

following the normal fishing schedule of the participating vessels. The gear would be compliant with the Atlantic Large Whale Take Reduction Plan; therefore, impacts to protected resources would be negligible. Subsequently, AOLA will provide data necessary to assist in better future management of the lobster fishery.

The activities occurring in Area 3 statistical areas are not anticipated to have any more environmental impacts than those already occurring as part of a commercial lobster trap trawl deployed under usual industry conditions. Impacts to the lobster resource would be negligible. Given the small mesh and entrance heads, the modified gear is not expected to catch legal lobsters. Any sublegal lobsters caught would briefly be retained onboard only for the purposes of recording their size, sex, and presence of shell disease, before being promptly released back into the ocean. There should be minimal impact to bycatch species due to the use of small mesh and small entrance heads and, in addition, all bycatch species hauled from modified gear would be returned promptly to the ocean. Likewise, there would not be significant impacts on benthic habitats. As the gear would be compliant with the Atlantic Large Whale Take Reduction Plan and would be deployed under usual industry conditions, impacts to protected resources would be negligible.

If approved, the applicant may request minor modifications and extensions to the EFP throughout the year. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate completion of the proposed research and have minimal impacts that do not change the scope or impact of the initially approved EFP request. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.

Magnuson-Stevens Act Provisions; General Provisions for Domestic Fisheries; Extension of Exempted Fishing Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for comments.

SUMMARY: The Assistant Regional Administrator for Sustainable Fisheries, Northeast Region, NMFS (Assistant Regional Administrator), has made a preliminary determination that two requests for extensions to exempted fishing permits (EFPs) contain all of the required information and warrant further consideration. The Assistant Regional Administrator previously made a determination that the activities authorized under the initial EFPs, issued on June 17, 2010, are consistent with the goals and objectives of the Monkfish Fishery Management Plan (FMP). However, further review and consultation may be necessary before a final determination is made to grant extensions to the original EFPs. The EFP extensions would enable vessels to harvest monkfish granted through the Monkfish Research Set-Aside (RSA) Program, and grants exemptions from the monkfish days-at-sea (DAS) possession limit in the Southern Fishery Management Area (SFMA). The EFP issued to the gillnet tie-down study also exempts vessels from the monkfish minimum fish size limits for research purposes only.

NMFS is soliciting comment from interested parties on these EFP extension requests.

DATES: Comments must be received on or before April 25, 2011.

ADDRESSES: You may submit written comments by any of the following methods:

SUPPLEMENTARY INFORMATION: On February 22, 2011, the Gulf of Maine Research Institute (GMRI) requested an extension to EFPs issued to GMRI in support of two projects funded under the 2010 Monkfish RSA Program. The EFPs authorize vessels to conduct compensation fishing in the SFMA using 2010 monkfish RSA DAS and to temporarily retain undersize monkfish for data collection purposes. The applicant requests an extension because the participating vessels were unable to use all of their allocated RSA DAS awarded to GMRI for the 2010 fishing year (FY). GMRI states the vessels were unable to use all of their RSA DAS because the EFPs were not issued until June 17, 2010, and the fishermen thereby missed the peak of the spring fishing season. Additionally, the fall monkfish fishery was less productive than expected because of skate bycatch issues. As a result, fishermen used fewer 2010 monkfish RSA DAS than expected. In addition to compensation fishing, research would be ongoing and, therefore, the previously authorized exemption from monkfish minimum size limits for the gillnet tie-down project would be extended as well. The scope and scale of the original exemptions will not change. Regulations at 50 CFR 648.92(c)(i)(v) allow unused monkfish RSA DAS to carry-over into the following FY.

The tagging project was awarded 313 monkfish DAS under the 2010 Monkfish RSA Program, with a total landings cap of 1,126,800 lb (511,108 kg) of whole monkfish. Compensation fishing would be extended through the 2011 FY until the cumulative monkfish RSA landings for this project in FYs 2010 and 2011 reach 1,126,800 lb (511,108 kg) of whole monkfish (equivalent), or until the awarded 2010 DAS have been fully utilized, whichever occurs first. The tie-down project was awarded 162 monkfish DAS under the 2010 Monkfish RSA Program, with a total landings cap of 583,200 lb (264,535 kg) of whole monkfish. Compensation fishing would be extended through the 2011 FY until the cumulative monkfish RSA landings for this project in FYs 2010 and 2011 reach 583,200 lb (264,535 kg) of whole monkfish (equivalent), or until the awarded 2010 DAS have been fully utilized, whichever occurs first. This would extend the expiration date of the EFPs from April 30, 2011, to April 30, 2012. No further extensions to these EFPs would be made. Additionally, NMFS is considering imposing a cap on monkfish DAS possession limit exemptions for vessels operating under the monkfish RSA program due to

potential effects that such exemptions may have on monkfish catch rates for non-RSA vessels.

A detailed description of the initial EFP proposals were provided in previous **Federal Register** notices (April 16, 2010, 75 FR 19938) and is not repeated here. The applicant may request minor modifications to the EFPs throughout the year. EFP modifications may be granted without further notice if they are deemed essential to facilitate completion of the proposed research and have minimal impacts that do not change the scope or impact of the initially approved EFP requests. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.

Gulf of Mexico Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a public meeting.

SUMMARY: The Gulf of Mexico Fishery Management Council will convene a meeting of the Reef Fish Advisory Panel.

DATES: The meeting will convene at 9 a.m. on Monday April 25, 2011 and conclude by 5 p.m.

ADDRESSES: The meeting will be held at the Gulf of Mexico Fishery Management Council, 2203 North Lois Avenue, Suite 1100, Tampa, FL 33607; telephone: (813) 348-1630.

Council address: Gulf of Mexico Fishery Management Council, 2203 N. Lois Avenue, Suite 1100, Tampa, FL 33607.

FOR FURTHER INFORMATION CONTACT: Mr. Steven Atran, Population Dynamics Statistician; Gulf of Mexico Fishery Management Council; telephone: (813) 348-1630.

SUPPLEMENTARY INFORMATION: The Reef Fish Advisory Panel will meet to review and provide recommendations to the

Council on Reef Fish Amendment 32. This amendment contains actions to establish a rebuilding plan for gag, set recreational bag limits, size limits and closed seasons for gag/red grouper in 2012, consider a commercial gag and shallow-water grouper quota adjustment to account for dead discards, make adjustment to multi-use IFQ shares in the grouper individual fishing quota program, reduce the commercial gag size limit, modify the offshore time and areas closures, and establish gag, red grouper, and shallow-water grouper accountability measures. The Panel will also review and provide recommendations on the Generic Annual Catch Limits/Accountability Measures Amendment. This amendment contains actions to delegate management of selected species to other agencies, remove selected species from the fishery management plans, group species for purposes of setting annual catch limits and annual catch targets, establish an acceptable biological catch control rule, establish an annual catch limit/annual catch target control rule, establish a generic framework procedure for implementing management changes, establish the initial specification of annual catch limits and annual catch targets for stocks and stock groups still in need of such specification, establish the apportionment of the black grouper, yellowtail snapper, and mutton snapper stocks between the Gulf and South Atlantic Council jurisdictions, set a commercial and recreational allocation of black grouper within the Gulf Council's jurisdiction, and establish accountability measures to keep catch levels within their annual catch limits or take corrective action if they exceed the limits.

Copies of the agenda and other related materials can be obtained by calling (813) 348-1630.

Although other non-emergency issues not on the agenda may come before the Advisory Panel for discussion, in accordance with the Magnuson-Stevens Fishery Conservation and Management Act, those issues may not be the subject of formal action during this meeting. Actions of the Advisory Panel will be restricted to those issues specifically identified in the agenda and any issues arising after publication of this notice that require emergency action under Section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take action to address the emergency.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for

sign language interpretation or other auxiliary aids should be directed to Kathy Pereira at the Council (*see ADDRESSES*) at least 5 working days prior to the meeting.
