Concurring Statement of CFTC Commissioner Scott D. O’Malia; Implementation Roundtable Seriatim; Certainty & Transparency

I concur in supporting the Commission’s roundtable on the implementation process.

Along with the Chairman, I believe that our entire rulemaking process should be as transparent as possible to the public. Consequently, after the Roundtable is complete, I strongly recommend that the Commission submit both a proposal on the order in which the Commission will consider final rulemakings and a proposed implementation plan to the **Federal Register** to allow the public to comment before we begin to consider final rules. Once we receive and review comments, a final rulemaking and implementation schedule should be published in the **Federal Register**. This level of transparency will give the market a clear picture of how the Commission intends to proceed, and how we can be held accountable as we undertake this massive regulatory overhaul. It will also provide the market with certainty market participants need to make the critical investment decisions necessary to be in compliance with the rules upon implementation. Finally, this type of transparency will help guide the Commission's decision regarding when to make critical investments in advanced technology that are necessary for us to effectively oversee the futures, options, and swaps markets.

The more thoughtful, deliberate, and transparent our sequencing and implementation processes are, the more orderly this Commission's regulation of the swaps market will be.

Notice of Proposed Rulemaking (Issued April 21, 2011)

1. Under section 215 of the Federal Power Act (FPA),¹ the Federal Energy Regulatory Commission (Commission) proposes to approve the North American Electric Reliability Corporation's (NERC's) proposed interpretation of Requirement R8 in Commission-approved NERC Reliability Standard TOP-001-1 — Reliability Responsibilities and Authorities.² The

¹ 16 U.S.C. 824o (2006).

² The Commission is not proposing any new or modified text to its regulations. As provided in 18 CFR part 40, proposed interpretation of a Reliability Standard will not become effective until approved by the Commission, and the ERO must post on its Web site each effective Reliability Standard.

Commission proposes to approve the interpretation as discussed below.

I. Background

2. Section 215 of the FPA requires a Commission-certified Electric Reliability Organization (ERO) to develop mandatory and enforceable Reliability Standards, which are subject to Commission review and approval. If approved, the Reliability Standards are enforced by the ERO, subject to Commission oversight, or by the Commission independently.

3. Pursuant to section 215 of the FPA, the Commission established a process to select and certify an ERO³ and, subsequently, certified NERC as the ERO.⁴ On March 16, 2007, the Commission issued Order No. 693, approving 83 of the 107 Reliability Standards filed by NERC, including Reliability Standard TOP-001-1.⁵

4. NERC's Rules of Procedure provide that a person that is "directly and materially affected" by Bulk-Power System reliability may request an interpretation of a Reliability Standard.⁶ The ERO's "standards process manager" will assemble a team with relevant expertise to address the requested interpretation and also form a ballot pool. NERC's Rules provide that, within 45 days, the team will draft an interpretation of the Reliability Standard, with subsequent balloting. If approved by ballot, the interpretation is appended to the Reliability Standard and filed with the applicable regulatory authority for regulatory approval.

A. Reliability Standard TOP-001-1

5. Reliability Standard TOP-001-1 (Reliability Responsibilities and Authorities) centers on the responsibilities of balancing authorities and transmission operators during a system emergency. Specifically, the stated purpose of Reliability Standard TOP-001-1 is to ensure reliability entities have clear decision-making authority and capabilities to take appropriate actions or direct the actions of others to return the transmission
