

estimate includes the time to locate the data related to the pre-enactment unexpired swap transaction and the time to ensure that the data is maintained in such form as it currently exists. The total annual cost burden per respondent is estimated to be \$21.05. The Commission based its calculation on an hourly wage rate of \$42.05 for a Programmer to maintain the data.⁷

Respondents/Affected Entities: Swap dealers, Major Swap Participants, and other counterparties to a swap transaction (*i.e.*, end-user, non-SD/non-MSP counterparties).

Estimated Number of Respondents: 32,000.

Estimated Total Annual Burden on Respondents: 16,000 hours.

Frequency of Collection: Once.

⁷ In arriving at a wage rate for the hourly costs imposed, Commission staff used the Management & Professional Earnings in the Securities Industry Report, published in 2010 by the Securities Industry and Financial Markets Associations (2010 Report). The wage rate used the median salary of a Programmer as published in the 2010 Report and divided that figure by 2000 annual working hours to arrive at the hourly rate of \$42.05. Because the interim final rule requires only that existing data be maintained in its current form, a programmer will be able to perform this task.

Issued by the Commission, this 30th day of March 2011.

David Stawick,

Secretary of the Commission.
