SUPPLEMENTARY INFORMATION:

Introduction

With this notice, we finalize the CCP process for Protection Island and San Juan Islands NWRs. We started this process through a notice in the **Federal Register** (72 FR 45444; August 14, 2007). We released the draft CCP and the EA to the public, announcing and requesting comments in a notice of availability in the **Federal Register** (75 FR 51098; August 18, 2010).

Protection Island NWR is located in the Strait of Juan de Fuca near the entrance to Discovery Bay in Jefferson County, Washington. It includes 659 acres of land and tideland. Protection Island NWR was established to provide habitat for a diversity of birds, with particular emphasis on nesting bald eagles and seabirds, as well as to protect the hauling-out area for marine mammals. It has one of the largest colonies of rhinoceros auklets in North America. The Refuge also provides opportunities for scientific research and wildlife-oriented education and interpretation.

Most of the San Juan Islands NWR consists of rocks, reefs, and islands scattered throughout the San Juan Archipelago. Two islands, Smith and Minor, are located south of the archipelago within the Strait of Juan de Fuca. The Refuge consists of approximately 449 acres in San Juan, Skagit, Island, and Whatcom Counties, Washington. Most (353 acres) of San Juan Islands NWR is designated wilderness known as the San Juan Islands Wilderness Area. San Juan Islands NWR was established to facilitate management of migratory birds, including serving as a breeding ground and winter sanctuary for native birds. It was also intended to be a refuge for other wildlife. This refuge is particularly important to breeding black oystercatchers, cormorants, and harbor seals.

We announce our decision and the availability of the FONSI for the final CCP for Protection Island and San Juan Islands NWRs in accordance with National Environmental Policy Act (NEPA) (40 CFR 1506.6(b)) requirements. We completed a thorough analysis of impacts on the human environment, which we included in the EA that accompanied the draft CCP.

The CCP will guide us in managing and administering Protection Island and San Juan Islands Refuges for the next 15 years. Alternative B, as we described in the final CCP, is the foundation for the CCP, with slight modifications.

Background

The National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd-668ee) (Refuge Administration Act), as amended by the National Wildlife Refuge System Improvement Act of 1997, requires us to develop a CCP for each refuge. The purpose for developing a CCP is to provide refuge managers with a 15-year plan for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System, consistent with sound principles of fish and wildlife management, conservation, legal mandates, and our policies. We will review and update the CCP at least every 15 years in accordance with the Refuge Administration Act.

CCP Alternatives, Including Selected Alternative

Our draft CCP and our EA (75 FR 51098) addressed several issues. To address these, we developed and evaluated the following alternatives:

Alternative A: Current Management

Under Alternative A, the refuges would continue with current management, which focuses on stewardship, including removing unnecessary roads and human structures; allowing natural processes to occur with minimal human intervention; monitoring wildlife species; and working with partners to reduce the risk of oil spills, clean up marine debris, and educate boaters to minimize human-caused wildlife disturbance. Recreational activities would continue as they have in the past and be facilitated through a State Parks partnership.

Alternative B: Preferred Alternative

This Alternative would continue many of the activities in Alternative A, but would also include a greater number of active habitat management projects, such as removal of deer from Protection Island to enhance seabird nesting
