

local middle school; (iv) Two discussion (focus) groups with children: One group with younger children (grades K–1) and one group with older children (grades 2–4); (v) Two discussion (focus) groups with parents: one group with parents of younger children and one group with parents of older children; and (vi) Observational tours of the community.

During the site visits, respondents will be asked to provide general feedback about the Eagle Books and how the Eagle Books have affected knowledge, attitudes, and behaviors;

how materials currently support or could be used to support other local diabetes prevention efforts; and how the planned Youth Books could support the DETS curriculum. De-identified information will be collected and analyzed by staff from CDC’s Native Diabetes Wellness Program (NDWP), with the assistance of a data collection contractor.

Findings will be used to identify “best practices” with regard to implementation and use of the Eagle Books and DETS curriculum; to inform

the development of similar materials; and to enhance current and future community outreach and technical assistance efforts aimed at preventing or controlling diabetes in AI/AN youth.

Information will be collected in an average of four communities per year over three years. Participation is voluntary and there are no costs to respondents other than their time. The total estimated annualized burden hours are 132.

Administration for Children and Families

Proposed Information Collection Activity; Comment Request

Title: Evaluation of Tribal Health Profession Opportunity Grants (HPOG).
OMB No.: New Collection.

Billing Accounting Code (BAC): 418408.

Description: The Administration for Children and Families (ACF) is proposing information collection activities as part of the Evaluation of the Tribal Health Profession Opportunity Grants (HPOG) (HHS-2010-ACF-OFA-FY-0124). Through this information collection, ACF seeks to conduct a comprehensive process and outcome evaluation to provide documentation and lessons learned about diverse programmatic approaches to health professions trainings for Tribal populations.

The goals of the Tribal HPOG evaluation are to: (1) Provide an in-depth, systematic analysis of program structure, implementation and outcomes of the sites served by the five Tribal HPOG grantees funded in FFY 2010, and (2) compare these data within and across grantees to generate hypotheses about the effectiveness of different program approaches for Tribal populations.

Both of these goals require collecting information from Tribal HPOG grantees and other program stakeholders on an annual basis for three years. The information collection will include data gathered through in-person and telephone interviews and focus groups. Program operations data related to this effort will be collected through a Web-based performance management system under a separate information collection (the **Federal Register** Notice for this information collection was published in Vol. 76, No. 18, January 27, 2011, page 4912).

Respondents

Respondents to the Grantee and Partner Administrative Staff interview will be the administrators of the Tribal HPOG program, workforce development and TANF agencies, public and private university-based partners, and not-for-profit organizations.

Respondents to the Program Implementation Staff interview will be instructors, trainers, and providers of program or supportive services.

Respondents to the Program Participant focus groups or interviews
