The U.S. Nuclear Regulatory Commission (NRC or Commission) is issuing a revision to an existing guide in the agency’s “Regulatory Guide” series. This series was developed to describe

and make available to the public information such as methods that are acceptable to the NRC staff for implementing specific parts of the agency’s regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

Revision 4 of Regulatory Guide 1.149, “Nuclear Power Plant Simulation Facilities for Use in Operator Training, License Examinations, and Applicant Experience Requirements,” was issued with a temporary identification as Draft Regulatory Guide, DG-1248.

This guide describes methods acceptable to the NRC’s staff for complying with those portions of the Commission’s regulations associated with approval or acceptance of a nuclear power plant simulation facility for use in operator and senior operator training, license examination operating tests, and meeting applicant experience requirements.
