FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Parts 326 and 334

RIN 3064-AD76

Procedures for Monitoring Bank Secrecy Act Compliance and Fair Credit Reporting: Technical Amendments

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Final rule.

SUMMARY: The FDIC is adopting a final rule to update cross-references in its anti-money laundering program and Fair Credit Reporting Act rules, to conform to changes in the numbering of the Department of the Treasury's rules that implement the Bank Secrecy Act.

DATES: Effective March 18, 2011.

FOR FURTHER INFORMATION CONTACT:

Division of Risk Management Supervision and Consumer Protection: Debra Novak (202) 898-6641; Legal Division: Carl Gold, Counsel, (202) 898-8702; Richard M. Schwartz, Counsel, (202) 898-7424.

SUPPLEMENTARY INFORMATION: As required by section 8(s) of the Federal Deposit Insurance Act, 12 U.S.C. 1818(s), the FDIC's regulation, 12 CFR 326.8, requires every State nonmember bank to establish and maintain procedures reasonably designed to assure and monitor its compliance with the requirements of the Bank Secrecy Act ("BSA"), 31 U.S.C. 5311 *et seq.*, and the regulations implementing that statute ("BSA regulations"). In addition, the FDIC has regulations, 12 CFR part 334, which implement the Fair Credit Reporting Act, 15 U.S.C. 1681 *et seq.* The Financial Crimes Enforcement Network (FinCEN), an arm of the Department of the Treasury, recently amended the BSA regulations to reorganize and move them from 31 CFR Part 103 to Chapter X of Title 31 of the CFR. 75 FR 65806 *et seq.* (Oct. 26, 2010). Effective March 1, 2010, the BSA regulations governing State nonmember banks (as well as other federally-insured depository institutions) are contained in 31 CFR part 1010 *et seq.*

To conform to this change, the FDIC is amending a general cross-reference to the BSA regulations in 12 CFR 326.8, and specific cross-references to the Customer Identification Program ("CIP"), 31 CFR 103.121, in 12 CFR 326.8, 12 CFR 334.82, and Appendix J to Part 334. The CIP regulation, which is substantively unchanged, is now found at 31 CFR 1020.220.

Administrative Procedure Act

The Administrative Procedure Act, 5 U.S.C. 553(b) provides that a final regulation may be issued without prior notice or an opportunity for comment when the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest. The FDIC finds that good cause exists as the regulatory amendments are nonsubstantive, and therefore notice and public procedure are unnecessary. 5 U.S.C. 553(d) provides that the required publication or service of a substantive rule shall be made not less than 30 days before its effective date, with some exceptions. Since this is not a substantive rule, the rule is effective

immediately upon publication in the **Federal Register**.

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) does not apply to a rulemaking where a general notice of proposed rulemaking is not required. See 5 U.S.C. 603 and 604. As noted previously in the **SUPPLEMENTARY INFORMATION** section, the FDIC has determined, for good cause, that it is unnecessary to publish a notice of proposed rulemaking for this final rule. Accordingly, the RFA's requirements relating to an initial and final regulatory flexibility analysis do not apply.

Paperwork Reduction Act

There are no information collection requirements in this final rule.

BILLING CODE 6714-01-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 25

[Docket No. NM436; Special Conditions No. 25-421-SC]

Special Conditions: Boeing Model 747-8 Airplanes, Systems and Data Networks Security—Isolation or Protection From Unauthorized Passenger Domain Systems Access

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final special conditions.

SUMMARY: These special conditions are issued for Boeing Model 747-8 airplanes. This airplane will have novel or unusual design features associated with connectivity of the passenger domain computer systems to the airplane critical systems and data networks. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for these design features. These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

DATES: *Effective Date:* April 18, 2011
FOR FURTHER INFORMATION CONTACT: Will Struck, FAA, Airplane and Flight Crew Interface Branch, ANM-111, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98057-3356; telephone (425) 227-2764; facsimile (425) 227-1149.

SUPPLEMENTARY INFORMATION:

Background

On November 4, 2005, The Boeing Company, P.O. Box 3707, Seattle, WA 98124, applied for an amendment to Type Certificate Number A20WE to include the new Model 747-8 passenger airplane. The Model 747-8 is a derivative of the 747-400. The Model 747-8 is a four-engine jet transport airplane that will have a maximum takeoff weight of 970,000 pounds and new General Electric GENx-2B67 engines. The Model 747-8 will have two flight crew and the capacity to carry 605 passengers.

Type Certification Basis

Under the provisions of Title 14 Code of Federal Regulations (14 CFR) 21.101, Boeing must show that the Model 747-8 (hereafter referred to as the 747-8) continues to meet the applicable provisions of 14 CFR part 25, as amended by Amendments 25-1 through 25-117, except for §§ 25.809 and 25.812,

which will remain at Amendment 25-115. These regulations will be incorporated into Type Certificate No. A20WE after type certification approval of the 747-8.

If the Administrator finds that the applicable airworthiness regulations (i.e., part 25) do not contain adequate or appropriate safety standards for the 747-8 because of a novel or unusual design feature, special conditions are prescribed under the provisions of § 21.16.

Special conditions are initially applicable to the model for which they are issued. Should the type certificate for that model be amended later to include any other model that incorporates the same novel or unusual design feature, or should any other model already included on the same type certificate be modified to incorporate the same novel or unusual design feature, the special conditions would also apply to the other model under § 21.101.

In addition to the applicable airworthiness regulations and special conditions, the 747-8 must comply with the fuel vent and exhaust emission requirements of 14 CFR part 34 and the noise certification requirements of 14 CFR part 36.

Special conditions, as defined in § 11.19, are issued under § 11.38, and become part of the type certification basis under § 21.101.

Novel or Unusual Design Features

The Boeing Model 747-8 airplane will incorporate the following novel or unusual design features: Digital systems architecture composed of several connected networks. The network architecture would be used for a diverse set of functions, including:

1. Flight-safety related control, communication, and navigation systems (Aircraft Control Domain),
2. Airline business and administrative support (Airline Information Domain),
3. Passenger information and entertainment systems (Passenger Entertainment Domain), and
4. The capability to allow access to or by external network sources.

Discussion of Comments

Notice of proposed special conditions No. 25-10-01-SC for the Boeing Model 747-8 airplane was published in the **Federal Register** on December 9, 2010 (75 FR 76647). No comments were received and the special conditions are adopted as proposed.

Applicability

As discussed above, these special conditions are applicable to Boeing
