

Regulatory Public Docket in Rm. S-4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. The Docket Facility is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket Facility telephone number is (703) 305-5805.

FOR FURTHER INFORMATION CONTACT: Rose Kyprianou, Field and External Affairs Division (7506P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001; telephone number: (703) 305-5354; e-mail address: kyprianou.rose@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Does this action apply to me?

This action is directed to the public in general. It simply announces the submission of a draft proposed rule to the United States Department of Agriculture (USDA) and does not otherwise affect any specific entities. This action may, however, be of particular interest to those persons who produce or register plant-incorporated protectants (PIPs) under FIFRA or may seek a tolerance or tolerance exemption for a PIP under the Federal Food, Drug, and Cosmetic Act (FFDCA). This action may also be of interest to those persons involved in biotechnology research or development of PIPs. Since other entities may also be interested, the Agency has not attempted to describe all the specific entities that may be interested in this action. If you have any questions regarding this action, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

II. What action is EPA taking?

Section 25(a)(2) of FIFRA provides that the Administrator must provide the Secretary of Agriculture with a copy of any draft proposed rule at least 60 days before signing it for publication in the **Federal Register**. Similarly, section 21(b) of FIFRA provides that the Administrator must provide the Secretary of Health and Human Services with a copy of any draft proposed rule pertaining to a public health pesticide at least 60 days before signing it for publication in the **Federal Register**. The draft proposed rule is not available to the public until after it has been signed by EPA. If either Secretary comments in writing regarding the draft proposed rule within 30 days after receiving it, the Administrator shall include in the proposed rule when published in the **Federal Register** the comments of the Secretary and the Administrator's response to those comments. If neither Secretary comments in writing within

30 days after receiving the draft proposed rule, the Administrator may sign the proposed regulation for publication in the **Federal Register** anytime after the 30-day period.

III. Do any Statutory and Executive Order reviews apply to this notification?

No. This document is not a proposed rule, it is merely a notification of submission to the Secretaries of Agriculture and Health and Human Services. As such, none of the regulatory assessment requirements apply to this document.

List of Subjects

40 CFR Part 152

Environmental protection, Administrative practice and procedure, Pesticides and pests, Reporting and recordkeeping requirements.

40 CFR Part 158

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

40 CFR Part 174

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Plant-incorporated protectants, Reporting and recordkeeping requirements.

Dated: March 4, 2011.

Steven Bradbury,

Director, Office of Pesticide Programs.

BILLING CODE 6560-50-P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 67

[Docket ID FEMA-2010-0003; Internal Agency Docket No. FEMA-B-1147]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Proposed rule; correction.

SUMMARY: On October 5, 2010, FEMA published in the **Federal Register** a proposed rule that included erroneous Base Flood Elevation (BFE) location descriptions for Pollard Creek Tributary No. 5 in Palo Pinto County, Texas. The

location description for the proposed BFE of 1,032 feet, referenced to the North American Vertical Datum of 1988, should have located the proposed BFE as being just upstream of Northeast 23rd Street; and the location description for the proposed BFE of 1,049 feet, referenced to the North American Vertical Datum of 1988, should have located the proposed BFE as being approximately 850 feet upstream of Northeast 23rd Street.

DATES: Comments pertaining to the location descriptions for the Pollard Creek Tributary No. 5 BFEs are to be submitted on or before June 14, 2011.

ADDRESSES: You may submit comments, identified by Docket No. FEMA-B-1147, to Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646-4064 or (e-mail) luis.rodriguez1@dhs.gov.

FOR FURTHER INFORMATION CONTACT: Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646-4064 or (e-mail) rodriguez1@dhs.gov.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) publishes proposed determinations of Base (1% annual-chance) Flood Elevations (BFEs) and modified BFEs for communities participating in the National Flood Insurance Program (NFIP), in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed BFEs and modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are minimum requirements. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in those buildings.

Correction

In the proposed rule published at 75 FR 61377, in the October 5, 2010, issue of the **Federal Register**, FEMA published a table under the authority of 44 CFR 67.4. The table, entitled "Palo Pinto County, Texas, and Incorporated Areas" addressed the flooding source Pollard Creek Tributary No. 5.

The proposed rule listed the location description for the proposed BFE of 1,032 feet, referenced to the North American Vertical Datum of 1988, as being approximately 850 feet upstream of 23rd Street. The correct location of this proposed BFE is just upstream of Northeast 23rd Street. The proposed rule also listed the location description for the proposed BFE of 1,049 feet, referenced to the North American Vertical Datum of 1988, as being just upstream of 23rd Street Northeast. The correct location of this proposed BFE is approximately 850 feet upstream of 23rd Street.

This proposed rule correction is reopening the comment period for Pollard Creek Tributary No. 5, for the locations of the proposed BFEs of 1,032 feet and 1,049 feet, both referenced to the North American Vertical Datum of 1988, due to the error in listing the location descriptions for these BFEs in the previously published proposed rule at 75 FR 61377.

(Catalog of Federal Domestic Assistance No. 97.022, "Flood Insurance.")

Dated: March 7, 2011.

Sandra K. Knight,

Deputy Federal Insurance and Mitigation Administrator, Mitigation, Department of Homeland Security, Federal Emergency Management Agency.

[Docket ID FEMA-2010-0003; Internal Agency Docket No. FEMA-B-1110]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Proposed rule; correction.

SUMMARY: On April 14, 2010, FEMA published in the **Federal Register** a proposed rule that contained an erroneous table. This notice provides corrections to that table, to be used in lieu of the information published at 75 FR 19320. The table provided here represents the flooding sources, location of referenced elevations, effective and modified elevations, and communities affected for Sumter County, Alabama, and Incorporated Areas. Specifically, it addresses the following flooding sources: Factory Creek (backwater effects from Tombigbee River), Fenache Creek (backwater effects from Tombigbee River), Folsom Branch (backwater effects from Tombigbee River), High Run (backwater effects from Tombigbee River), Jones Creek (backwater effects from Tombigbee River), Noxubee River (backwater effects from Tombigbee River), Sandy Creek, Sucarnoochee River, Tombigbee River, Tombigbee River Tributary 13 (backwater effects from Tombigbee River), Tombigbee River Tributary 16 (backwater effects from Tombigbee River), Tombigbee River Tributary 7 (backwater effects from Tombigbee River), Tombigbee River Tributary 8 (backwater effects from Tombigbee River), Toomsaba Creek, and Whiterock Creek (backwater effects from Sucarnoochee River).

DATES: Comments are to be submitted on or before June 14, 2011.

ADDRESSES: You may submit comments, identified by Docket No. FEMA-B-1110, to Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646-4064 or (e-mail) luis.rodriquez1@dhs.gov.

FOR FURTHER INFORMATION CONTACT: Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646-4064 or (e-mail) luis.rodriquez1@dhs.gov.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) publishes proposed determinations of Base (1% annual-chance) Flood Elevations (BFEs) and modified BFEs for communities participating in the National Flood Insurance Program (NFIP), in accordance with section 110 of the

Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed BFEs and modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are minimum requirements. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in those buildings.

Corrections

In the proposed rule published at 75 FR 19321, in the April 14, 2010, issue of the **Federal Register**, FEMA published a table under the authority of 44 CFR 67.4. The table, entitled "Sumter County, Alabama, and Incorporated Areas" addressed the following flooding sources: Factory Creek (Backwater effects from Tombigbee River), Fenache Creek (Backwater effects from Tombigbee River), Folsom Branch (Backwater effects from Tombigbee River), High Run (Backwater effects from Tombigbee River), Jones Creek (Backwater effects from Tombigbee River), Noxubee River (Backwater effects from Tombigbee River), Sandy Creek, Sucarnoochee River, Tombigbee River, Tombigbee River Trib 13 (Backwater effects from Tombigbee River), Tombigbee River Trib 16 (Backwater effects from Tombigbee River), Tombigbee River Trib 7 (Backwater effects from Tombigbee River), Tombigbee River Trib 8 (Backwater effects from Tombigbee River), Toomsaba Creek, and Whiterock Creek (Backwater effects from Sucarnoochee River). That table contained inaccurate information as to the location of referenced elevation, effective and modified elevation in feet, and/or communities affected for that flooding source. In this notice, FEMA is publishing a table containing the accurate information, to address these prior errors. The information provided below should be used in lieu of that previously published.
