SUPPLEMENTARY INFORMATION:

Title: Emergency Relief Funding Applications.

OMB Control #: 2125-0525

Background: Congress authorized in Title 23, United States Code, Section 125, a special program from the Highway Trust Fund for the repair or reconstruction of Federal-aid highways and roads on Federal lands which have suffered serious damage as a result of natural disasters or catastrophic failures from an external cause. This program, commonly referred to as the Emergency Relief or ER program, supplements the commitment of resources by States, their political subdivisions, or other Federal agencies to help pay for unusually heavy expenses resulting from extraordinary conditions. The applicability of the ER program to a natural disaster is based on the extent and intensity of the disaster. Damage to highways must be severe, occur over a wide area, and result in unusually high expenses to the highway agency. Examples of natural disasters include floods, hurricanes, earthquakes, tornadoes, tidal waves, severe storms, and landslides. Applicability of the ER program to a catastrophic failure due to an external cause is based on the criteria that the failure was not the result of an inherent flaw in the facility but was sudden, caused a disastrous impact on transportation services, and resulted in unusually high expenses to the highway agency. A bridge suddenly collapsing after being struck by a barge is an example of a catastrophic failure from an external cause. The ER program provides for repair and restoration of highway facilities to pre-disaster conditions. Restoration in kind is therefore the predominate type of repair expected to be accomplished with ER funds. Generally, all elements of the damaged highway within its cross section are eligible for ER funds. Roadway items that are eligible may include: Pavement, shoulders, slopes and embankments, guardrail, signs and traffic control devices, bridges, culverts, bike and pedestrian paths, fencing, and retaining walls. Other eligible items may include: Engineering and right-of-way costs, debris removal, transportation system management strategies, administrative expenses, and equipment rental expenses. This information collection is needed for the FHWA to fulfill its statutory obligations regarding funding determinations for ER eligible damages following a disaster. The
