## ENVIRONMENTAL PROTECTION AGENCY

[FRL-9292-3]

### New York State Prohibition of Discharges of Vessel Sewage; Receipt of Petition and Tentative Affirmative Determination

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice—Receipt of petition and tentative affirmative determination.

**SUMMARY:** Notice is hereby given that, pursuant to Clean Water Act, Section 312(f)(3) (33 U.S.C. 1322(f)(3)), the State of New York has determined that the protection and enhancement of the quality of the New York State areas of the Long Island Sound requires greater environmental protection, and has petitioned the United States Environmental Protection Agency, Region 2, for a determination that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for those waters, so that the State may completely prohibit the discharge from all vessels of any sewage, whether treated or not, into such waters.

New York State has proposed to establish a "Vessel Waste No-Discharge Zone" for the Long Island Sound that encompasses approximately 760 square miles, includes the open waters, harbors, bays and navigable tributaries of the Sound and a portion of the East River, from the Hell Gate Bridge in the west to the northern bounds of Block Island Sound in the east. It excludes waters of Mamaroneck Harbor, Huntington-Northport Bay Complex,

Port Jefferson Complex, Hempstead Harbor and Oyster Bay/Cold Spring Harbor Complex, which have been previously designated as No Discharge Zones.

**DATES:** Comments regarding this tentative determination are due by May 11, 2011.

**ADDRESSES:** You may submit comments by any of the following methods:

**SUPPLEMENTARY INFORMATION:** Notice is hereby given that the State of New York (NYS or State) has petitioned the United States Environmental Protection Agency, Region 2, (EPA) pursuant to section 312(f)(3) of Public Law 92-500 as amended by Public Law 95-217 and Public Law 100-4, that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for the NYS areas of the Long Island Sound (LIS or Sound). Adequate pumpout facilities are defined as one pumpout station for 300-600 boats under the Clean Vessel Act: Pumpout Station and Dump Station Technical Guidelines (**Federal Register**, Vol. 59, No. 47, March 10, 1994).

The Long Island Sound is one of the nation's premier water bodies, and supports a variety of possible uses—fish and shellfisheries, fish spawning areas, breeding grounds, valuable wildlife habitats, bathing beaches, commercial and recreational boating, and a profusion of recreational resources.

In 1985, recognizing the Sound's ecological and economic value, New York State partnered with Connecticut and the EPA to create and support the Long Island Sound Study (LISS). The Sound was recognized as an Estuary of National Significance under the Clean Water Act in 1988, and as such, is one of the nation's twenty-eight (28) National Estuary Programs.

The ecological, economic, and recreational resources provided by the Long Island Sound are vulnerable to the

effects of poor water quality. The Sound was once home to some of the most productive shellfish beds in the nation, but many have now closed due to pathogen, low dissolved oxygen, and excessive nutrient contamination.

The State of Connecticut designated the Connecticut portion of the Long Island Sound as a No-Discharge Zone (NDZ) in 2007. Previously established No-Discharge Zones in both New York State and Connecticut have made important reductions in vessel waste as a source of water pollution in the Long Island Sound. Degradation of any area, however, affects the whole. Extending the No-Discharge Zone designation to the remainder of the Long Island Sound would therefore be a positive component of an overall strategy to protect and improve these waters and would create a unified approach to vessel waste for the entirety of this waterbody.

In order for EPA to determine that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for the New York State areas of the Long Island Sound, the State must demonstrate that the pumpout-to-vessel ratio does not exceed 1:300. In its petition, the State described the recreational and commercial vessels that use the Sound, and the pumpout facilities that are available for their use.

The recreational vessel population, 11,693, was estimated using 2008 recreational vessel registrations. In addition to recreational vessels, the Sound is used by commercial vessels. The majority of commercial vessels are small fishing vessels, tankers, tugs, or barges. Because the small fishing vessels are comparably sized to the bulk of recreational vessels, they can make use of the existing vessel pumpouts that are available for recreational vehicles. The small commercial vessel population, 500, was estimated based on aerial photographs used to develop the 1996 Statewide Clean Vessel Plan. The figures for recreational and small commercial vessels were then compared to the number of pumpouts available to determine the applicable ratio and whether the requirement is met. There are fifty-two (52) pumpout facilities funded by the Clean Vessel Assistance Program (CVAP) in the relevant areas of the Sound. Of those, twenty-six (26) discharge to a holding tank and twenty-six (26) discharge to a municipal wastewater treatment plant. There are also sixteen (16) other (non-CVAP funded) pumpouts available for recreational and small commercial vessels that either discharge to a holding tank or to a municipal wastewater

treatment plant. Therefore, the total number of pumpouts available for the 12,193 recreational and small commercial vessels that use the Sound is sixty-eight (68), and the pumpout-to-vessel ratio for those vessels is 1:179.3 (68:12,193).

The number of large commercial vessels was estimated using the following information sources: ballast manifests; U.S. Coast Guard assessments; phone contacts with ferries, cruise ships, the State University of New York (SUNY), and the Port Authority of New York and New Jersey. On any given day, the numbers of large vessels in the New York waters of the Long Island Sound is very low, partially

due to complex navigational issues. Tankers, tugs, cruise ships and barges have access to mobile pumpout facilities (i.e., "honey-dipper" trucks or boats) as they do in Connecticut, or may access pumpout facilities at their home port, outside of the region, eliminating the need for services within the Sound.

Ferries constitute the greatest need for pumpouts for large commercial vessels. The New London to Orient Point Ferry does not discharge to LIS waters. It pumps waste from its ferries into the New London City sewer system. The Bridgeport to Port Jefferson Ferry could discharge its waste into a sewage system operated by either the Town of Port Jefferson, or Suffolk County, and the

ferry company is in the process of negotiating an agreement to do so. In the interim, septic truck services are readily available for pumpout while the ferries are docked in Bridgeport. SUNY Maritime College's large vessel is equipped with a marine sanitation device (MSD) that it discharges to the open sea or when docked in its home port at Fort Schuyler. SUNY may install a sewer pipe on the pier so that the vessel can discharge to the municipal system. In the interim, septic truck services are readily available for pumpout when in port at Fort Schuyler.

A list of the facilities, phone numbers, locations, hours of operation, water depth and fee is provided as follows:

## FEDERAL TRADE COMMISSION

### Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register**.

The following transactions were granted early termination—on the dates indicated—of the waiting period provided by law and the premerger notification rules. The listing for each transaction includes the transaction number and the parties to the transaction. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period.
