SUPPLEMENTARY INFORMATION: Section 127(b)(1) of the Uruguay Round Agreements Act (URAA) (19 U.S.C. 3537(b)(1)) requires that notice and opportunity for comment be provided after the United States submits or receives a request for establishment of a WTO dispute settlement panel. Consistent with this obligation, USTR is providing notice that it has requested a panel pursuant to the WTO *Understanding on Rules and Procedures Governing the Settlement of Disputes* (“DSU”). Once it is established, the panel will hold its meetings in Geneva, Switzerland, and would be expected to issue a report on its findings and recommendations within nine months of its establishment.

Major Issues Raised by the United States

On September 15, 2010, the United States requested consultations with China concerning issues relating to certain restrictions and requirements maintained by China affecting electronic

payment services for payment card transactions and the suppliers of those services. Electronic payment services involve the services through which transactions involving credit card, debit card, charge card, check card, automated teller machine (“ATM”) card, prepaid card, or other similar card or money transmission product, are processed and through which transfers of funds between institutions participating in the transactions are managed and facilitated. In the financial services sector, as set out in China’s Schedule of Specific Commitments on Services annexed to the *Protocol on the Accession of the People’s Republic of China*, China undertook both market access and national treatment commitments with respect to these services.

Despite its GATS commitments, China imposes market access restrictions and requirements on service suppliers of other Members seeking to supply electronic payment services in China. China UnionPay (“CUP”), a Chinese entity, is the only entity that China permits to supply electronic payment services for payment card transactions denominated and paid in renminbi (“RMB”) in China. China also requires the handling by CUP of all RMB transactions in Macao or Hong Kong using payment cards issued in Mainland China, as well as any RMB transactions in Mainland China using RMB payment cards issued in Hong Kong, China or Macao, China.

In addition, China requires all payment card processing devices at merchant locations, all ATMs, and all point-of-sale (“POS”) terminals in China to be compatible with CUP’s system and capable of accepting CUP payment cards. China also requires that all acquiring institutions post the CUP logo and be capable of accepting all payment cards bearing the CUP logo. China further requires that all payment cards, including “dual currency” cards, issued in China capable of being used for transactions denominated and paid in RMB bear the CUP logo. These measures do not impose similar requirements regarding non-CUP payment cards or to transactions using non-CUP payment cards. China also requires that all inter-bank transactions involving payment cards be handled through CUP. China prohibits the use of non-CUP payment cards for cross-region or inter-bank transactions.

The United States considers that these measures are inconsistent with China’s obligations under GATS Article XVI:1 to accord services and services suppliers of any other Member treatment no less favorable than that provided for in

China's Schedule and that China is maintaining or adopting measures set out in Article XVI:2. The United States also considers that these measures are inconsistent with China's obligations under GATS Article XVII to accord to services and service suppliers of any other Member treatment no less favorable than that it accords to its own like services and service suppliers.

In its request for the establishment of a panel, the United States identified the following instruments through which the United States understands that China maintains these measures:

Federal Aviation Administration

Office of Commercial Space Transportation; Notice of Availability of the Finding of No Significant Impact (FONSI) for Actions Related to the Renewal of a Launch Operator License for Delta II Expendable Launch Vehicles at Cape Canaveral Air Force Station, Florida

AGENCY: Federal Aviation Administration (FAA), Department of Transportation.

ACTION: Notice of availability of the FONSI.

SUMMARY: In accordance with the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321-4347 (as amended), Council on Environmental Quality NEPA implementing regulations (40 Code of Federal Regulations [CFR] Parts 1500 to 1508), and FAA Order 1050.1E, Change 1, the FAA is announcing the availability of a FONSI, based on the analysis and findings of the May 1988 United States Air Force (USAF) *Medium Launch Vehicle Environmental Assessment (EA), Cape Canaveral Air Force Station (CCAFS), Florida*. The 1988 EA evaluates the potential environmental impacts of renovating Launch Complex (LC)-17 and other support facilities at CCAFS to support 12 annual launches of the Delta II vehicle. USAF issued a FONSI, which concluded that the environmental impacts associated with their Proposed Action would not significantly impact the quality of the human environment, and therefore the preparation of an Environmental Impact Statement (EIS) was not required. Under the FAA's Proposed Action as stated in the FONSI, the FAA would renew a Launch Operator License to Orbital Sciences Corporation for the continued operation of Delta II expendable launch vehicles at CCAFS. A Launch Operator License would authorize launches of Delta II vehicles over the 5-year term of the license.

In accordance with the requirements of FAA Order 1050.1E, Change 1, paragraph 410, the FAA has independently evaluated the information contained in the 1988 EA and has verified the continued validity of the analysis contained in the EA. The FAA has determined that the 1988 EA sufficiently addresses the concerns of the FAA and complies with FAA requirements for implementing NEPA as stated in FAA Order 1050.1E, Change 1. The FAA has determined that there is no new information or analysis that

would require preparation of a new or supplemental EA or EIS according to the CEQ Regulations (40 CFR 1502.9(c)(1)). Therefore, the FAA issues the FONSI concurring with the analysis of impacts and findings in the 1988 EA and formally adopts the EA in compliance with the requirements of 40 CFR 1506.3 to support renewing a Launch Operator License to Boeing for the continued operation of Delta II expendable launch vehicles at CCAFS. The 1988 EA is incorporated by reference and is summarized as necessary in the FONSI.

The FAA has posted the FONSI on the Internet at http://www.faa.gov/about/office_org/headquarters_offices/ast/.
