Guidance for Industry and Food and Drug Administration Staff; Class II Special Controls Guidance Document: Topical Oxygen Chamber for Extremities; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of the guidance entitled, “Class II Special Controls Guidance Document: Topical Oxygen Chamber for Extremities.” This guidance document was developed as a special control to support the reclassification of the topical oxygen chamber for extremities (TOCE) from class III (premarket approval) into class II (special controls) after reviewing current technological and scientific developments. To support the reclassification, FDA issued a draft class II special controls guidance document entitled “Class II Special Controls Guidance Document: Topical Oxygen Chamber for Extremities” (71 FR 17476). Interested persons were invited to comment on the proposed rule and guidance by July 5, 2006. FDA received 11 comments on the proposed rule. The comments received discussed academic literature, clinical experiences, and patient outcomes that support the reclassification’s determinations of the safety and effectiveness of the TOCE device. The comments did not recommend any changes to the proposed regulation.

FDA is now identifying the guidance document entitled “Class II Special Controls Guidance Document: Topical Oxygen Chamber for Extremities” as the special control for these devices. This guidance document provides a means by which manufacturers of TOCE devices may comply with the requirement of special controls for class II devices. Following the effective date of the final reclassification rule, any manufacturer submitting a premarket notification submission under section 510(k) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 360(k)) for a TOCE device will need to address the issues covered in the special controls guidance document. However, the manufacturer need only show that its device meets the recommendations in the guidance document or in some other way provides equivalent assurances of safety and effectiveness.

II. Significance of Special Controls Guidance

FDA believes that adherence to the recommendations described in this guidance document, in addition to the general controls, will provide reasonable assurance of the safety and effectiveness of TOCE classified under § 878.5650 (21 CFR 878.5650). The final rule establishing this guidance document as a special control will be effective May 25, 2011. Following the effective date of the final rule, TOCE classified under § 878.5650 must comply with the requirement of special controls; manufacturers must address the issues requiring special controls as identified in the guidance, either by following the recommendations in the guidance or by some other means that provides equivalent assurances of safety and effectiveness.

III. Electronic Access

Persons with access to the Internet may obtain the document at either http://www.fda.gov/RegulatoryInformation/Guidances/default.htm or http://www.regulation.gov. Always access an FDA guidance document by using FDA’s Web site listed previously to find the most current version of the guidance.
