai Jinneng International Trade Co., Ltd. (“Jinneng”), Sichuan Guan’gan Shida Carbon Co., Ltd. (“Shida”), and Muzi Cabon each submitted separate rate certifications. On June 1, 2010, Qingdao Hao Sheng Metals & Minerals Import & Exports Co., Ltd. (“Hao Sheng Metals”) and UKCG submitted a separate rate application. On June 28, 2010, Petitioners withdrew their review requests for Jinneng, Shida, and Hao Sheng Metals. For further information, see the “Partial Rescission of the Administrative Review” section above. The Department also intends to rescind the administrative review with respect to UKCG. For further information, see the “Intent to Rescind, in Part, the Administrative Review” section above.

In this administrative review, of the five entities not selected for individual review (i.e., (1) Muzi Carbon, (2) Shijiazhuang Huanan Carbon Factory (“Huanan Carbon”), (3) Sinosteel Jilin Carbon Co., Ltd./Sinosteel Jilin Carbon Import & Export Co., Ltd. (“Sinosteel Jilin”), (4) Jilin Carbon Graphite Material Co., Ltd. (“Jilin Carbon”), and (5) Jilin Carbon Import and Export Company (“Jilin Carbon &E”)) for which the review has not been rescinded or for which the Department does not intend to rescind the review, only one company, Muzi Carbon, submitted separate-rate information. The remaining four companies (Huanan Carbon, Sinosteel Jilin Carbon, and Jilin Carbon &E) did not provide either a separate rate application or separate rate certification, as applicable, and will be considered part of the PRC-wide entity. See “The PRC-Wide Rate, PRC-Wide Entity, and Use of Adverse Facts Available” section below.

The two mandatory respondents (i.e., the Fangda Group and Fushun Jinly) and Muzi Carbon have provided company-specific information and each stated that it meets the criteria for the assignment of a separate rate.

a. Absence of De Jure Control

The Department considers the following de jure criteria in determining whether an individual company may be granted a separate rate: (1) An absence of restrictive stipulations associated with an individual exporter’s business and export licenses; (2) any legislative enactments decentralizing control of companies; and (3) other formal measures by the government decentralizing control of companies.32

The evidence provided by the Fangda Group, Fushun Jinly, and Muzi Carbon supports a preliminary finding of de jure absence of government control based on the following: (1) An absence of restrictive stipulations associated with the individual exporter’s business and export licenses; (2) there are applicable legislative enactments decentralizing control of the companies; and (3) there are formal measures by the government decentralizing control of the companies.33

b. Absence of De Facto Control

Typically the Department considers four factors in evaluating whether each respondent is subject to de facto government control of its export functions: (1) Whether the export prices are set by or are subject to the approval of a government agency; (2) whether the respondent has authority to negotiate and sign contracts and other agreements; (3) whether the respondent has autonomy from the government in making decisions regarding the selection of management; and (4) whether the respondent retains the proceeds of its export sales and makes independent decisions regarding disposition of profits or financing of losses.34

The Department has determined that an analysis of de facto control is critical in determining whether respondents are, in fact, subject to a degree of government control over export activities which would preclude the Department from assigning separate rates. For the Fangda Group, Fushun Jinly, and Muzi Carbon, we determine that the evidence on the record supports

27 See Surrogate Value Memorandum; see also “Factor Valuations” section, below.

28 In accordance with 19 CFR 351.301(c)(1), for the final administrative review, interested parties may submit factual information to rebut, clarify, or correct factual information submitted by an interested party less than ten days before, on, or after, the applicable deadline for submission of such factual information. However, the Department notes that 19 CFR 351.301(c)(1) permits new information only insofar as it rebuts, clarifies, or corrects information recently placed on the record. The Department generally will not accept the submission of additional, previously absent-from-the-record, alternative surrogate value information pursuant to 19 CFR 351.301(c)(4). See Glycine from the People’s Republic of China: Final Results of Antidumping Duty Administrative Review and Final Rescission, in Part, 72 FR 58809 (October 17, 2007), and accompanying Issues and Decision Memorandum at Comment 2.

34 See Silicon Carbide, 59 FR at 22585–87; see also Notice of Final Determination of Sales at Less Than Fair Value: Furfuryl Alcohol From the People’s Republic of China, 60 FR 22544, 22545 (May 8, 1995).
a preliminary finding of de facto absence of government control based on record statements and supporting documentation showing the following: (1) Each respondent sets its own export prices independent of the government and without the approval of a government authority; (2) each respondent retains the proceeds from its sales and makes independent decisions regarding disposition of profits or financing of losses; (3) each respondent has the authority to negotiate and sign contracts and other agreements; and (4) each respondent has autonomy from the government regarding the selection of management. Additionally, each of these companies' questionnaire responses indicate that its pricing during the POR does not involve coordination among exporters.

The evidence placed on the record of this review by the Fangda Group, Fushun Jinly, and Muzi Carbon demonstrates an absence of de jure and de facto government control with respect each company’s respective exports of the merchandise under review, in accordance with the criteria identified in Sparklers and Silicon Carbide. Therefore, we are preliminarily granting the Fangda Group, Fushun Jinly, and Muzi Carbon each a separate rate.

Margin for Separate Rate Company

The statute and the Department’s regulations do not address the establishment of a rate to be applied to individual companies not selected for examination where the Department limited its examination in an administrative review pursuant to section 777A(c)(2) of the Act. Generally, we have referred to section 735(c)(5) of the Act, which provides instructions for calculating the all-others rate in an investigation, for guidance when calculating the rate for respondents we did not examine in an administrative review. For the exporters subject to a review that were determined to be eligible for separate rate status, but were not selected as mandatory respondents, the Department generally weight-averages the rates calculated for the mandatory respondents, excluding any rates that are zero, de minimis, or based entirely on adverse facts available (“AFA”).

As discussed above, the Department received a timely and complete separate rate certification from Muzi Carbon, who is an exporter of SDGE from the PRC during the POR and who was not selected as a mandatory respondent in this review. In this segment, this company has demonstrated its eligibility for a separate rate, as discussed above. Consistent with the Department’s practice, as the separate rate, we have established a margin for Muzi Carbon based on the weighted-average of the rates we calculated for the mandatory respondents, the Fangda Group and Fushun Jinly, excluding, where appropriate, any rates that were zero, de minimis, or based entirely on AFA.

The PRC-Wide Entity, PRC-Wide Rate, and Use of Adverse Facts Available

Sections 776(a)(1) and (2) of the Act provide that the Department shall apply “facts otherwise available” if, inter alia, necessary information is not on the record or an interested party or any other person: (A) Withholds information that has been requested; (B) fails to provide information within the deadlines established, or in the form and manner requested by the Department, subject to subsections (c)(1) and (e) of section 782 of the Act; (C) significantly impedes a proceeding; or (D) provides information that cannot be verified as provided by section 782(f) of the Act.

Where the Department determines that a response to a request for information does not comply with the request, section 782(d) of the Act provides that the Department will so inform the party submitting the response and will, to the extent practicable, provide that party the opportunity to remedy or explain the deficiency. If the party fails to remedy the deficiency within the applicable time limits, subject to section 782(e) of the Act, the Department may disregard all or part of the original and subsequent responses, as appropriate. Section 782(e) of the Act provides that the Department “shall not decline to consider information that is submitted by an interested party and is necessary to the determination but does not meet all applicable requirements established by the administering authority” if the information is timely, can be verified, is not so incomplete that it cannot serve as a reliable basis, and if the interested party acted to the best of its ability in providing the information. Where all of these conditions are met, the statute requires the Department to use the information if it can do so without undue difficulties.

Section 776(b) of the Act further provides that the Department may use an adverse inference in applying the facts otherwise available when a party has failed to cooperate by not acting to the best of its ability to comply with a request for information. Section 776(b) of the Act also authorizes the Department to use as adverse facts available (“AFA”) information derived from the petition, the final determination, a previous administrative review, or other information placed on the record.

Section 776(c) of the Act provides that, when the Department relies on secondary information rather than on information obtained in the course of an investigation or review, it shall, to the extent practicable, corroborate that information from independent sources that are reasonably at its disposal. Secondary information is defined as “information derived from the petition that gave rise to the investigation or review, the final determination concerning the subject merchandise, or any previous review under section 751 concerning the subject merchandise.” Corroborate means that the Department will satisfy itself that the secondary information to be used has probative value. To corroborate secondary information, the Department will, to the extent practicable, examine the reliability and relevance of the information to be used. The SAA explains, however, that the Department need not prove that the selected facts available are the best alternative information.

For the reasons discussed below, we determine that, in accordance with sections 776(a)(2) and 776(b) of the Act, the use of AFA is warranted for the preliminary results for the PRC-wide entity, including Huanan Carbon.

35 See Beijing Fangda’s, Fushun Carbon’s, Fangda Carbon’s, Rongguang’s, and Heifei’s Section A Questionnaire Responses, dated June 4, 2010; Fushun Jinly’s Section A Questionnaire Response, dated June 7, 2010; and Muzi Carbon’s Separate Rate Certification Response, dated April 29, 2010.

39 See SAA at 870.

40 See SAA at 869.
Sinosteel Jilin, Jilin Carbon, and Jilin Carbon I&E.

In the *Initiation Notice*, the Department stated that the named companies that wish to qualify for separate-rate status in this proceeding must complete, as appropriate, either a separate rate application or certification.41 In proceedings involving the PRC, the Department begins with a rebuttable presumption that all companies within the country are subject to government control and, thus, should be assigned a single antidumping duty deposit rate.42 It is the Department’s policy to assign all exporters of merchandise subject to an administrative review in an NME exporter can demonstrate that it is part of the PRC-wide entity.45 Because Huanan Carbon, Sinosteel Jilin, Jilin Carbon, and Jilin Carbon I&E did not file with the Department either a separate rate application or a certification, a requirement for qualifying for separate-rate status in this proceeding as stipulated in the *Initiation Notice.*44

Because Huanan Carbon, Sinosteel Jilin, Jilin Carbon, and Jilin Carbon I&E did not submit any information to establish their eligibility for separate-rate status, we find they are deemed to be part of the PRC-wide entity.45 Because we have determined that Huanan Carbon, Sinosteel Jilin, Jilin Carbon, and Jilin Carbon I&E are not entitled to separate rates and are now part of the PRC-wide entity, the PRC-wide entity (including Huanan Carbon, Sinosteel Jilin, Jilin Carbon, and Jilin Carbon I&E) is now under review. The PRC-wide entity did not respond to our requests for information. Because the PRC-wide entity did not respond to our requests for information, we find it necessary under section 776(a)(2) of the Act to use facts available as the basis for these preliminary results. Because the PRC-wide entity provided no information, we determine that sections 782(d) and (e) of the Act are not relevant to our analysis. We further find that the PRC-wide entity (including Huanan Carbon, Sinosteel Jilin, Jilin Carbon, and Jilin Carbon I&E) failed to respond to the Department’s requests for information and, therefore, did not cooperate to the best of its ability. Therefore, because the PRC-wide entity did not cooperate to the best of its ability in the proceeding, the Department finds it necessary to use an adverse inference in making its determination, pursuant to section 776(b) of the Act.

**Selection of the Adverse Facts Available Rate**

In deciding which facts to use as AFA, section 776(b) of the Act and 19 CFR 351.308(c)(1) authorize the Department to rely on information derived from (1) the petition, (2) a final determination in the investigation, (3) any previous review or determination, or (4) any other information placed on the record. It is the Department’s practice to select, as AFA, the highest calculated rate in any segment of the proceeding.46

The Court of International Trade (“CIT”) and the Court of Appeals for the Federal Circuit (“Federal Circuit”) have consistently upheld the Department’s practice.47 The Department’s practice when selecting an adverse rate from among the possible sources of information is to ensure that the margin is sufficiently adverse “as to effectuate the purpose of the facts available role to induce respondents to provide the Department with complete and accurate information in a timely manner.”48 The Department’s practice also ensures “that the party does not obtain a more favorable result by failing to cooperate than if it had cooperated fully.”49 In choosing the appropriate balance between providing respondents with an incentive to respond accurately and imposing a rate that is reasonably related to the respondents’ prior commercial activity, selecting the highest prior margin in this instance “reflects a common sense inference that the highest prior margin is the most probative evidence of current margins because, if it were not so, the importer, knowing of the rule, would have produced current information showing the margin to be less.”50

Because of Huanan Carbon’s, Sinosteel Jilin’s, Jilin Carbon’s, and Jilin Carbon I&E’s failure to cooperate in this administrative review, we have preliminarily assigned the PRC-wide entity, of which they are deemed to be a part, an AFA rate of 159.64 percent, which is the PRC-wide rate determined in the investigation and the rate currently applicable to the PRC-wide entity.51

The Department preliminarily determines that this information is the most appropriate from the available sources to effectuate the purposes of AFA. The Department is under the requisite to the original investigation to determine an AFA rate is subject to the requirement to corroborate secondary information.52

**Corroboration of Facts Available**

Section 776(c) of the Act provides that, when the Department relies on secondary information rather than on information obtained in the course of an investigation or review, it shall to the extent practicable, corroborate that information from independent sources that are reasonably at the Department’s disposal. Secondary information is described in the SAA as “information derived from the petition that gave rise to the investigation or review, the final determination concerning the subject merchandise, or any previous review under section 751 concerning the subject merchandise.”53 The SAA explains that “corroborate” means to determine that the information used has probative value. The Department has determined that to have probative value, information must be reliable and relevant.54 The SAA also explains that

The Department relied upon our pre-initiation analysis of the adequacy and accuracy of the information in the Petition. During our pre-initiation analysis, we examined information as a basis of EP and NV in the Petition, and the calculations used to derive the alleged margins. Also, during our pre-initiation analysis, we examined information from various independent sources provided either in the Petition or, based on our requests, in independent sources provided either in secondary information. Based upon the above, for these preliminary results, the Department finds that the rates derived from the Petition are corroborated to the extent practicable for purposes of the AFA rate assigned to the PRC-wide entity, including Huanan Carbon, Sinosteel Jilin, Jilin Carbon, and Jilin Carbon I&E.

Because these are the preliminary results of review, the Department will consider all margins on the record at the time of the final results of review for the purpose of determining the most appropriate final margin for the PRC-wide entity.54

**Fair-Value Comparisons**

To determine whether the Fangda Group’s and Fushun Jinyi’s sales of subject merchandise were made at less than NV, we compared the NV to individual EP transactions in accordance with section 777A(d)(2) of the Act. See “Export Price” and “Normal Value” sections of this notice, below.

**Export Price**

In accordance with section 772(a) of the Act, EP is “the price at which subject merchandise is first sold (or agreed to be sold) before the date of importation by the producer or exporter of the subject merchandise outside of the United States to an unaffiliated purchaser in the United States or to an unaffiliated purchaser for exportation to the United States,” as adjusted under section 772(c) of the Act. For each respondent, we used EP methodology, in accordance with section 772(a) of the Act, for sales in which the subject merchandise was first sold prior to importation by the exporter outside the United States directly to an unaffiliated purchaser in the United States and for sales in which constructed export price was not otherwise indicated.

We based EP on the price to unaffiliated purchasers in the United States. In accordance with section 772(c)(2)(A) of the Act, where appropriate, we made deductions from the starting price (gross unit price) for foreign inland freight and foreign brokerage and handling. We valued brokerage and handling using a price list of export procedures necessary to export a standardized cargo of goods in India. The price list is compiled based on a survey case study of the procedural requirements for trading a standard shipment of goods by ocean transport in India as reported in “Doing Business 2010: India” published by the World Bank.55

**Normal Value**

We compared NV to individual EP transactions in accordance with section 777A(d)(2) of the Act, as appropriate. Section 773(c)(1) of the Act provides that the Department shall determine NV using an FOP methodology if: (1) The merchandise is exported from an NME country; and (2) the information does not permit the calculation of NV using home market prices, third country prices, or constructed value under section 773(a) of the Act. When determining NV in an NME context, the Department will base NV on FOPs because the presence of government controls on various aspects of these economies renders price comparisons and the calculation of production costs invalid under our normal methodologies. Under section 773(c)(3) of the Act, FOPs include but are not limited to: (1) Hours of labor required; (2) quantities of raw materials employed; (3) amounts of energy and other utilities consumed; and (4) representative capital costs. The Department used FOPs reported by the respondents for materials, energy, labor, packing and by-products.

**Factor Valuations**

In accordance with section 773(c) of the Act, we calculated NV based on FOPs reported by respondents for the POR. In accordance with 19 CFR 351.408(c)(1), the department will normally use publicly available information to find an appropriate surrogate value (“SV”) to value FOPs, but when a producer sources an input from a market economy and pays for it in market economy currency, the Department normally will value the factor using the actual price paid for the input if the quantities were meaningful and where the prices have not been distorted by dumping or subsidies.60 To calculate NV, we multiplied the reported per-unit factor-consumption rates by publicly available SVs (except as discussed below). In selecting SVs, we considered the quality, specificity, and contemporaneity of the data.61 As appropriate, we adjusted input prices by including freight costs to make them delivered prices. Specifically, we added to import SVs surrogate freight cost using the shorter of the reported distance from the domestic supplier to the factory or the distance from the nearest seaport to the factory, where appropriate. This adjustment is in

accordance with the Court of Appeals for the Federal Circuit’s decision in Sigma Corp. v. United States, 117 F.3d 1401, 1407–08 (Fed. Cir. 1997).

On September 29, 2010, the Department invited all interested parties to submit publicly available information to value FOPs for consideration in the Department’s preliminary results of review. On October 26, 2010, Petitioners, the Fangda Group, and Fushun Jinly each submitted publicly available information to value FOPs for the preliminary results and each submitted rebuttal comments on November 8, 2010. A detailed description of all SVs used for the Fangda Group and Fushun Jinly can be found in the Factor Valuation Memorandum.

For the preliminary results, in accordance with the Department’s practice, except where noted below, we used data from the Indian import Statistics in the Global Trade Atlas (“GTA”) and other publicly available Indian sources in order to calculate SVs for the Fangda Group’s and Fushun Jinly’s FOPs (i.e., direct materials, energy, and packing materials) and certain movement expenses. In selecting the best available information for valuing FOPs in accordance with section 773(c)(1) of the Act, the Department’s practice is to select, to the extent practicable, SVs which are non-export average values, most contemporaneous with the POR, product-specific, and tax-exclusive. The record shows that data in the Indian Import Statistics, as well as those from the other Indian sources, are contemporaneous with the POI, product-specific, and tax-exclusive. In those instances where we could not obtain publicly available information contemporaneous to the POR with which to value factors, we adjusted the SVs using, where appropriate, the Indian Wholesale Price Index (“WPI”) as published in the IMF’s International Financial Statistics.

As explained in the legislative history of the Omnibus Trade and Competitiveness Act of 1988, the Department continues to apply its long-standing practice of disregarding SVs if it has a reason to believe or suspect the source data may be subsidized. In this regard, the Department has previously found that it is appropriate to disregard such prices from India, Indonesia, South Korea and Thailand because we have determined that these countries maintain broadly available, non-industry specific export subsidies. Based on the existence of these subsidy programs that were generally available to all exporters and producers in these countries at the time of the POR, the Department finds that it is reasonable to infer that all exporters from India, Indonesia, South Korea and Thailand may have benefitted from these subsidies. Additionally, we disregarded prices from NME countries. Finally, imports that were labeled as originating from an “unspecified” country were excluded from the average value, because the Department could not be certain that they were not from either an NME country or a country with generally available export subsidies.

The Fangda Group and Fushun Jinly claim that certain of their reported raw material inputs were sourced from an ME country and paid for in ME currencies. When a respondent sources inputs from an ME supplier in meaningful quantities, we use the actual price paid by respondent for those inputs, except when prices may have been distorted by dumping or

For the preliminary results of this
the Department is valuing labor using a simple average
industry-specific wage rate using
and/or wage data reported
under Chapter 5B by the International Labor Organization ("ILO"). To achieve
an industry-specific labor value, we relied on industry-specific labor data
from the countries we determined to be both economically comparable to the
and significant producers of comparable merchandise. A full
description of the industry-specific wage rate calculation methodology is
provided in the Factor Valuation Memorandum. The Department
calculated a simple average industry-
specific wage rate of $1.47 for these
preliminary results. Specifically, for this
review, the Department has calculated
the wage rate using a simple average of
the data provided to the ILO under Sub-
Classification 31 of the ISIC-Revision 3
standard by countries determined to be
both economically comparable to the
and significant producers of comparable
merchandise. The Department finds the two-digit
description under ISIC-Revision 3
("Manufacture of Electrical Machinery
and Apparatus NEC") to be the best
available wage rate surrogate value on
the record because it is specific and
derived from industries that produce
merchandise comparable to the subject
merchandise. Consequently, we
averaged the ILO industry-specific wage
rate data or earnings data available from
the following countries found to be
economically comparable to the PRC
determined to be economically comparable to
and significant producers of comparable
merchandise: Ecuador, Egypt, Indonesia, Jordan, Peru, the
Philippines, Thailand, and the
Ukraine.79 For further information on
the calculation of the wage rate, see
Factor Valuation Memorandum.
To value factory overhead, selling,
general and administrative expenses
and profit, the Department used the
average of the ratios derived from the
financial statements of two Indian
producers: Graphite India Limited and
HEG Limited (for the year ending on
March 31, 2010).80
The Fangda Group and Fushun Jinly
reported that they have recovered by-
products in their production of subject
merchandise and successfully
demonstrated that all of them have
commercial value, therefore, we have
granted a by-product offset for the
quantities of each respondent's reported
by-products, valued using Indian GTA
data.81
Use of Facts Available and Adverse
Facts Available
Section 776(b) of the Act further
provides that the Department may use
an adverse inference in applying the
facts otherwise available when a party
has failed to cooperate by not acting to
the best of its ability to comply with a
request for information. Section 776(b)
of the Act also authorizes the
Department to use as AFA information
derived from the petition, the final
determination, a previous
administrative review, or other
information placed on the record.

At verification, we were unable to verify the supplier distances for a
significant percentage of Fushun Carbon’s suppliers. As a result, pursuant
to section 776(a)(2)(A), (B), and (D) of the Act, we find that the use of facts
available ("FA") is appropriate to
determine Fushun Carbon’s supplier
distances, as discussed below.
Fushun Carbon at verification initially
provided four maps from the Chinese
internet search engine “Baidu maps” as
support for its reported suppliers' distance (i.e., the distance from each
supplier’s location to Fushun Carbon’s
factory during the POR). In our review of
these maps, we found that the Baidu
map distances differed from the
reported distance for these suppliers.
For the preliminary results, as partial
facts available, pursuant to section
776(a) of the Act, for those supplier
distances where we verified that the
distance Fushun Carbon reported in its
FOP database differed from the Baidu
maps presented to us at verification,
we have applied FA and set Fushun
Carbon’s distance for these suppliers
equal to the distances found at
verification.82
In addition, we requested that Fushun Carbon provide maps from the same
source for the remaining suppliers.
However, Fushun Carbon was unable to
provide the requested maps during the
remaining time at verification. We were,
therefore, unable to verify the supplier
distance for a significant percent of
Fushun Carbon’s suppliers, and for the
preliminary results, we determine that
Fushun Carbon did not cooperate to the
best of its ability by not providing the
supporting documentation needed to
verify its reported supplier distances.83
Accordingly, an adverse inference in
using facts available under section
776(b) of the Act is warranted for

Fushun Carbon with regard to this specific information. As partial adverse facts available, pursuant to section 776(a) and 776(b) of the Act, for those suppliers where we were not presented with Baidu maps at verification, we have set Fushun Carbon’s distance for these suppliers equal to the reported supplier distance plus a percent adjustment equal to the highest percent difference found at verification. Because of the business proprietary nature of this information, please see the Fangda Group’s Verification Report and the Fangda Group’s Preliminary Analysis Memo.

Fushun Jinly

We provided Fushun Jinly with two opportunities during the administrative review to accurately report its tollers’ consumption data.84 However, Fushun Jinly did not report these data for one of its tollers and did not adequately explain why there were missing consumption data with respect to that toller.85 As a result, we find pursuant to section 776(a)(A) and (B) of the Act that use of partial FA is appropriate to determine the consumption data with respect to this particular toller. We further find that Fushan Jinly did not cooperate to the best of its ability in responding to the Department’s requests for information. Therefore, pursuant to section 776(a) and 776(b) of the Act, because Fushun Jinly did not cooperate to the best of its ability in responding to the Department’s requests for information, we are applying partial adverse facts available to the missing consumption data for this particular toller. As partial adverse facts available, we are applying the highest monthly material input consumption of this toller to the relevant missing consumption data. See Fushun Jinly’s analysis memo for further discussion.

Additionally, Fushun Jinly confirmed that one of its tollers’ consumption of electricity was understated because of the toller’s affiliation with an electric company.86 As a result, as partial facts available, pursuant to section 776(a) of the Act, the Department for the preliminary results has used the electricity usage of the toller we verified (which provides the same tolling services) in lieu of the other toller’s understated electricity consumption data. Due to the proprietary nature of this discussion, see Fushun Jinly’s Preliminary Analysis Memo for further discussion.

Currency Conversion

Where appropriate, we made currency conversions into U.S. dollars, in accordance with section 773A(a) of the Act, based on the exchange rates in effect on the dates of the U.S. sales as certified by the Federal Reserve Bank.

Preliminary Results of Review

The Department has determined that the following preliminary dumping margins exist for the period August 21, 2008, through January 31, 2010:

<table>
<thead>
<tr>
<th>Individually reviewed exporters</th>
<th>Weighted-average percent margin</th>
</tr>
</thead>
<tbody>
<tr>
<td>Beirng Fangda Carbon Tech Co., Ltd.</td>
<td>60.16</td>
</tr>
<tr>
<td>Fangda Carbon New Material Co., Ltd.</td>
<td>64.38</td>
</tr>
<tr>
<td>Fushun Jinly Petrochemical Carbon Co., Ltd.</td>
<td></td>
</tr>
</tbody>
</table>

<table>

Disclosure and Public Comment

The Department will disclose calculations performed for these preliminary results to the parties within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b). Interested parties may submit written comments no later than 30 days after the date of publication of these preliminary results of review.87 Rebuttals to written comments may be filed no later than five days after the written comments are filed.88 Further, parties submitting written comments and rebuttal comments are requested to provide the Department with an additional copy of those comments on a CD.

Any interested party may request a hearing within 30 days of publication of this notice.89 Hearing requests should contain the following information: (1) The party’s name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed. Oral presentations will be limited to issues raised in the briefs. If a request for a hearing is made, parties will be notified of the time and date for the hearing to be held at the U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.90

The Department will issue the final results of this administrative review, which will include the results of its analysis of issues raised in any such comments, within 120 days of publication of these preliminary results, pursuant to section 751(a)(3)(A) of the Act.

Assessment Rates

The Department will determine, and CBP shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with the final results of this review. The

---

84 See the Department’s Initial Questionnaire, dated May 26, 2010, at section D.I.D “Reporting Requirements;” the Department’s Collective A, C, and D Supplemental Questionnaire, dated November 18, 2010, at 8.
85 See the Fushun Jinly’s fourth supplemental questionnaire response, dated December 10, 2010, at 15.
86 See id.
87 See 19 CFR 351.309(c).
88 See 19 CFR 351.309(d).
89 See 19 CFR 351.309(e).
90 See 19 CFR 351.310(d).
Department intends to issue assessment instructions to CBP 15 days after the publication date of the final results of these reviews. For assessment purposes, we calculated exporter/importer-(or customer) specific assessment rates for merchandise subject to this review.91 Where appropriate, we calculated an ad valorem rate for each importer (or customer) by dividing the total dumping margins for reviewed sales to that party by the total entered values associated with those transactions. For duty-assessment rates calculated on this basis, we will direct CBP to assess the resulting ad valorem rate against the entered customs values for the subject merchandise. Where appropriate, we calculated a per-unit rate for each importer (or customer) by dividing the total dumping margins for reviewed sales to that party by the total sales quantity associated with those transactions. For duty-assessment rates calculated on this basis, we will direct CBP to assess the resulting per-unit rate against the entered quantity of the subject merchandise. Where an importer- (or customer) specific assessment rate is de minimis (i.e., less than 0.50 percent), the Department will instruct CBP to assess that importer (or customer’s) entries of subject merchandise without regard to antidumping duties. We intend to instruct CBP to liquidate entries containing subject merchandise exported by the PRC-wide entity at the PRC-wide rate we determine in the final results of this review. For Muzi Carbon, a company receiving a separate rate that was not selected for individual review, we will calculate an assessment rate based on the weighted average of the cash deposit rates calculated for the companies selected for individual review consistent with section 735(c)(5)(B) of the Act. Where the weighted average ad valorem rate is zero or de minimis, we will instruct CBP to liquidate appropriate entries without regard to antidumping duties. See 19 CFR 351.106(c)(2).

Cash-Deposit Requirements

The following cash-deposit requirements will be effective upon publication of the final results of this administrative review for all shipments of the subject merchandise from the PRC entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(2)(C) of the Act: (1) For the Fangda Group, Fushun Jinly, and Muzi Carbon the cash deposit rate will be their respective rates established in the final results of this review, except if the rate is zero or de minimis no cash deposit will be required; (2) for previously investigated or reviewed PRC and non-PRC exporters not listed above that have separate rates, the cash deposit rate will continue to be the exporter-specific rate published for the most recent period; (3) for all PRC exporters of subject merchandise which have not been found to be entitled to a separate rate, the cash deposit rate will be the PRC-wide rate of 159.64 percent; and (4) for all non-PRC exporters of subject merchandise which have not received their own rate, the cash deposit rate will be the rate applicable to the PRC exporters that supplied that non-PRC exporter. These deposit requirements, when imposed, shall remain in effect until further notice.

Notification of Interested Parties

This notice also serves as a preliminary reminder to importers of their responsibility under section 351.402(f) of the Department’s regulations to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary’s presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review and this notice are in accordance with sections 751(a)(1) and 777(i) of the Act, and sections 351.213 and 351.221(b)(4) of the Department’s regulations.

Paul Piquado,
Acting Deputy Assistant Secretary for Import Administration.

DEPARTMENT OF COMMERCE
International Trade Administration

Request for Applicants for Appointment to the United States-Brazil CEO Forum

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: In March 2007, the Governments of the United States and Brazil established the U.S.-Brazil CEO Forum. This notice announces membership opportunities for appointment as American representatives to the U.S. Section of the Forum. The current U.S. Section term will expire on June 11, 2011.

DATES: Applications should be received no later than April 29, 2011.

ADDRESSES: Please send requests for consideration to Ashley Rosen, Office of South America, U.S. Department of Commerce, either by e-mail at ashley.rosen@trade.gov or by mail to U.S. Department of Commerce, 1401 Constitution Avenue, NW., Room 3203, Washington, DC 20230.

SUPPLEMENTARY INFORMATION: The Secretary of Commerce and the Deputy Assistant to the President and Deputy National Security Advisor for International Economic Affairs, together with the Planalto Car Civil Minister (Presidential Chief of Staff) and the Brazilian Minister of Development, Industry and Foreign Trade, co-chair the U.S.-Brazil CEO Forum, pursuant to the Terms of Reference signed in March 2007 by the U.S. and Brazilian governments, which set forth the objectives and structure of the Forum. The Terms of Reference may be viewed at: http://trade.gov/press/press_releases/2007/brazilceo_02.asp. The Forum, consisting of both private and public sector members, brings together leaders of the respective business communities of the United States and Brazil to discuss issues of mutual interest, particularly ways to strengthen the economic and commercial ties between the two countries. The Forum consists of the U.S. and Brazilian co-chairs and a Committee comprised of private sector members. The Committee will be composed of two Sections, each consisting of eight to ten members from the private sector, representing the views and interests of the private sector business community in the United States and Brazil. Each government will appoint the members to its respective Section. The Committee will provide recommendations to the two governments that reflect private sector views, needs and concerns regarding the creation of an economic environment in which their respective private sectors can partner, thrive, and enhance bilateral commercial ties to expand trade between the United States and Brazil.

Candidates are currently sought for membership on the U.S. Section of the Committee. Each candidate must be the Chief Executive Officer or President (or have a comparable level of
