

conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 63, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 63, subpart LL.

Owners or operators of the affected facilities must submit a one-time-only report of any physical or operational changes, initial performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 2,010 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or operators of primary aluminum reduction plants.

Estimated Number of Respondents: 16.

Frequency of Response: Initially, semiannually and annually.

Estimated Total Annual Hour Burden: 80,398.

Estimated Total Annual Cost: \$7,599,556, which includes \$7,508,208 in labor costs and \$91,348 in operation and maintenance (O&M) costs. There are no annualized capital/startup costs for this ICR.

Changes in the Estimates: There is no change in the calculation methodology for labor hours and Agency costs in this ICR compared to the previous ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for the respondents is very low, negative, or non-existent. It should be noted that there is an apparent increase of 352 hours in respondent labor hours. This is due to a mathematical error in the previous ICR.

The increase in cost to Respondents and the Agency is due to updating of the labor rates to reflect the most recent available estimates. There are no changes to the capital/startup or operation and maintenance costs.

Dated: March 11, 2011.

Director, Collection Strategies Division.
